

Flexible Pavement Committee Meeting
July 29, 2026
Florida Turnpike - Orlando
Draft Agenda

1. Specification Updates. Previous (July 2025), current (July 2026), and future (July 2027) Specification changes for asphalt.
2. Update on the CTQP Training Course revisions. The asphalt CTQP courses are currently being updated and revised.
3. Project level binder testing. Current binder testing frequency and timelines for getting results.
4. Binder Testing EARs. How should EARs be handled for binder failures?
5. Mix design verification. How is the process going? Any issues?
6. APA Testing of asphalt mix designs. Summary of the APA rut test results for mix designs submitted to the SMO.
7. Research Update. Updates on FDOT in-house and contracted research, HVS, NCAT Test Track, and Asphalt Test Road projects.
8. Future research needs. Are there any needs that should be included in the FDOT research program?
9. New Crack Relief Mixture. FDOT has a new asphalt mixture to be used to prevent reflective cracking.
10. Pavement Design criteria for FC-5/FC-7. How does a district know when to use FC-5 versus FC-7?
11. FC-7. What are the experiences with FC-7 to date?
12. FC-5 Only projects. How often will they occur and how are they going so far?
13. Thick-Lift Paving Presentation. FDOT has a new Developmental Specification for thick-lift paving. NCAT staff will give a brief presentation on some of the does and don't when paving thicker lifts.
14. Materials Supply and Availability. Are there any binder, aggregate, or other materials supply issues?
15. Update on striping removal research. FDOT is working with FTBA on determining the best method(s) of removing errant striping on a project.
16. Profiler Demonstration/Workshop at SMO in October. Will include multiple vendors, panel question session, and show case of latest profiler technology
17. King for a Day: What changes need to be made (or should be considered) to the asphalt program in Florida?
18. Open Forum.
