

FACT SHEET

INVEST IN OUR FUTURE DELIVER A ROBUST INFRASTRUCTURE BUDGET

BACKGROUND

Infrastructure spending is the backbone of our state's economy.

The challenges that have plagued our infrastructure for decades still exist - aging structures, declining income sources and rising costs. Current funding does not maintain our vital state buildings or vital transportation network. These long-time issues are becoming more pressing.

FACTS

Legislative action is critical to address shortfalls.

- Transportation is changing. More electric and fuel-efficient vehicles threaten existing funding sources.
- Many state buildings are seriously behind schedule for repairs and upgrades, threatening our ability to attract and retain talent.
- Federal infrastructure dollars are being sent to states for transportation, water and energy investments but our state building program will not receive any support.

SOLUTIONS

Invest in Wisconsin's infrastructure.

- Utilize both the state's surplus and the next budget to continue to address the backlog of state building maintenance.
- Find a long-term transportation funding solution that does not rely on outdated mechanisms or continuous bonding. The time is now for Wisconsin to figure out what comes after the gas tax.

AMERICAN COUNCIL OF ENGINEERING COMPANIES OF WISCONSIN

ACEC Wisconsin members develop innovative solutions that increase our state's economic growth and improve communities.
