Privacy Academy

CPD MEMBER
The CPD Certification Service

Equipping educational privacy professionals to master data protection and privacy.

Why the Privacy Academy?

Staying updated with the changing landscape of data protection regulations and best practices poses a considerable challenge for privacy professionals, especially in educational institutions. With legislation constantly evolving, such as the recent emergence of AI regulations, schools must not only comprehend but also effectively implement and demonstrate compliance with new laws.

To address these challenges, 9ine's Privacy Academy offers a comprehensive solution. Tailored for privacy professionals worldwide, this immersive and interactive professional development experience equips participants with the knowledge and tools needed to streamline their data protection and privacy obligations. Content features numerous case studies, stories, and examples from real life scenarios our team have encountered.

This programme, specifically designed for both individuals and teams in education, links a framework to the practical actions of managing privacy within the context of a school.

Some questions to think about include:

If you were to encounter a data breach, would you be confident that you or your colleagues could implement the correct procedures to ensure that the incident was handled appropriately, protecting the members of your school community?

How would you and your colleagues respond to a subject access request? Does your school have a grasp on how personal data is being shared with third parties? Where international transfers of personal data are occurring, what are the risks?

If your answers are "I'm not sure" then it's time to start thinking about professional development for your data protection team to get your compliance programme back on track.

The curriculum

The Privacy Academy comprises eight modules, held monthly, facilitating deep dives into crucial areas such as leadership, incident management, and policy development. Through a blend of interactive sessions, group scenarios, and supporting resources participants engage in practical exploration of real-world privacy challenges within the educational context.

The Privacy Academy sessions follow 9ine's Data Privacy Framework; eight core modules that can be mapped to any domestic or international law in order to operationalize the principles of the law into actionable steps that, when implemented, will help an organisation to demonstrably show compliance with the law.

One of the key strengths of the Privacy Academy lies in its collaborative nature. Participants interact with colleagues and peers from diverse educational backgrounds, fostering a rich exchange of insights and experiences. This collaborative learning approach enhances problem-solving skills and broadens perspectives on privacy issues.

The 9ine Platform

All delegates gain access to the 9ine Platform: A powerful platform to operationalise each teaching module, supporting privacy professionals to understand, plan, implement and report on progression.

The modules

Each module consists of 45 minutes of theoretical instruction, followed by hands-on scenario-based problem-solving and interactive Q&A sessions, making each 90-minute session both informative and engaging. Moreover, for those unable to attend live sessions, on-demand access ensures flexibility in learning.

Leadership & governance: Course covering accountability and evidencing compliance in a structured privacy programme. Includes case studies and real world examples.

Records of Processing (ROP) & data mapping: Course covering the practicalities for personal data inventories including common problems and pitfalls. Also included is coverage of the legal bases for processing personal data.

Incident and breach management: Course covering the meaning of a breach in data protection and what steps should be taken to avoid and mitigate them. Common issues and best practices for breach management are also discussed.

Data sharing, contracts & vendor management: Course covering vendor assessments and data processor due diligence. Includes handling of international personal data transfers, standard contractual clauses and data processor agreements.

AI risks & regulation: Course covering the known risks of AI, potential to create data privacy related damage and distress and developing regulation which schools will need to address.

Information security & operations: Course covering the intersection of IT security and data protection. Coverage of data protection by design and by default along with best practices for integrating privacy into Information Security assessments.

Risk management & controls: Course covering assessments and risk management, particularly Data Protection Impact Assessments (DPIAs). Other key assessments such as legitimate interest assessments and transfer impact assessments are also covered.

Policies & notices: Course covering the essential policies for data protection along with best practices for implementing those policies and procedures in a school.

The dates

The Privacy Academy 2024/25 cohort starts their programme in November 2024 and the workshops run monthly through until the end of May 2025. Can't attend a session? While we encourage all participants to attend live for the exercises and colleague discussions, all workshops are recorded and slides will be supplied so you can access the material on demand.

You receive

- Eight monthly workshops covering various data protection topics, totaling over 13 hours of training.
- On demand video recordings and the course slides to rewatch workshops.
- Certificates of completion.
- Access to the 9ine Platform, a tool built by 9ine to equip schools in streamlining their data protection practices.
- Access to our teaching staff and consultancy support to ask specific questions and gain real-time feedback.
- Capability and capacity to understand how to implement a privacy programme in your school.
- Collaboratively learn with peers from around the world, sharing insights and experiences.

Who should attend?

- Data protection leaders
- Technology leaders
- EdTech integrators
- Risk manager
- Compliance leaders
- Business managers and officers

Investment

Contact our team for pricing for individuals or teams.

Certification

After concluding the Privacy Academy you will receive a certificate of completion stating that you participated in the programme and covered all eight modules.

Got questions?

Joining the Privacy Academy offers privacy professionals in schools an invaluable opportunity to enhance their understanding, network with peers, and effectively navigate the complexities of privacy in education, all within a supportive and interactive learning environment. Privacy Academy

The team

Mark Orchison

Certified Privacy Practitioner, ITIL, MSP, PRINCE2

Mark Orchison serves as the CEO of 9ine, a leading provider of technology, cyber, and privacy services to schools. With over two decades of experience, Mark is a distinguished thought leader in technology, cyber, and privacy within the education sector. His track record showcases his adeptness in guiding organisations of all scales and domains through evolving digital and regulatory landscapes. Mark regularly shares his insights as a speaker and supports numerous not-for-profit organisations in supporting their member schools to better protect their school data and systems.

Julia Pidduck

CIPPE

Julia joined 9ine in January 2024 as Data Privacy and Protection Programme Manager. She has previously spent five years at PRIVO, managing the FTC-approved COPPA safe harbor programme, where she helped app and website publishers to achieve and maintain compliance with COPPA and other privacy regulations in relation to children. Before pursuing a career in data privacy, Julia was focused on digital marketing in the publishing industry, working for the Roald Dahl Story Company, Hachette Book Group and Random House among others.

James Wigginton

James works within 9ine's Accounts team, supporting our global client base in progressing and managing their data protection programmes. James is highly experienced in working with clients in deployment and utilisation of compliance SaaS solutions to ensure successful operationalising in governance of risk management, facilitated with over 8 years of Comp-Tech experience.

About 9ine

9ine equips schools to stay safe, secure and compliant. We give schools access to all the expertise they need to meet their technology, cyber, data privacy, governance, risk & compliance needs - in one simple to use platform. Our team of over 80 experts partner with schools to achieve a safer, smarter, and more secure educational future, where technology solutions, risk management, and compliance converge for excellence. Since 2009, 9ine has supported schools around the globe to meet a constantly developing legislation environment, including the introduction of GDPR, and remains future focused on supporting schools with navigating the use of emerging technologies.
