Aerospace and Defense Industry Workforce Shortfall

Problem:

Workforce pressures are particularly acute within the skilled technical workforce— experiencing widening gaps between workforce supply and demand, especially in areas like digital manufacturing, cybersecurity support, and systems maintenance (National Science Board [NSB], 2022).

Projected Aerospace and Defense Talent Gap

1,000,000 additional workers needed by 2030

2025

Aerospace Workforce Challenges: Aging Workforce, Rapid Technological Advancements

2030
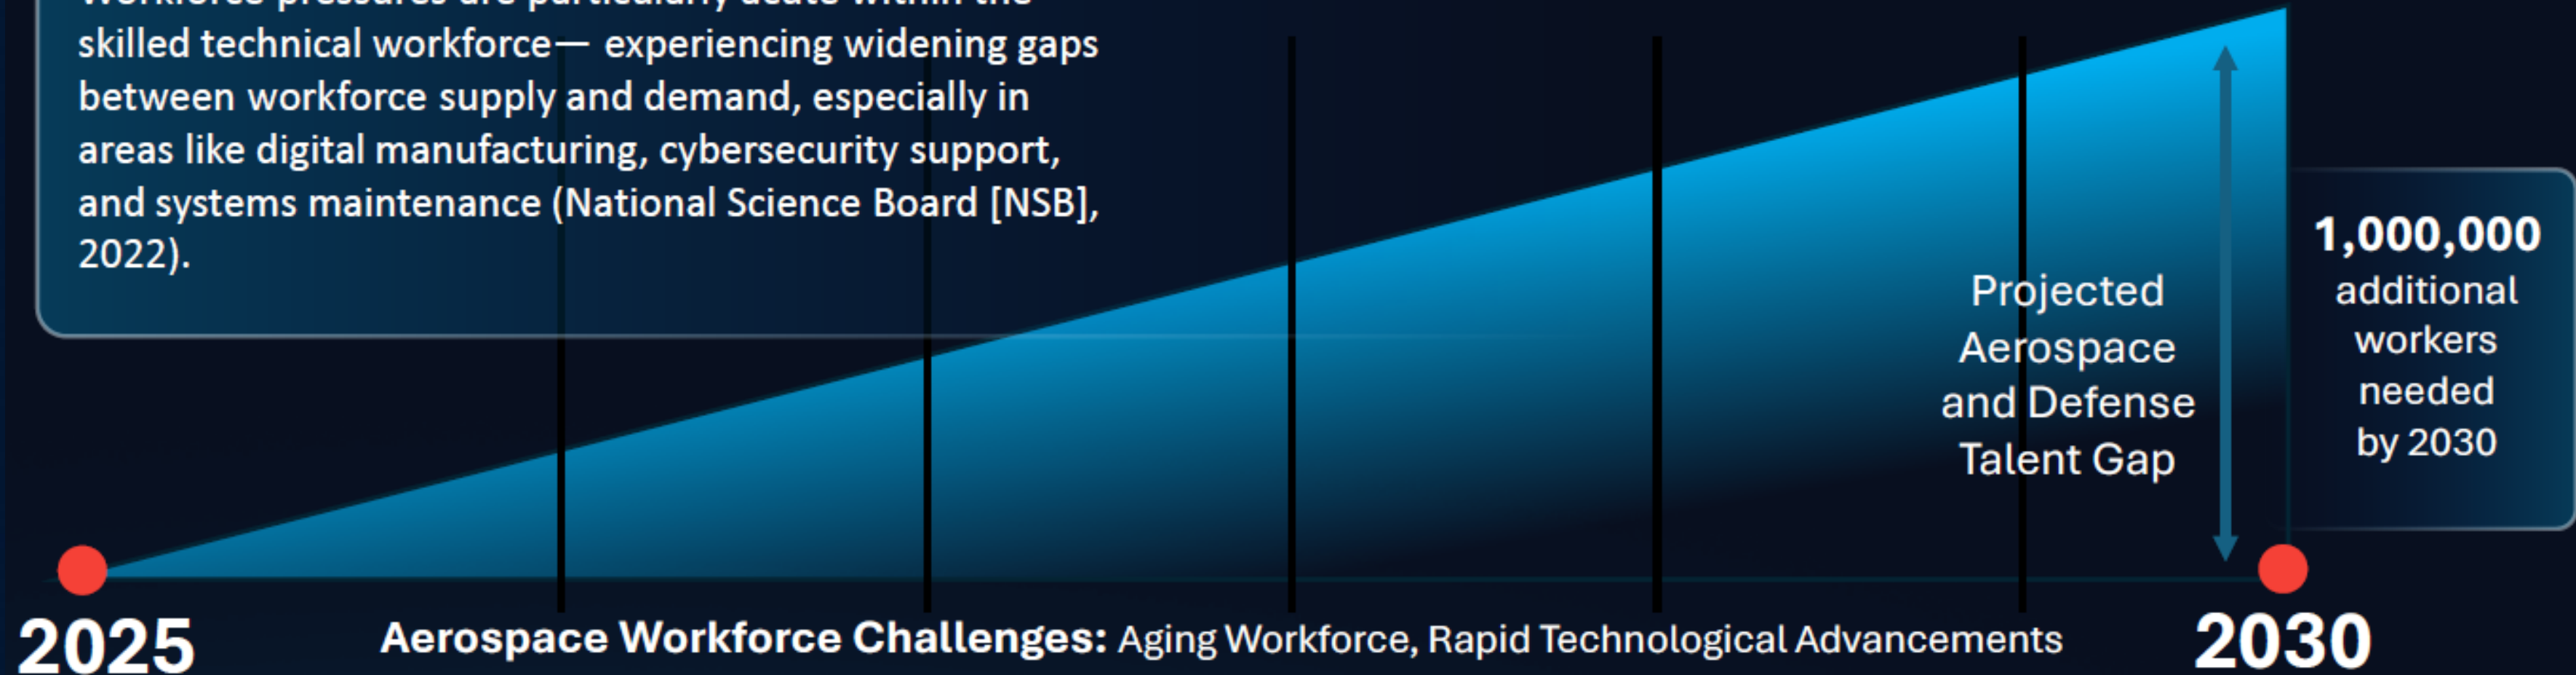

Solution:

Addressing this gap between supply and demand for technical talent requires **coordinated expansion** of training pathways that align educational outcomes with the key skills essential to maintaining America's aerospace and defense capabilities.

NASA Aerospace Skilled Technical Workforce Hubs

Goal:

To increase and accelerate the number of students entering the aerospace industry's **skilled technical workforce** that will enable and advance NASA's critical missions.

NASA will:

- Strengthen collaboration between **industry, education, and economic development** stakeholders to create clear career pathways.

- Equip **high school, trade school and community college students** to earn industry-recognized credentials and gain relevant work-based experiences.

Karin,

This is the link for the candidates. The link is live. You can share it with those your organization can refer to the program. The posting is an Invite only with the link. This link SHOULD NOT be searchable, but our new Eightfold system has the ability for people to apply to CLOSED/Filled job requisitions still.

- We are expected to staff to 104 Total by Dec 2025 in the Electrical Harness/Cable specialty
- We can guarantee interviews if they meet the BQs, but not offers.
