STV's Tiffany Preddy Named 2025 Young Professional of the Year

MORRISVILLE, NC – May 20, 2024

Tiffany Preddy, PE, is being honored with the American Council of Engineering Companies of NC (ACEC/NC) Young Professional of the Year award in recognition of her achievements and professionalism in support of the engineering industry in North Carolina. By way of this honor, she is also nominated as one of two representatives from North Carolina for the National Young Professional in Engineering honor awarded by the American Council of Engineering Companies in Washington, DC.

"Working at the intersection of civil engineering and water resources, Tiffany leads STV's drainage designs for transportation programs across North Carolina," says Claire Brinkley, VP of Transportation South/Central at STV. "Early on at STV, Tiffany stepped up to assist our team through a leadership transition because she believed in their work and wanted to see this team grow exponentially," continues Brinkley. Tiffany is also dedicated to the conservation of North Carolina's waterfowl, participating in Ducks Unlimited, where she turns her passion for painting into fundraising for the organization.

"Her colleagues here at STV are proud of this well-deserved recognition and honored to have Tiffany working alongside them," shared Brinkley. "Recognizing superior young talent and witnessing their passion develop into successful projects and effective teamwork inspires us all," commented Iona Thomas, 2025 President of ACEC/NC.

About the American Council of Engineering Companies of NC

The American Council of Engineering Companies of North Carolina (ACEC/NC) is the sole organization in North Carolina that represents the business interests of the engineering industry in our state. ACEC/NC also provides legislative advocacy for member companies and strives to build relationships between the private and public sectors of the engineering industry. ACEC/NC was founded in 1969. Today, member firms employ more than 11,000 engineers, architects, land surveyors, scientists, and other specialists who are responsible for many millions of private and public projects annually. Member firms range in size from a single registered professional engineer to corporations employing thousands of professionals.
