Environmental Stewardship

CONTINUING BILTMORE'S HERITAGE OF SUSTAINABILITY

Ask about our new Farm & Forest Tour

This tour is a 90-minute exploration of the estate's scenic west side that showcases our ongoing commitment to George Vanderbilt's vision of Biltmore as a self-sustaining, working estate and highlights our modern forestry practices. From hydroponic greenhouses and lush pastures where livestock graze to our acres of vineyards, this guided tour takes you to parts of the estate rarely seen by guests.

In following the Vanderbilts' leadership in environmental stewardship and conservation of our natural resources, Biltmore is proud to promote the following options for your events:

- ◇ Estate-raised meats and seasonal vegetables and herbs from our greenhouses are used in our restaurants.
- ◇ In addition to estate provisions, we source many of our ingredients from sustainable farmers and artisans in the area.
- ◇ We are happy to prepare organic menus. Our coffee is organic and fair-trade.
- ◇ Bulk containers for snacks and water in order to reduce the amount of disposables are available.
- ◇ We offer sustainable meeting room options such as pencils from recycled sources, recycled tablet paper, and dry erase boards.
- ◇ Donation of event florals to local retirement homes as well as the donation of food when appropriate can be arranged.

Our daily estate operations feature a number of sustainable practices, including:

- ◇ Best management practices, livestock walkways, and watering tanks are implemented to ensure water quality in the Upper French Broad and Swannanoa River basins.
- ◇ Nine acres of solar fields on the estate generate 1.7MW of renewable energy, offsetting up to 15% of the estate's energy needs.
- ◇ Our Land Rover® Experience is a member of Tread Lightly!®, a non-profit organization that promotes responsible outdoor recreation.
- ◇ Our Sporting Clays School uses biodegradable targets and steel shot.
- ◇ We partner with the Cork Forest Conservation Alliance, a non-profit organization committed to recycling natural corks. Wine cork recycling bins are located throughout the estate.
- ◇ Estate-grown canola is used to produce food-grade cooking oil used in our restaurants. The spent cooking oil is then processed into biodiesel onsite for our trucks and farm equipment.
- ◇ Our corporate philanthropy program proudly supports Habitat for Humanity, MANNA FoodBank, and Mountain Housing Opportunities.
