

# Introduction to Maryland Benchmarking for Montgomery County Properties

February 7, 2025

A low-angle, upward-looking perspective of several modern skyscrapers. The buildings are rendered in a dark, monochromatic style with a prominent red overlay that covers the entire image. The perspective creates a sense of height and scale, with the buildings converging towards the top of the frame.

**How familiar are you with Maryland's  
benchmarking requirements?**

# Meet Our Speakers

**Chris Pendley**  
*Director of Sustainability  
Policy & Strategy*  
**AOBA**

**Emily Curley**  
*Building Energy Performance  
Programs Manager*  
**Montgomery County Department of  
Environmental Protection**

**Samuel Furio**  
*Outreach Coordinator*  
*Building Decarbonization Team*  
**Maryland Department of the  
Environment**

# Agenda

- Scene-Setting
- Benchmarking Discussions
- Q&A

Montgomery County

Maryland

Both Programs Signifier

# How many buildings could benchmarking apply to?

## Montgomery County

Covered MF	Covered MF GFA
About 500	107 million
Covered Offices	Covered Office GFA
About 400	55 million

## Maryland

Covered MF	Covered MF GFA
About 450	76 million
Covered Offices	Covered Office GFA
About 450	61 million

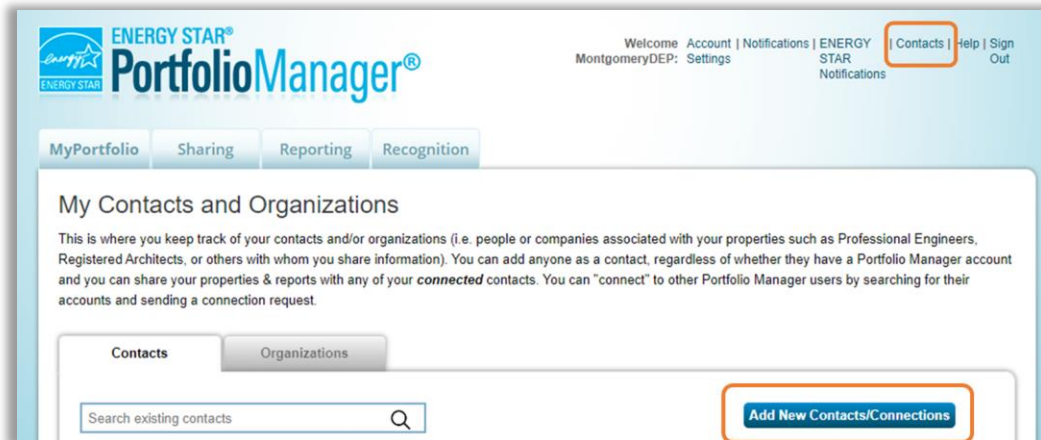

A low-angle, upward-looking perspective of several modern skyscrapers. The buildings are covered in a semi-transparent red overlay, creating a monochromatic effect. The perspective makes the buildings appear to converge towards the top of the frame. The central text is white and stands out against the red background.

# Program Alignment

# Sharing Your Building(s) in ENERGY STAR Portfolio Manager

## Both Programs

- You can connect and share your building in ENERGY STAR Portfolio Manager with both Montgomery County (**MontgomeryDEP**) and MDE (**MD-BEPS**).

Montgomery County Department of Environmental Protection

To select multiple contacts, hold down your Control (CTRL) key and click on each selection. Only your [connected contacts](#) appear in this list.

### Choose Permissions

If you only need to choose one permission (because you are doing a single share or you want to give the same permissions for all of your shares), select "Bulk Sharing." If you need to assign different permissions, select the 2nd option.

- ☐ Bulk Sharing ("One-Size-Fits-All") - I only need to choose one permission (either because I am doing a single share OR I want to choose the same permission for all of my share requests).
- ☒ Personalized Sharing & Exchange Data ("Custom Orders") - I need to give different permissions for different share requests, and/or I need to give [Exchange Data](#) permission.

**Takeaway: You can share a building with *both* Montgomery County and MDE.**

# Entering the Building's Unique IDs into ENERGY STAR Portfolio Manager

## Montgomery County

- The [Covered Buildings Inventory](#) lists each building's unique Montgomery County Building ID (MBID)

Standard IDs

Standard IDs are typically used in data collection, including by most state and local governments with benchmarking laws. If your property is covered by a benchmarking law, you probably need to fill this in. See [this FAQ](#) if you need help finding your Standard ID.

Standard ID - City/Town:

Standard ID - County/District:

Standard ID - State/Province:

Standard ID - Other:

+ Add Another

## Maryland

- The [BEPS Portal](#) lists each building's Unique Building Identifier (UBID)

Standard IDs

Standard IDs are typically used in data collection, including by most state and local governments with benchmarking laws. If your property is covered by a benchmarking law, you probably need to fill this in. See [this FAQ](#) if you need help finding your Standard ID.

Standard ID - City/Town:

Standard ID - County/District:

Standard ID - State/Province:

Standard ID - Other:

+ Add Another

**Takeaway:** Your existing Portfolio Manager building profile can be tagged with both the County and State's unique ID

# Alignment in Benchmarking: Requesting Aggregated Data

## Both Programs

- You will need whole-building energy data from all energy meters supplying the building to benchmark properly in Portfolio Manager. This includes both common area and tenant meters.
- Many Montgomery County building owners have already requested aggregated data and synced the utility data feed with Portfolio Manager.
- If the aggregated data already covers the whole building, you are done.

# Alignment in Benchmarking: Renewable Energy

## Both Programs

Utility electricity bills do *not* contain all the information necessary to benchmark your onsite renewable energy use. You will need at least two electricity meters: One or more meters to track the total amount of electricity purchased from the grid; and one meter to track renewable electricity generated onsite. Enter:

- **Grid delivered electricity**
- **Renewable energy generated on-site**
  - **Renewable Energy Used On Site**
  - **Renewable Energy Exported Offsite**

## Montgomery County

- Montgomery County provides a “renewable energy allowance” for onsite renewable energy generation as a credit towards the final performance standard.

## Maryland

- No application for renewable energy use in statewide BEPS as it doesn't reduce on-site direct emissions

**Takeaway: Reporting renewable energy is the same for both programs.**

# Alignment in Benchmarking: Parking, EV Chargers, and Pools

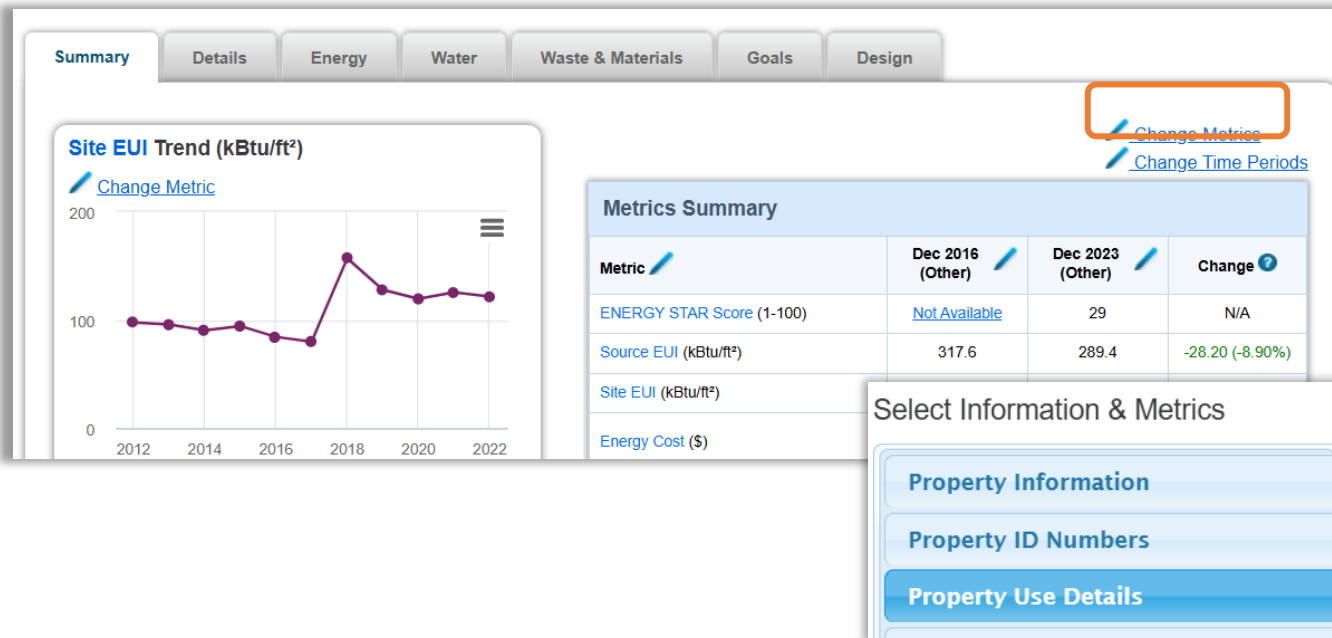

## Both Programs

- **Rule of thumb:**
  - **Separately Metered:** If these uses are on a separate meter, they should be excluded from your benchmarking report.
  - **Submetered:** If these uses are submetered, they can be subtracted from your benchmarking report (see EPA's guidance [Can I add a negative meter to subtract parking/cell towers/EV charging stations/etc?](#)). In these cases, do not report the parking GFA or enter information about EV chargers or pools in the building, since you are not reporting energy use for those.
  - **On the Main Meter:** If these uses are a part of the building and the energy use is not able to be excluded from the Benchmarking Report, you will need to report more details about each of these spaces:
    - **Parking:** Enter GFA by each type of parking (Fully Enclosed, Partially Enclosed, and Open) and indicate whether or not there is supplemental heating. See EPA's [How do I enter parking?](#) help desk article for additional guidance.
    - **EV Chargers:** Enter the number and type of EV charging stations. See EPA's [How do I enter swimming pools and hot tubs?](#) help desk article for additional guidance.
    - **Heated Swimming Pools:** Enter information on the approximate pool size, location of the pool, and months in use. See EPA's [How do I benchmark my EV Charging Stations/EV Chargers?](#)

**Takeaway: Benchmarking and reporting parking, EV chargers, and heated swimming pools is the same for both programs.**

# Finding ENERGY STAR Portfolio Manager Estimated Energy Data

- Portfolio Manager calculates estimates of annual site energy use for parking, EV chargers, and pools.
- Both jurisdictions will use these Portfolio Manager estimates (if they're not already submetered or excluded) to make calculations that impact building energy performance standards.
- How to add these estimates to your Portfolio Manager Metrics Summary:

Metrics Summary			
Metric	Dec 2016 (Other)	Dec 2023 (Other)	Change
Direct GHG Emissions Intensity (kgCO2e/ft²)	2.14	0.65	-1.49 (-69.60%)
Site EUI (kBtu/ft²)	138.6	111.7	-26.90 (-19.40%)
Electric Vehicle Charging Station - Portfolio Manager-Estimated Site Energy (kBtu)	Not Available	25,989.0	N/A
Heated Swimming Pool - Portfolio Manager-Estimated Site Energy (kBtu)	Not Available	Not Available	N/A
Parking - Portfolio Manager-Estimated Site Energy (kBtu)	Not Available	Not Available	N/A

**Takeaway: Entering accurate information about these use types is critical as it impacts building energy performance standards calculations.**

# Food Service Facilities

## Maryland

***“(a) “Food service facility” means:***

- (i) A place where food or drink is prepared for sale or service on the premises or elsewhere; or*
- (ii) An operation where food is served to or provided for the public with or without charge.*

***“(b) “Food service facility” includes:***

- (i) A restaurant, coffee shop, cafeteria, short order cafe, luncheonette, tavern, sandwich stand, soda fountain, retail market, or retail bakery outlet;*
- (ii) A food operation in an industry, institution, health care facility, club, school, camp, church, catering kitchen, commissary, or a similar place in which food or drink is prepared for sale or for service on the premises or elsewhere; and*
- (iii) A micro market licensed under Business Regulation Article, Title 17, Subtitle 17, Annotated Code of Maryland, and meeting the requirements of this chapter as a food service facility.*

- Energy use associated with food service facilities can be excluded from your state report
- Guidance on exclusion can be found in the benchmarking guide

**Takeaway: You can use custom fields to report commercial cooking area / emissions that are not separately metered without having to create a new building in ENERGY STAR Portfolio Manager.**

# Unique to State Law: Combustion Equipment Required by Law

## Maryland

- Emissions from combustion equipment/generators can be excluded if a federal or State regulation requires it to run on combustible fuels.
- If the state or federal regulation is amended to allow for battery storage/and/or other types of systems that do not produce direct emissions, then these emissions will need to be included.

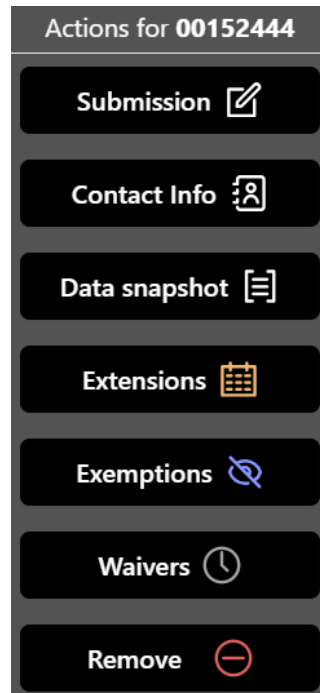

**Takeaway: You'll need to submit a form to have these related emissions approved to be exempted from your building(s) profile**

# Submitting Your Benchmarking Report

## Montgomery County

- After entering data into ENERGY STAR Portfolio Manager, Montgomery County requires building owners to submit the via the [Montgomery County Building Energy Benchmarking Reporting Portal](#).
- This Portal is where building owners / consultants can:
  - Claim buildings
  - Submit waiver / exemption / extension requests
  - Submit annual benchmarking submissions
  - Update contact information
  - View reporting status
  - View snapshot of reported data
- **Submission deadline is June 1 each year**

## Maryland

- MDE will automatically pull data from buildings that have connected and shared with MDE in Portfolio Manager on the reporting deadline.
- Submission deadline is Sept 1, 2025 and then June 1 in subsequent years.

**Takeaway: There is a final step to reporting data to Montgomery County.**

A low-angle, upward-looking perspective of several modern skyscrapers. The buildings are covered in a semi-transparent red overlay, creating a monochromatic effect. The perspective makes the buildings appear to converge towards the top of the frame, emphasizing their height and architectural details like window grids and structural beams.

# Data Verification

# Data Verification: Overview

## Montgomery County

- Required by law
- Roughly two dozen accepted verification credentials, including all credentials accepted by MDE.
- Third party verification not required. Verifier can be the same as the benchmarker or within the same company as the benchmarker.
- Alternatively, ENERGY STAR Certification for at least 6 months of the calendar year being benchmarked.
  - ENERGY STAR Certification requires verification by a licensed PE or Registered Architect (RA)

## Maryland

- Required by regulation
- Building owners must have data verified by a third party.
- If you are using a third party to benchmark your building(s), this party can also be the third party verifier. If you are using internal staff to benchmark, they cannot act as a third party verifier.
- Accepted credentials:
  - Professional Engineer (PE)
  - Licensed Architect
  - Certified Energy Manager (CEM)
  - Building Energy Assessment Professional (BEAP)

**Takeaway: Following State requirements for third party verifications and credentials will also meet County requirements.**

# Data Verification: Timing

## Montgomery County

- Montgomery County requires [data verification](#) the first year that a building benchmarks and every 3 years thereafter.
- Building owners will be alerted if building is due for verification via the [Benchmarking Reporting Portal](#).

## Maryland

- Building owners must have data verified by a third party every five years.

Calendar Year Data Being Verified	Verification deadline MDE
2025	June 1, 2026
2030	June 1, 2031
2035	June 1, 2036
2040	June 1, 2041
Every 5 years following this pattern	

CY:	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033
Group 1		X			X	X			X		X			X
Group 2	X			X		X			X		X			X
Group 3 & 4			X			X			X		X			X
Group 5				X		X			X		X			X

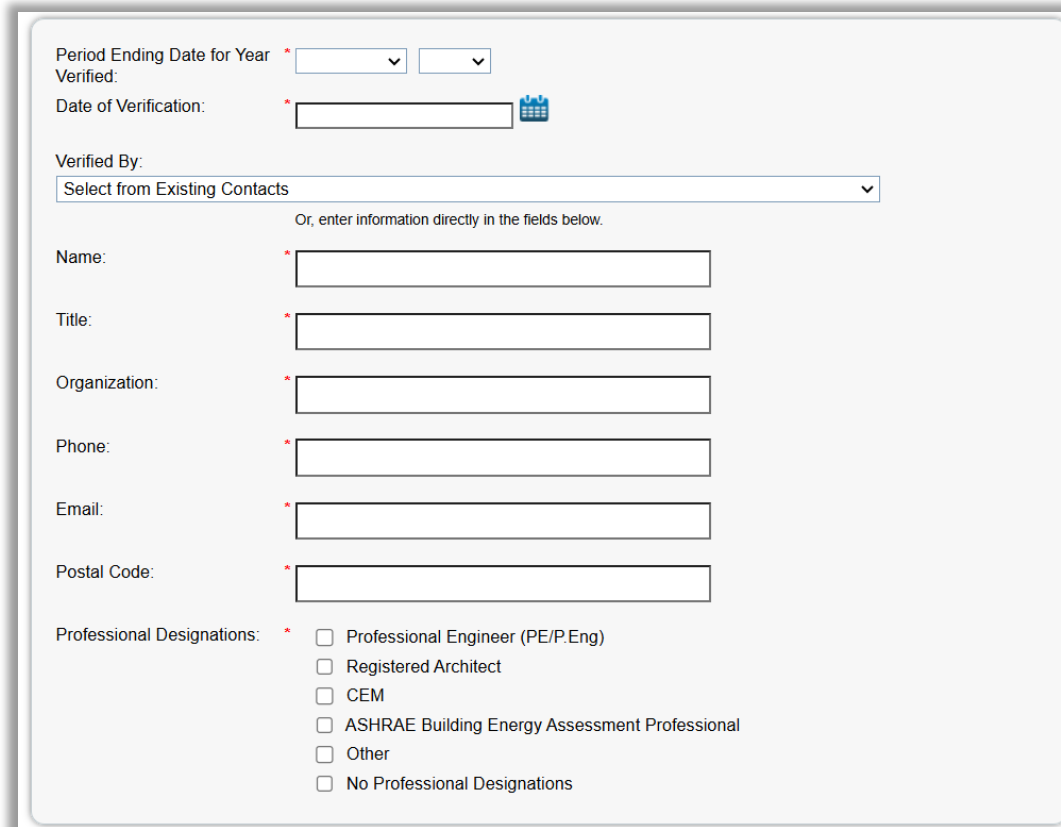

**Takeaway: Verifying for State compliance resets the County's 3-year verification requirement.**

# Data Verification: Reporting in ENERGY STAR Portfolio Manager

## Both Programs

- Once verification is completed, verification information must be entered in the Verification fields on the Details tab in Portfolio Manager.

The screenshot displays the verification form in the ENERGY STAR Portfolio Manager interface. The form is organized into several sections:

- Period Ending Date for Year Verified:** Two dropdown menus for selecting the year.
- Date of Verification:** A text input field followed by a calendar icon.
- Verified By:** A dropdown menu with the option "Select from Existing Contacts".
- Or, enter information directly in the fields below:** A heading for the manual entry section.
- Manual Entry Fields:** Six text input fields for Name, Title, Organization, Phone, Email, and Postal Code, each marked with a red asterisk.
- Professional Designations:** A section with a red asterisk and a list of checkboxes:
  - ☐ Professional Engineer (PE/P.Eng)
  - ☐ Registered Architect
  - ☐ CEM
  - ☐ ASHRAE Building Energy Assessment Professional
  - ☐ Other
  - ☐ No Professional Designations

**Takeaway: The process for reporting verification information is the same for both programs.**

A low-angle, upward-looking photograph of several tall skyscrapers. The image is heavily overlaid with a semi-transparent red color, creating a monochromatic effect. The perspective makes the buildings appear to converge towards the top of the frame. The text "Maryland: Unique Building IDs" is centered in the middle of the image in a white, bold, sans-serif font.

# Maryland: Unique Building IDs

# Unique Building Identifier (UBID)

Maryland

- Every building and/or grouping of buildings gets their own unique building identifier (UBID)
- You'll need the UBID to comply with MDE's BEPS, whether that be for benchmarking and reporting, or applying for an exemption
- Can't find your building(s) and UBID(s)? You'll need to submit a form to add your building(s) to the list

The perspective makes the buildings appear to converge towards the top of the frame, emphasizing their height and architectural details like window grids and structural beams.

# Exceptions, Exemptions, and Edge Cases

# What is a Building?

## Montgomery County

- Montgomery County allows owners to omit spaces that are <25k sf, individually metered for all utilities, separate energy systems, and share no interior area (like hallways or stairwells).

## Maryland

- A single building, as defined by the building's "envelope";
- One or more buildings held in the condominium form of ownership and governed by a single board of managers; or
- Two or more buildings that are served in whole or in part by the same electric or gas meter or are served by the same heating or cooling system or systems, which is not a district energy system.

**Takeaway: Some sites reported to County may need to add meters/spaces to complete reporting per MDE's definition of a building. Others may be exempt from County reporting but need to comply with MDE's requirements.**

Campus compliance allows building owners to:

- Aggregate all buildings on the campus and meet a campus wide BEPS standard
- Decide which buildings should be upgraded to meet aggregate standard

Campuses have two options:

- Report only covered buildings on campus, including any district energy use (standard pathway)
- Report as a campus, including all buildings/energy use on the campus (campus pathway)

# Is my building covered by the law?

## Montgomery County

- County law covers most commercial and multifamily buildings **25,000** gross square feet and larger
- DEP's [Covered Building Inventory](#) lists all covered buildings.
- As of 2024, all covered buildings are required to benchmark annually.

## Maryland

- State law covers most commercial and multifamily buildings **35,000** gross square feet and larger
- MDE Covered Buildings List in the [BEPS Portal](#)
- Certain exemptions can be applied for, ranging from partial to total exemption

Takeaway: Many, but not all buildings covered by County law are also subject to State benchmarking requirements.

# Are There Any Exemptions to the Law?

## Maryland

### Total Exemption Apply Once

Designated  
Historic

Agricultural

Elementary &  
Secondary Schools

Demolished

Manufacturing

Federally  
Owned

### ACP Adjustment

Apply Annually

Reduced Alternative  
Compliance Payments  
(ACP) for  
Affordable Housing

### Total Exemption

Apply Annually

Financial Distress

Not Occupied

### Baseline Exemption

Apply Annually  
(Max 3 Times)

Low Occupancy  
< 50%

**Takeaway: Some buildings (like K-12 schools and manufacturing buildings) are subject to County law but not State law.**

# Exemption Applications

Maryland

## Currently Available

- 📋 BEPS Benchmarking + Performance Standard Exemption Request: Historic Building
- 📋 BEPS Benchmarking + Performance Standard Exemption Request: School Building
- 📋 BEPS Benchmarking + Performance Standard Exemption Request: Manufacturing Building
- 📋 BEPS Benchmarking + Performance Standard Exemption Request: Agricultural Building
- 📋 BEPS Benchmarking + Performance Standard Exemption Request: Federal Building
- 📋 BEPS Benchmarking + Performance Standard: Exemption Request: Under 35,000 ft2
- 📋 BEPS Benchmarking + Performance Standard Exemption Request: Demolished Building
- 📋 BEPS Benchmarking: Request for a Unique Building Identifier (UBID)

## Coming Soon!

- Unoccupied
- Combustion Equipment
- Food Service Facility
- Baseline Establishment Delay
- Campus Compliance Pathway
- Campus building not owned by principal owner
- District Energy Systems

## Special Notes

- Have a parking garage or other non covered building(s)? **Submit "Under 35,000 ft2"**
- Square footage or property type incorrect or listed as unknown in portal? No need to request for a change, MDE will adjust based on ESPM submissions.

# Tools and Resources

## Montgomery County

- [Benchmarking website](#) provides information and resources on benchmarking and reporting.
- DEP staff can be reached at [Energy@MontgomeryCountyMD.gov](mailto:Energy@MontgomeryCountyMD.gov) with questions or to set up a virtual help session.
- Montgomery County building owners may be eligible for support via the Montgomery County Green Bank's [Technical Assistance Program](#) for benchmarking, data verification, gross floor area measurements as well as energy efficiency and electrification feasibility assessments.
- After reporting, the [Montgomery County Building Energy Performance Map](#) is an interactive and user-friendly tool to investigate compliance status and energy performance data for each covered building.
