

# PROTECT OUR FUTURE INVEST IN INFRASTRUCTURE

**Transportation infrastructure is the backbone of our state's economy.**

Transportation infrastructure is essential to Wisconsin's economy, connecting communities and industries while supporting agriculture, manufacturing and tourism. Modernizing airports, roads, railways and ports enhances safety, efficiency and economic growth, ensuring the state remains competitive.

## FACTS

**Legislative action is critical to address shortfalls.**

- Wisconsin's transportation user fees are fixed and flat per gallon or vehicle.
- Wisconsin's transportation fund isn't equipped to deal with inflation, especially the historically high construction inflation we've seen in recent years.
- Electric vehicles and more efficient gas vehicles will continue to put pressure on Wisconsin's gas tax.
- Is it a bargain to own and drive in Wisconsin or are we falling behind?

## SOLUTION

**State action is vital.**

- Adequate and equitable funding is a perennial issue. We must find a sustainable funding solution that keeps Wisconsin moving.

## CONTACT US

ACEC Wisconsin and our professional engineering member firms are your resource for smart, sustainable infrastructure solutions. Let's work together together for a stronger, safer Wisconsin.
