LETTER FROM THE PRESIDENT OF ACEC ILLINOIS

Thank you all for being a part of our The American Council of Engineering Companies of Illinois' 2022 Engineering Excellence Awards Gala. This year's theme, "Rising to the Challenge" was a perfect description of exactly how our industry has dealt with the adversity of designing and constructing during a pandemic. While the pandemic may have kept us apart, the work done by ACEC Illinois members has brought us closer together by modernizing our state's infrastructure network and improving mobility, connectivity and the delivery of critical services for everyone.

To put it simply, by rising to the challenge today, ACEC Illinois is preparing a better Illinois for tomorrow.

ACEC Illinois is the voice of the business of engineering in Illinois. With roots dating back more than 100 years, ACEC Illinois represents more than 200 companies and over 11,000 engineers, architects, land surveyors and other specialists. Our primary mission is to strengthen the business environment for our member firms through government advocacy, political action, and business education. As our members rebuild and modernize Illinois' infrastructure, ACEC IL monitors the business climate to ensure work continues in a safe and business friendly environment. ACEC IL members are the most respected and sought after in the industry as both private and public sector clients have praised them for their innovation, ingenuity, effectiveness, and vision. To put it simply, ACEC Illinois members are leading the way. Because individuals and companies working together with a common interest can accomplish far more to improve an industry's business climate than any individual or company working on its own.

As we celebrate our industry and our exceptional engineers and engineering projects, it is my honor to recognize this year's most outstanding engineering achievements.

Thank you all for rising to the challenge.

A handwritten signature in black ink, appearing to read "Kevin Artl".

Kevin Artl
ACEC Illinois President & CEO

Steve Donahue
Horner & Shifrin President
ACEC ILLINOIS BOARD CHAIR

As we enter the third year of the COVID-19 pandemic, the engineering industry continued with unwavering determination and perseverance. Through continued support of projects funded through Rebuild Illinois, Move Illinois, the INVEST in America Act, private funding, or other sources, engineers embraced the challenge and were on the front line in getting America moving again.

The Engineering Excellence Awards is a time to celebrate the projects, firms, and owners who have excelled in challenging and uncertain times. The projects featured in this year's awards highlight how engineers improve quality of life, whether it is through greater mobility, safety, access to clean water and air, healthcare, or economic development.

While the pandemic brought us challenges, engineers rose to the challenge and continued our work. We adapted to changes in our workplace, our client's workplace, and modernized our workflow. The engineering industry is alive and even stronger than before. This may be the first time in which some of the projects celebrated this year were conceived, designed, and constructed entirely during a global pandemic. This is a success in and of itself.

Great projects cannot happen without outstanding clients. For the clients of these award-winning projects, we thank you for taking the time to celebrate with us and for your partnership in bringing these innovative projects to life.

On behalf of the ACEC Illinois Board of Directors, I would like to congratulate all firms, clients, and their employees receiving a 2022 Engineering Excellence Award.

Congratulations!
Steven R. Donahue
Board Chair, ACEC Illinois

The Engineering Excellence Awards recognize the year's most outstanding engineering achievements. ACEC Illinois uses the Engineering Excellence Awards Program to celebrate the amazing work provided to member clients, recognize the accomplishments of our emerging professionals, applaud the contributions made to the engineering profession, and highlight the impact made to society.

Lincoln's Grand Conceptor :

ATC Enhancements and Pedestrian Bridge over the Fox River

City of Aurora

EXECUTIVE SUMMARY

The improvements to the Aurora Transportation Center (ATC) and construction of a new pedestrian bridge across the Fox River were not just a local project for the City of Aurora but an improvement to the quality of life for the Northeast Illinois region. The upgrades included within this project were designed to improve mobility and access for mass transit and be a catalyst for future economic growth within the City of Aurora.

This project was a vision of the late Mayor, Thomas Weisner, as he imagined a new era of development within the downtown area. The first step was to construct the River Edge park pavilion to provide a place where social and artistic events could be expressed and enjoyed. Due to the overwhelming success of River Edge park and the immediate access to Metra and PACE Bus service at the ATC, it was imperative that improvements were made to increase mobility and allow for additional growth. These improvements made Mayor Weisner's dream of a renewed downtown a reality.

Improvements to the ATC and the construction of the new Pedestrian Bridge came with several weather-related challenges. There were substantial delays due to elevated river levels, which made the bridge inaccessible. The overall impact of these delays was ultimately minimized due to the COVID-19 pandemic in 2020 when several concerts were canceled at River Edge Park, and METRA ridership at the ATC fell significantly.

The most unique element of this project was the superstructure itself. The new bridge design incorporated a single hollow-box girder with multiple horizontal curves. Construction of this non-typical structure proved to be a challenge when it came to staging and sequencing of the deck pours. Additionally, installing the extensive lighting systems posed challenges in incorporating conduits and lighting elements within the deck and girder construction.

This project utilized sustainable solutions by implementing improvements that will provide long-term environmentally friendly options to the City. The charging stations at the ATC center offer the needed infrastructure for ever-growing hybrid and electric vehicle usage. Materials used during construction were repurposed and used as bank protection along the Fox River to minimize and eliminate erosion during flood events.

Mayor Weisner's vision was seen through to completion by Mayor Irvin, creating improvements that will be enjoyed for generations to come. As the next generation recognizes the benefits of these improvements, they can gaze upon the illuminated pedestrian bridge and know that they are in the City of Lights.

FLEET SERVICES MADE SIMPLE.

Benefit from 80+ years of experience and the infrastructure of one of the world's largest fleet operators. With Enterprise Fleet Management, you can focus on your operation, while your local hands-on account management team offers fleet strategies to save you time and money.

How it works:

DISPOSAL

- More than 700 dedicated remarketing professionals.
- Our team manages the entire process to get the best resale price.

FUEL PROGRAMS

- Accepted at over 80% of US' retail fuel locations
- Helps you track and enforce your policies

MAINTENANCE PROGRAMS

- ASE certified technicians
- Negotiated rates and pricing for parts and labor
- Flexibility to use your facilities
- Network of 65,000+ providers

ACQUISITION

- Access to all major manufacturers
- Factory order for the lowest possible cost
- Expertise to identify vehicles with the lowest cost per mile expense

FUNDING / CREDIT LINES

- Financing available directly through Enterprise
- Flexible options that consider vehicle use and resale market

TELEMATICS

- Alerts for regular maintenance
- Improved efficiency, that can help reduce overtime
- Helps ensure driver safety

Congratulations to all of the 2022 ACEC Award Winners!

Our team commends the innovation and creativity of the award winners to advance engineering excellence.

Illinois Governor
J. B. Pritzker

Lieutenant Governor
Juliana Stratton

Illinois inaugurated Governor JB Pritzker and Lieutenant Governor Juliana Stratton on January 14, 2019. They are, together, leading Illinois as we enter our 202nd year.

Governor JB Pritzker was sworn in as the 43rd governor of the state of Illinois.

Lieutenant Governor Juliana Stratton serves Illinois as the state's 48th Lieutenant Governor.

UNITED STATES SENATE

SPAAN Tech, Inc., a certified MBE/WBE Chicago based Professional Design Engineering firm which also practices Architecture, Construction Management, Facility Management, and LEED Consulting.

**IDOT: U.S. 41 (Skokie Highway) IL 120 to Park Ave. West
Merit Award in Transportation**

In our award-winning project, SPAAN Tech provided Phase III Engineering Services required for construction inspection for this major highway Surface Preservation and Maintenance improvement. The project consisted of full depth hot-mix asphalt patching, hot-mix asphalt surface removal, hot-mix asphalt resurfacing with level binder & stone matrix asphalt surface course, replacement of traffic signal detector loops, placement of thermoplastic pavement markings, placement of raised reflective pavement markers and traffic control & protection. Scope of work was limited under the Pavement Preservation Program (3P).

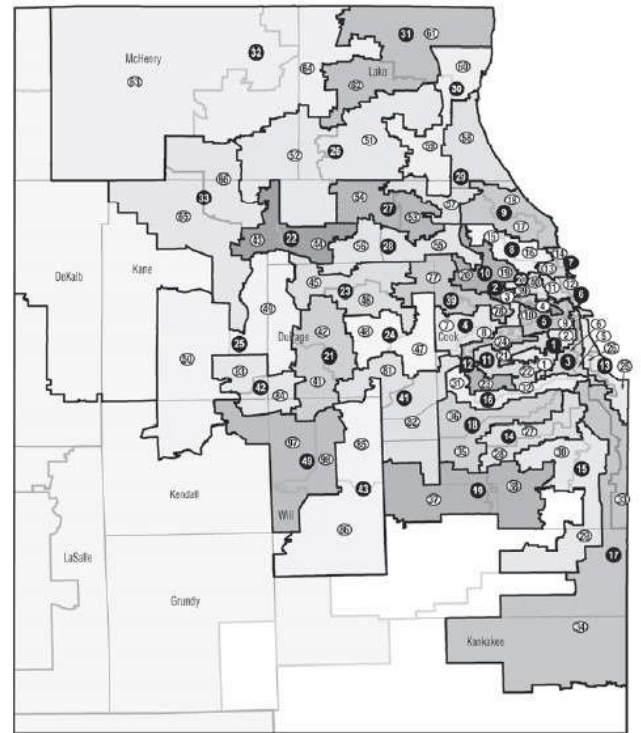

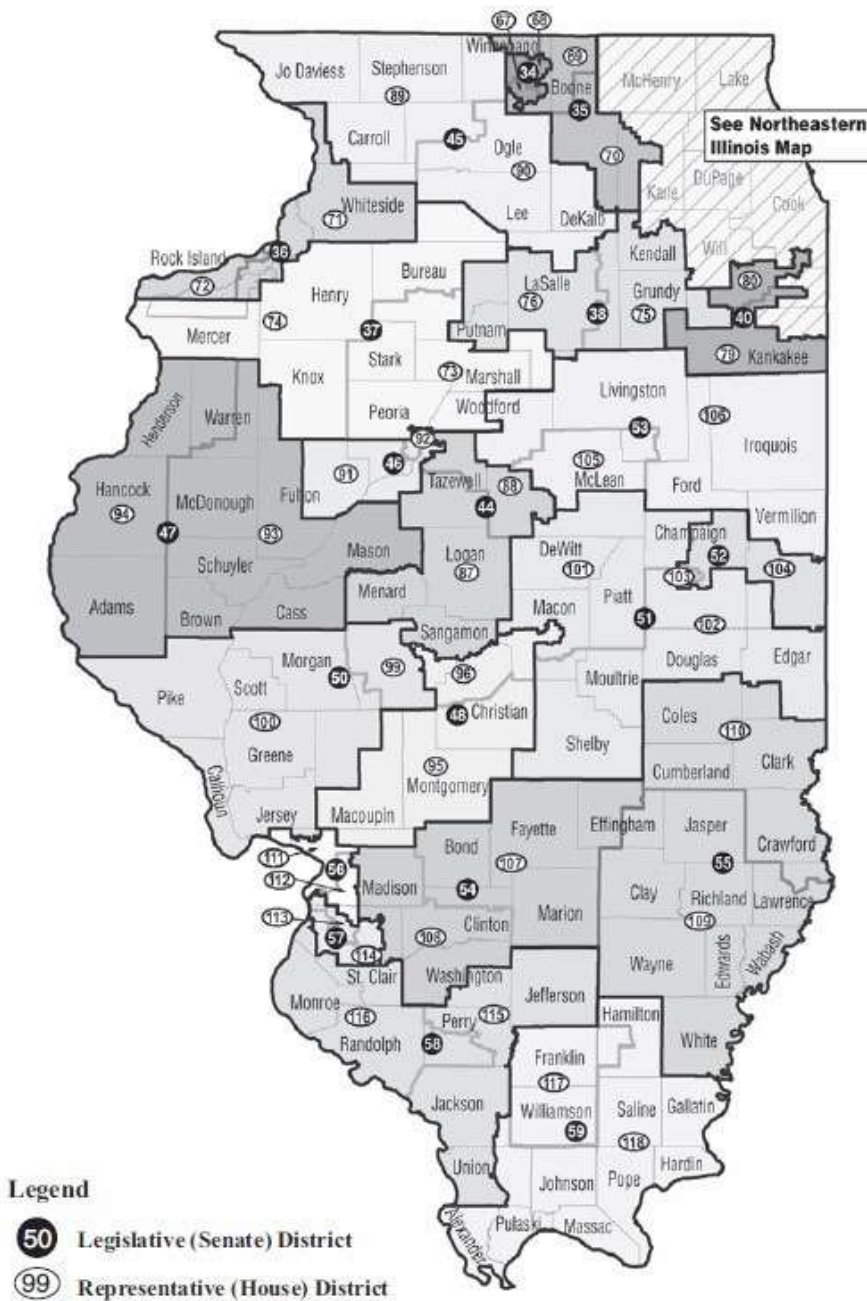

We were thrilled to have the partnership of Interra, Inc., Sanchez and Associates, HNTB Engineers, CKL Engineers, and 4HD.

ACEC-IL Emerging Professionals Committee: First Annual Professional Clothing Drive

The ACEC Illinois Emerging Professionals Committees gathered a subcommittee to head a professional clothing drive. The committee quickly decided to make it a competition between ACEC Illinois, ASCE, ITE and WTS. Clothing was collected across the state for weeks and finally a grand distribution to the Salvation Army in Chicago was planned on January 27.

Kevin Spitz, ACEC IL Emerging Professional Committee Chair, presented ASCE with the winning trophy at the Salvation Army collection trailer. Thank you to all who contributed hundreds of clothing items and congratulations to ASCE.

A PROUD SUPPORTER OF ACEC ILLINOIS

We build the crucial infrastructures that millions of people depend on every day. We go above and beyond to meet the needs of our clients and keep the Chicago area moving because we know what movement means to you.

Movement means travel and commerce.
Movement means community and growth.
Movement means life.

At OMEGA, we build what keeps you moving.
