

Curriculum Vitae

Zhongping Huang, Ph.D.

Professor, Founding Director of Biomedical Engineering
Department of Physics and Engineering
West Chester University of Pennsylvania
700 South High Street
West Chester, PA 19383

T: 610-436-6932
Fax: 610-436-3013
E-mail: zhuang2@wcupa.edu

EDUCATION:

- | | |
|------|--|
| 2003 | Ph.D. in Mechanical Engineering
Department of Mechanical Engineering, University of Kentucky
Lexington, KY 40506 |
| 1989 | M.S. in Refrigeration and Cryogenics
Department of Energy Engineering, Zhejiang University
Hangzhou, Zhejiang, China |
| 1985 | B.S. in Refrigeration and Cryogenics
Department of Energy Engineering, Zhejiang University
Hangzhou, Zhejiang, China |

PROFESSIONAL EXPERIENCE:

- | | |
|---------------------|--|
| July 2018 – present | <u>Professor and Founding Director of BME program</u>
Department of Physics and Engineering, West Chester University of Pennsylvania, West Chester, PA 19383 |
| 2011 – 2018 | <u>Associate Professor and Department Chair</u>
Department of Biomedical Engineering, Widener University, Chester, PA 19013 |
| 2010 – 2011 | <u>Associate Professor (with Tenure)</u>
Department of Mechanical Engineering, Widener University, Chester, PA 19013 |
| 2004 – 2010 | <u>Assistant Professor</u>
Department of Mechanical Engineering, Widener University Chester, PA 19013 |

RESEARCH AREAS:

1. Artificial Kidney/ Hemodialysis

- a) Development of wearable artificial kidney; study of novel annular ring technique to evaluate local solute clearance for dialyzers; evaluation of the influence of operational conditions on solute clearance; investigation of the effects of dialyzer reprocessing on solute clearance; prevention of potential bacterial products back transfer.

- b) Development of novel approaches to enhance the treatment for renal patients including: pre vs. post dilution model, different ultrafiltration rate applied in pre-dilution

model in high volume continuous hemofiltration, determinants of solute clearance in hemodiafiltration (HDF), and study of a dual cartridge hemodialysis system.

- c) Development of novel technologies to fabricate nano-porous ceramic membrane hemodialyzers for use in artificial kidney.

2. Cryogenics

Cryogenic grinding technology for rubber, plastic, pigment size reduction, and traditional Chinese herbal medicine; cryo-refrigeration; gas (nitrogen, oxygen, helium, hydrogen) liquefaction separation; cell cryo-preservation

3. Refrigeration technology

Freeze drying technology for food, royal bee jelly; freeze drying for biomaterial; heat pump with rare earth hydrides; air conditioning system; cooling device to minimize ischemic brain injury during surgical procedures

PATENTS:

1. Apparatus and Method for Enhanced Hemodialysis Performance, US 2007/0119781 A1, May 31, 2007
2. Cryogenic grinding for Chinese Herbal Medicine. Patent Number: 91202211.6 China, 1992

PUBLICATIONS:

(A) Journal Papers (Refereed)

1. Li, W., Liu, J., He, L., Liu, J., Sun, S., Huang, Z., Liang, X., Gao, D., Ding, W., Simulation and Experimental Study on the Effect of Channeling Flows on the Transport of Toxin in Hemodialyzers, *Journal of Membrane Science*, 501:123-133, 2016.
