FROM: Christine A. Spangler, P.E., Director, Bureau of Design and Delivery

ATTACHED MATERIAL IS SUBMITTED FOR YOUR REVIEW AND COMMENTS. UNLESS ADVISED OTHERWISE, WE WILL CONSIDER MATERIAL APPROVED IF NOT RETURNED BY DATE DUE.

TITLE: Publication 2 - Project Office Manual (POM), Section B.6.5;
Publication 19 - Field and Laboratory Testing Manual, PTMs 604, 611, 631, and 640;
Publication 408 - Highway Construction Specifications, Sections 110, 506, 704, 714, 1006, and 1107

REMARKS:
Revising Pub 19, PTM 604, PTM 611, PTM 631, and PTM 640 and POM section B.06.05 to allow the use of 4-inch by 8-inch concrete cylinder specimens for compressive strength testing.

Also revising Pub 408 Sections 110.10, 506, 704, 714, 1006, and 1107.
Adding the use of 4-inch by 8-inch concrete cylinder specimens for compressive strength testing.

Changes between Step 1 and Step 2 (revising POM & Pub 408 Sections) were necessary because of comments received during Step 1. There were multiple instances of “2” cylinders being referenced which only applies if the cylinder sizes are 6-inch by 12-inch. If 4-inch by 8-inch cylinders are used, the “set” needs to be increased to “3”.

Note: Only comments provided using MS Excel file titled "C-26-003 Step 2 Comment Form" will be accepted. Please download the spreadsheet, populate it with your comments, save it with a new filename, and return to the Specifications Review Unit at PD, Clearance Transmittals.
