ABOUT

The Biomedical Engineering Society (BMES) is the professional society for biomedical engineering and bioengineering. Founded in early 1968, the Society now boasts over 5,000 members and is growing, rapidly.

BMES serves as the lead society and professional home for biomedical engineering and bioengineering. Our leadership in publications, scientific meetings, global programs, and diversity initiatives, as well as our commitment to ethics, all serve our mission to promote and enhance knowledge and education in biomedical engineering and bioengineering worldwide.

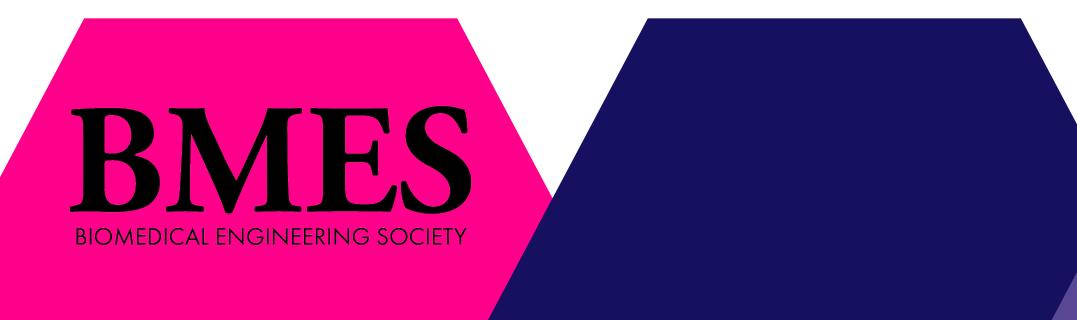

HISTORY

In response to the emerging need to provide a society offering equal status to representatives of both biomedical and engineering interests, the Biomedical Engineering Society was incorporated in Illinois on February 1, 1968. BMES published its "Historical Perspective" in 2004, celebrating its 35-year history and growth.

The Society is a 501(c)3 nonprofit professional association, which was established to serve as the lead society and professional home for biomedical engineering and bioengineering students, academics, and professionals. The mission of the Society is to promote and enhance biomedical engineering knowledge worldwide and its utilization for human health and wellbeing.

MISSION

The Biomedical Engineering Society promotes a collaborative and inclusive community to advance human health through education, discovery, and translation.

VISION

Health and wellness for all through engineering innovation.

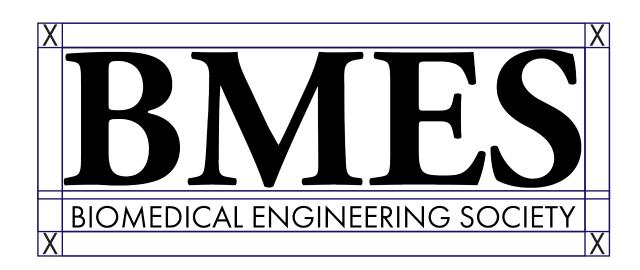

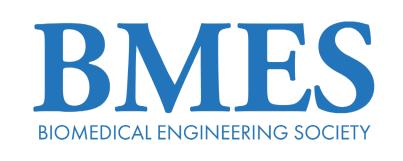

The BMES primary logo should be used as the default branding mark.

TYPOGRAPHY - PRIMARY FONT BMES' primary typeface is Futura, a sans serif **FUTURA**

typeface. The Futura font includes an extensive family of different fonts and weights, making it incredibly versatile. This versatile works well in both print and digital copy.

Although created in 1927, Futura is still considered a modern font that conveys progress. Ascenders and descenders in the lowercase letters are tall and go over the height of uppercase characters. This gives the font an elegant look and separates it from other fonts.

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890?!&

Light Light Oblique

Book **Book Oblique**

Medium Medium Oblique

Demi **Demi Oblique** Heavy **Heavy Oblique**

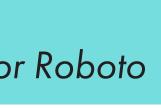

Bold **Bold Oblique**

Extra Bold Extra Bold Oblique

Alternate fonts for Futura: Twentieth Century, Century Gothic, or Roboto

TYPOGRAPHY - SECONDARY FONT GARAMOND BMES' secondary typeface is Garamond, a group of many serif typefaces. It's relatively ABCDEFGHIJKLMNOPQRSTUVWXYZ organic structure resembles handwriting that abcdefghijklmnopqrstuvwxyz makes it ideal for printing body text and books. 1234567890?!& Regular Developed in the 16th century, Garamond Italic has revived recently through various stylings. Bold Modern Garamond revivals have a matching **Semibold Caption** bold and "lining" numbers at the height of Semibold Display capital letters, which was not present during **Bold Caption** Garamond's time. Bold **Bold Subhead Bold Display** BMFS

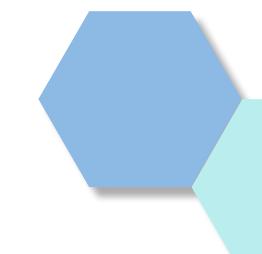

TYPOGRAPHY - USAGE

The marriage of Futura and Garamond is based on a unity of opposites. Despite differences in origin and character, they combine brilliantly, thanks to their proportions, to form a powerful typographic ensemble with a rich range of possibilities.

GENERAL GUIDELINES

Information should be organized and broken up into digestible sections. Critical information belongs in level 1, section descriptions in level 2, and the core message in level 3.

- Level 3: Body text

HIERARCHY COMBINATION OF FONTS Level 1: HEADER TITLE - Futura Text - Garamond Level 2: Sub-header
