

Getting Ahead of the Next Storm

Storms have a way of showing up before you've had a chance to think things through—so it helps to get ahead of them while everything's still calm. Here's a quick checklist to make sure you've got the essentials covered before the weather turns.

- **Exit Sign Batteries:** Keep exit signs lit for at least 90 minutes
- **Industrial Flashlights:** Reliable LED lighting for desks, vehicles, and workspaces
- **Two-Way Radio Batteries:** Stay connected when cell service is unreliable
- **Bulk Alkalines:** AA, AAA, 9V, and D batteries for essential devices
- **UPS Systems:** Clean backup power for servers, POS, and critical equipment
- **Portable Power Stations:** Quiet, indoor-safe power for laptops and phones
- **Generators:** Portable or heavy-duty backup for extended outages
