

PROTECT OUR FUTURE INVEST IN INFRASTRUCTURE

State-owned buildings are getting older and more costly to maintain.

Wisconsin's vertical infrastructure is where its citizens work, live, and thrive. Whether it's a university residence hall, corrections facility, or state park facilities, the state manages a wide array of structures. These buildings are aging rapidly, wasting energy, and diminishing productivity. Recent investments have helped considerably and we thank legislators for their efforts.

FACTS

Investment is vital to keep Wisconsin competitive.

- Aging structures scare away top talent and limit overall capacity. Retaining top talent in the state keeps Wisconsin's economy growing.
- Planning and funding take place over multiple budget cycles so long-term support is essential.
- Previous state investment has gone a long way towards meeting structure needs but more can be done.

SOLUTIONS

Thank you for delivering a robust Capital Budget

- These funds will go directly to supporting critical infrastructure.
- Structures will continue to age and new demand will have to be met - consider substantially funding the 2027-29 Capital Budget next year.

CONTACT US

ACEC Wisconsin and our professional engineering member firms are your resource for smart, sustainable infrastructure solutions.

Let's work together together for a stronger, safer Wisconsin.
