

# Introducing SAFEBOLT<sup>TM</sup> Code-Compliant Barricade Lock

Contact a Home Depot Pro representative today to learn about our extensive drop ship SAFEBOLT program.

#### Applications:

- Schools
- Colleges and Universities
- Offices
- Storage Rooms
- Safe Rooms

SAFEBOLT is the fastest way to barricade a classroom door while maintaining 100% code compliance. Anyone in the room can press the red button, which projects a 1-inch locking bolt to secure the room. SAFEBOLT retrofits to existing cylindrical lever locks, making it affordable and easy to install.

- Keyless instant lockdown
- No scrambling to find the classroom key, simply press the red button
- Retrofits to existing cylindrical lever locks
- Cost-efficient - Keep existing cylindrical door locks and keying systems by mounting SAFEBOLT over the existing lock with the collar and adapter ring
- Superior intruder protection
- Stainless steel locking bolt and latch with full 1-inch throw
- High visibility indicator - lets occupants know that the door is bolted
- Free egress - single motion retracts the bolt and latch from the inside at all times
- ADA-compliant, meets all applicable life safety codes
- Keyed entry - staff and first responders can always enter with a key, no one is ever locked in
- Metal installation template ensures easy, fast installation
- Inswing and outswing models available
- Thru-bolted assembly
- Accepts any standard rim cylinder
- Approved for use as a component in fire door assembly with a 20-minute rating with hose stream

### How Does It Work?

Press the red button once to project the locking bolt and instantly lock down the classroom in a code-compliant manner. The classroom lock functions in a normal manner at all times, with exiting always possible in a single motion, even when the SAFEBOLT locking bolt is engaged. Entry is always possible by key, meeting code requirements for keyed entry to any locked classroom. SAFEBOLT is the code-compliant classroom barricade device.
