

COVID-19 CORONAVIRUS CLEANING

Centex Construction has partnered with BioTechs, a state licensed, OSHA certified bio hazard remediation company to provide CDC recommended cleanings as a preventative measure or for areas of known exposure.

The CDC has issued very clear guidelines to help limit the growth and spread of the COVID-19 pandemic. Centex will offer three tiers of action so that business owners can take the appropriate proactive measures. These tiers include a precautionary effort, a focused action and an aggressive operation.

YELLOW TIER- A precautionary and preventative action. It is not in response to any suspected nor confirmed case of COVID-19 but to be abundantly cautious for the patrons, customers, residents, employees and community. It consists of daily, bi-weekly or weekly cleaning and disinfection.

ORANGE TIER- A cautionary and focused action. It is in response to a suspected case but not a confirmed case of COVID-19. This plan is best after a person suspected of being infected with COVID-19 was inside the building. It is a 10-ft down disinfection which includes a deep cleaning and decontamination.

RED TIER- An immediate, aggressive and intensive action. It is in response to a confirmed case of COVID-19 on the premises and inside the buildings. We will customize a plan of action specific to you, the client, your business, employees and customers.
