

PROTECT OUR FUTURE INVEST IN INFRASTRUCTURE

Transportation infrastructure is the backbone of our state's economy.

Wisconsin's transportation system is far more than roads and bridges, it's the backbone that connects our communities, powers our economy, and touches every part of our daily lives. Yet the funding needed to keep this lifeline strong is running on empty. One-time fixes and short-term patches are no longer enough.

FACTS

Legislative action is critical to address shortfalls.

- Wisconsin's transportation user fees are fixed and flat per gallon or vehicle.
- Electric vehicles and more efficient gas vehicles will continue to put pressure on Wisconsin's gas tax.
- Is it a bargain to own and drive in Wisconsin or are we falling behind?

SOLUTION

State action is vital.

- Short-term patches are not a strategy. Wisconsin needs a durable, sustainable funding model that allows us to plan, build, and maintain a transportation system worthy of the state's future.

CONTACT US

ACEC Wisconsin and our professional engineering member firms are your resource for smart, sustainable infrastructure solutions.

Let's work together together for a stronger, safer Wisconsin.
