WHY YOU SHOULD ATTEND

Thought Leader Global and The Association of Strategic Alliance Professionals are proud to co-organise our 12th European Alliance Summit. Whether you have a mature corporate alliance and partnership strategy, are looking to benchmark with others in this space (to continually improve your framework and ecosystem), or are at an earlier stage of entering into new alliances and partnerships, this event provides an ideal community for you.

Setting up an alliance management function is an important first step. One must lay the groundwork for the long-term success of both alliances and joint ventures. Often businesses that may have competed in the past must be brought together, and this requires building trust and bridging cultural barriers. Both the research and development side as well as the sales / go-to-market side need to have best-practice in place for the partnership to succeed. Often the most lucrative alliances are in new markets and in emerging market countries. There are significant cultural, HR, legal and operational risks to manage in these partnerships.

Leadership and governance are important focus areas to cover. There is a significant transition period in the creation of an alliance, and a strong transition plan must be put into place. Both innovation and sales results are the key goals of new partnerships. However, companies must encourage a joined workforce to bring about the performance. Trust and cooperation must be embedded to demonstrate this joined workforce. Performance and governance must be adequately implemented and monitored, so that goals are met and value is created. Attend this forum to benchmark how other organisations are managing their alliance strategies; hear their perspectives - both success stories and lessons learned. Utilise this event to learn from their experiences, compare solutions and take away actual strategies that you can use to drive transformation in your group.
