Customer Targets

All Contacts:

Contacts with a need to manage workplace Health and Safety. Contacts with a need to manage personnel access to the workplace.

Open – Establish an Agenda

Open to a Thermal Screening conversation:

As businesses begin to reopen and employees return to work, many companies are exploring ways to take care of their employees and customers. Can we spend a few minutes and discuss both ideas your team is exploring and what I'm seeing other companies deploy to ensure the health and safety of the employees and customers is maintained?

Discover – Understand customer's circumstances

Discover Questions for Worker Health and Safety:

1. Tell me about your plans to bring your people back to the workplace. What challenges do you see as your people return to work?
2. What are you doing to ensure the health and safety of employees and customers in the workplace?
3. How are you currently managing personnel access to your workplace?

Resolve Indifference

Resolve Indifference for a Thermal Screening Conversation:

- With many of my customers, prior to this current situation, workplace personnel access wasn't at the top of their mind. They are now very focused on health, safety and authorized personnel access in the workplace going forward.
 - Tell me more about what your company's plan to address health, safety and workplace access going forward?
 - What types of solutions have you considered to manage workplace access and monitor employee health?

Technology

Safe Space Scan Thermal Screening Solutions

Satisfy

Worker Health and Safety Solutions. As workers return to the workplace, Staples has a solution to help manage workplace access and assess potential health risks. This solution will help to manage personnel access to the workplace and other restricted areas and enhance workplace health and safety.

Accurate Temperature Check: Safe Space Scan Thermal Screening Solutions provide workplace health and safety by identifying anyone with a temperature that is attempting to enter the facility. Alarms can be added to sound when those above the temperature threshold attempt to enter.

Features & Benefits

- Screening flexibility to support individual 'no-contact' screenings
- Facial Recognition Library up to 100k records
- Temperature Accuracy $\leq \pm 0.3$ degrees Fahrenheit
- Wiegand Pigtail allows connection to building security in some options
