

What is the Quality Improvement website?

The objective of the e-learning training website is to provide a central location for design and construction topics that will improve the overall quality of future PTC projects. Categories include roadway, maintenance and protection of traffic, structures and/or geotechnical, drainage and/or environmental, and other.

The website is intended to be a dynamic tool and new topics will continually be added to the site as they are developed. As new topics are added, registered users will be notified by email. Topics include lessons learned on past projects and highlight design and construction successes that are beneficial to future projects.

STRUCTURES AND/OR GEOTECHNICAL

Support of Excavation – Typical Shoring Types
