

AMERICAN COUNCIL OF ENGINEERING COMPANIES
of Pennsylvania

ACEC/PA SUPPORTS HOUSE BILL 1364, PN 1912

The American Council of Engineering Companies of Pennsylvania (ACEC/PA), which represents more than 110 engineering firms across Pennsylvania and more than 11,700 employee members, serves as the voice of the engineering industry in Pennsylvania. From roads and bridges to dams and rivers, ACEC/PA member firms design, plan, and inspect every aspect of the Commonwealth's infrastructure, supporting billions in economic development every year and creating thousands of jobs.

ACEC/PA supports House Bill 1364 because:

- **the bill provides a much-needed investment in Pennsylvania's transportation network.** HB 1364 addresses a variety of transportation funding needs, from transit funding in our most congested areas to failing roads and bridges that serve as a critical link between our homes and destinations. Pennsylvania's aging populations, children, food delivery, and employees of thousands of businesses depend on these transportation networks and without adequate funding, delays, closures, and service lines could be critically impacted.
- **the bill addresses every corner of the Commonwealth with investment.** While HB 1364 will address significant, identified needs for Pennsylvania's 67-county transit network, it also provides relief for aging roads and bridges. These vital arteries serve our communities and allow goods and services to travel efficiently throughout the state. Without their continued operation, everyday activities in areas where we live, work, and play will be affected. If these systems continue to weaken and fail, the effect will multiply, jeopardizing future commitments like next year's MLB All-Star game and FIFA World Cup matches.

On behalf of our 110 member firms and their nearly 12,000 employees, ACEC/PA requests your support of House Bill 1364, PN 1912. If you should have any questions about our support, please contact Executive Director Brent Sailhamer at bsailhamer@acecpa.org or (717) 386-9941.
