Let's Get Fired Up: Sparking a Connection with Your Customers

Marla Posey, Spark Multifamily

Technology and innovation makes life better, faster and more efficient, however, it's vital not to underestimate the need for balance between innovation and a personal connection.

In this session, we explore how to do create the connection with our customers through digital and technology as well as basic human interaction.

You don't need new product, lots of amenities, or, big budgets to provide your customers what they really want – a connection that is both meaningful and memorable. If you accomplish that you'll have created loyalty through emotional branding that rises above the tide and stands the test of time.

LEADERSHIP

MANAGEMENT

Managing Promises, Not People

Eric Papp, Productivity Workshop

It is incredible how many good managers get consumed by firefighting or day-to-day activities that distract them from achieving their primary objectives. For many managers, the solution is to work harder and longer, picking up the slack from their team and delaying conversations around employee performance.

So, how can you develop and lead a self-managing team? By managing promises. A self-managing team allows the manager to focus on what's most important: strategic planning, coaching, and growth.

LEADERSHIP
