The Prestwick Group, Inc. Focuses Manufacturing on CARE Products

Sussex, WI - In an effort to partner with businesses across the state, the nation and the world, Sussex-based manufacturer, The Prestwick Group, Inc., has quickly created a line of Coronavirus Active Response Equipment (CARE).

Prestwick's executive and engineering teams quickly changed course in their manufacturing capabilities to better serve essential business such as healthcare, pharmacies, banking, grocery stores, and foodservice, to offer products with the theme of now keeping employees and customers safe.

"To help stop the spread of COVID-19, we've adjusted our manufacturing capabilities and designed solutions to meet the needs of the customers in the market to protect employees, guests and fans," said Chief Operating Officer, Mark Hammer.

Prestwick's new solutions include Protective Dividers, Protective Stands, Hand Sanitizer Stations with messaging, Kiosks and integrated hand sanitizers with waste/recycling.

Counter and table shields were created for the retail, healthcare and foodservice industries where social distancing is not always as easy. Polycarbonate barriers provide a sneeze guard and cough protection barrier as well as accommodating credit card machines.

Along with being a line of defense and safety, the new product lines are portable, easy to install with no hardware required, easy to clean and disinfect and are available in custom sizes.

“This new wave of product need, no one saw coming to this extent,” Hammer said. “However, we feel blessed to be able to partner with businesses in a new way, with the goal of keeping employees and guests safe. In this trying time for all of us, we see this offering as some peace of mind.”

The new CARE line can ship within days of ordering. For more information please visit www.prestwick-group.com/cares.
