

Shifting

THE PARADIGM

iBuild

Welcome

Just a little background info...

21 yrs in public education

**TECHNICAL
COLLEGE**
SYSTEM

How do you get to Jacksonville?

Is that the real question?

I don't think so...

Current Parent Paradigm

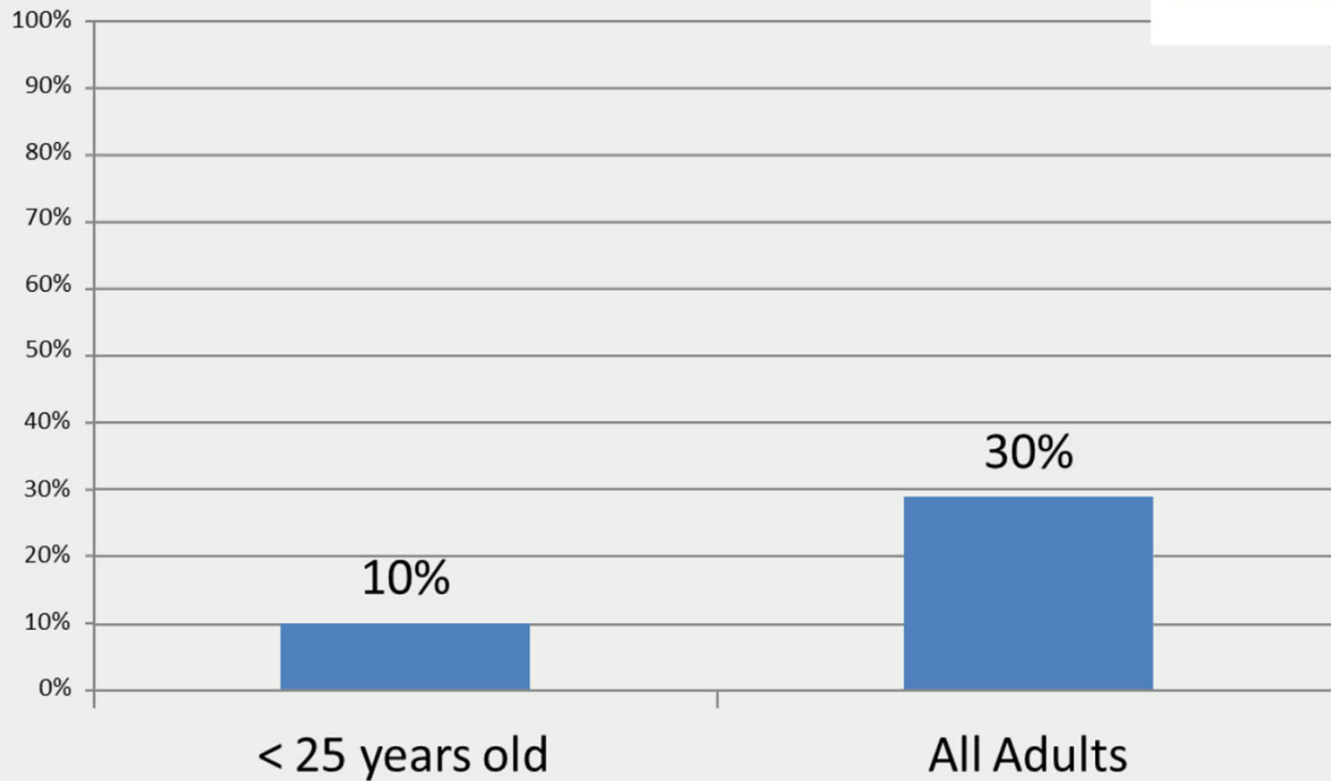

My child **will** go to a 4-year
University.

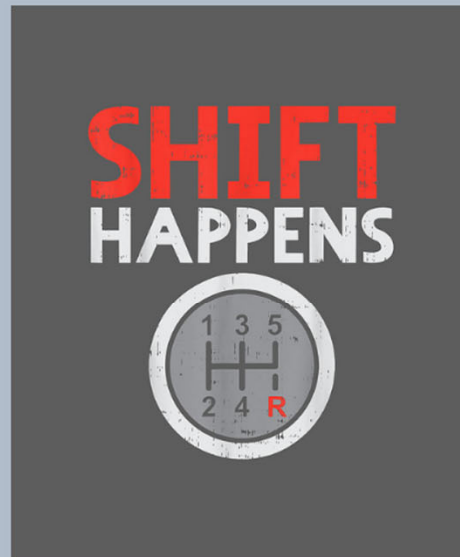

The Reality

Americans with a 4-year degree

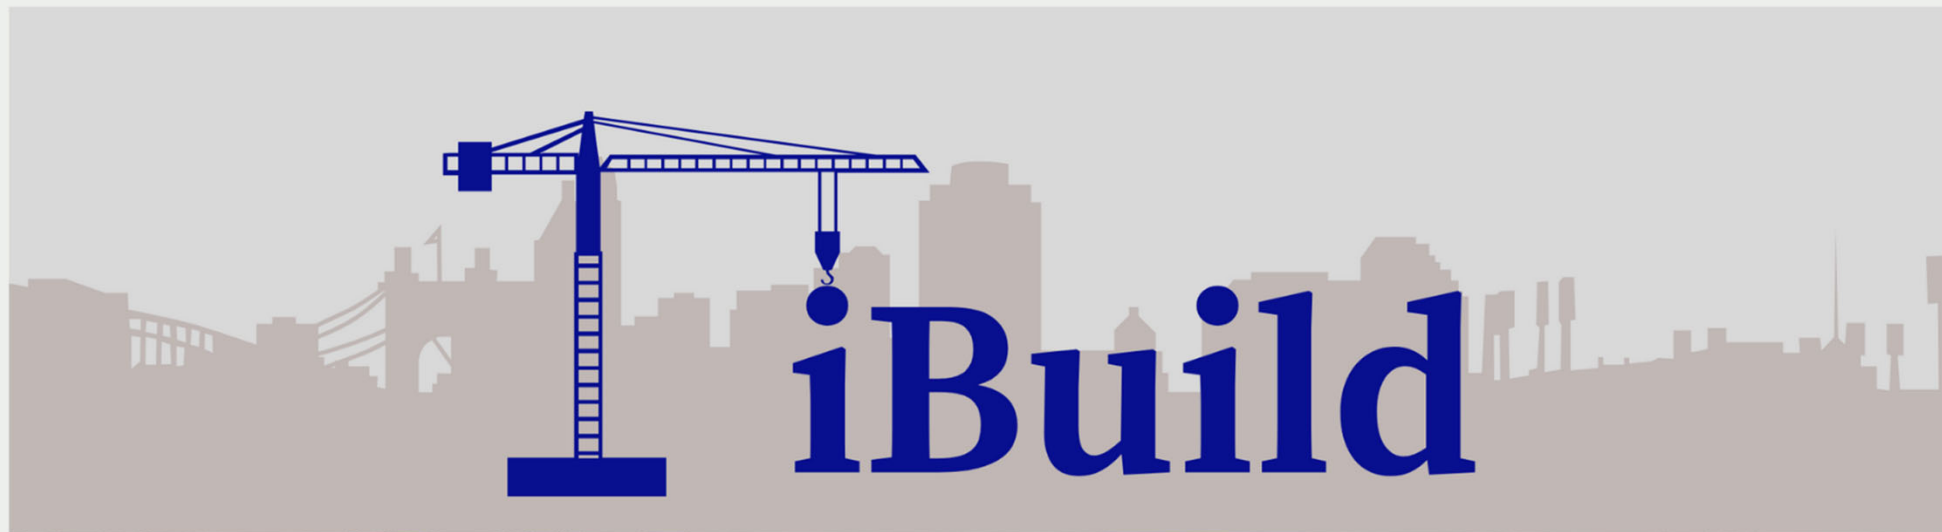

We need ^{to shift} \wedge that paradigm.

Shifting the paradigm...

How do we do that?

Mission:

We build partnerships with Education, Industry, and the Community to provide pathways towards rewarding careers in Construction.

Vision:

All people have access to build a career in the construction industry.

CONNECTING THE CLASSROOM

Active trade professionals come into classrooms to share with students what is currently happening in the field. Educators welcome our work, and students embrace the opportunities to learn about new career choices

WHAT WE DO:

SCHOOL BOARD JOBSITE VISITS

iBuild works with our educational and industry partners to schedule jobsite field trips for these groups. During these trips, we discuss the various careers available within construction, the education that goes obtaining them, and the benefits of working within the industry.

TRADE INSTRUCTOR SUPPORT GROUP

Trade instructors from across Central Florida share ideas, resources and challenges to put forward solutions and best practices. iBuild facilitates this mentorship and lesson plan exchange removing obstacles and creating success across our region.

IBUILD CORRECTIONS PRE- APPRENTICESHIP

This state registered pre-apprenticeship program is currently held at Polk Corrections where we are working with those who have less than a year left in their sentencing and teaching them safety, construction basics, and exploring various trades with them. This way when they're released, they can be hired by one of our partners and enrolled in the second year of an apprenticeship program of their choosing. We utilize book work, hands-on learning, and virtual reality components.

REGISTERED APPRENTICESHIPS

IBUILD CARPENTRY APPRENTICESHIP

This is a four-year apprenticeship program that provides training on the jobsite and two nights of classroom instruction. Upon completion of the program, program participants will receive their journeyman's card and have the skills to work in a variety of craft trades.

IBUILD PRE- APPRENTICESHIP YOUTH PROGRAM

This state registered pre-apprenticeship program will allow for high school students in Pinellas county to earn while they learn and be directly exposed to the construction industry. Students will get OSHA and First Aid/CPR certified as well as learn construction basics during the school year and over summer be paired with a participating employer to get hands on experience on a jobsite.

IBUILD INVITATIONAL

An annual event we host that includes a job fair, various skilled trade competitions (high school and adult categories) taking place throughout the morning, and a "signing" at the end of the event. Local companies can "sign on" job fair attendees and skilled trade competitors by making an offer and hiring them on the spot.

FRANK BRACCO IBUILD UP GRANT

The Frank Bracco Memorial iBuild-Up Grant is a fund that empowers people to pursue their career in the construction industry. Funding supports purchasing tools/boots, training cost, and more.

IBUILD INFRASTRUCTURE APPRENTICESHIP

This state registered 4-year apprenticeship program is the first of its kind! It focuses on all aspects of horizontal construction including roadworks, heavy civil, infrastructure, and more. We are starting this program in collaboration with Wharton-Smith, Inc., Garney Construction, and Mack Contracting
