**W**ELCOME TO THE 2011 Annual Meeting of the Biomedical Engineering Society! The theme this year is "Fostering Collaborative Academic, Clinical, and Industrial Research in Biomedical Engineering," and Conference Chair Tom Webster, Vice Conference Chair Don Peterson, and Technical Program Chair, Karen Haberstroh, have assembled an exciting program. I want to thank all of the track chairs and session chairs for their important role in reviewing the new extended abstracts and assembling an outstanding program that highlights the latest advances in both basic and translational research.

Our plenary lectures highlight the range of achievement in the field. Professor Michael Schuler from Cornell University will deliver the 2011 Robert A. Pritzker Distinguished Award Lecture, and Roderic Pettigrew, Director of NIBIB, will deliver the BMES Distinguished Achievement Award Lecture. Professor Cato T. Laurencin, M.D., Ph.D., from the University of Connecticut is this year's winner of the BMES Diversity Award, and Jordan Green, Assistant Professor at Johns Hopkins University, was selected for the BMES Rita Schaffer Memorial Award. There will also be a special session this year celebrating the International Journal of Nanomedicine Early Career Award and Distinguished Scientists Award winners.

As part of our efforts to increase interactions among physicians and engineers in academia and industry, we are, for the first time, offering CME credit for a number of our sessions and symposia, and we are introducing several sessions with a panel discussion format to encourage greater interaction among participants in our translational research track. We will continue our new tradition on Wednesday afternoon, October 12 from 3-5 PM, and hold a poster session for faculty candidates. This will provide an opportunity for those BMES members looking for faculty positions to meet faculty from departments that are recruiting this year.

There are a number of special events you might wish to check out. Don't miss the special social event on Friday evening, October 14 at the Connecticut Science Center. You'll get to sample local food and enjoy the more than 150 hands-on exhibits. In addition, there will be a Women in BMES Luncheon on Friday, and last year's Celebration of Minorities in BME Luncheon returns to this year's meeting on Thursday. This year's speaker for the Celebration of Minorities in BME luncheon is Roderic I. Pettigrew. All are welcome (with ticket, of course!).

The student program includes several career related activities including an alumni panel, a resume review and writing workshop, and career fair. There are undergraduate technical sessions and design project sessions and special sessions for BMES student chapters. There is a Student Chapter Development workshop Friday morning and the Student Chapter Leadership workshop Friday early afternoon. A Professional Development workshop will also take place Friday afternoon. The workshop will provide students and early career workers with insights on what skills made the speakers marketable in the workforce.

We welcome other student and professional groups attending the meeting including the student honor society Alpha Eta Mu Beta, the Council of Chairs, AIMBE, the BME Career Alliance, and the Whitaker International Scholars and Fellows program.

Finally I would be remiss if I did not express a big "Thank You!" to our record number of supporters for the meeting, including NIH, NSF, Medtronic, Boston Scientific, Clemson University, the Whitaker Foundation, and especially Covidien, our first ever Diamond level supporter.

I wish you all an enjoyable and productive time at the meeting!

**W**ELCOME TO NEW ENGLAND AND THE CONNECTICUT CONVENTION CENTER in Hartford, the Northeast's newest Convention Center ideally located close to numerous hospitals, universities, and BME industries. For those of you new to Hartford, it is a city rich in history, Connecticut after all is nicknamed the "Constitution State." In 1868, Mark Twain wrote "Of all the beautiful towns it has been my fortune to see this [Hartford] is the chief." The Convention Center is just steps from Downtown Hartford, overlooking the beautiful Connecticut River at Adriaen's Landing, the city's exciting new riverfront district — so take advantage of the free hotel and downtown shuttles to explore (just not during the meeting). Hartford has been often called the "Insurance Capital of World" generating more economic activity than sixteen U.S. states, but today and this week, it will definitely be the "Biomedical Engineering Capital of the World".

Hartford is also home to the new Connecticut Science Center which currently boasts 6 floors of over 150 hands-on exhibits, a state-of-the-art 3D digital theater, and four educational labs which makes it perfect for endless exploration for children, teens and adults. A two minute walk from the Connecticut Convention Center, we will take advantage of this inspirational Science Center for our Friday Night Celebration so that we can mingle, network, and refresh our excitement towards science — be sure to check out the Sports Lab and Picture of Health exhibits!

This year at the BMES Annual Meeting, some things are the same, but a lot is new. We have worked very hard over the past year to put together a stimulating program featuring over 2000 presentations covering all aspects of Biomedical Engineering. While we are confident that the tradition of a strong BMES meeting will continue this year, we have made a number of key changes for improvement. Since our theme is: "Fostering Collaborative Academic, Clinical, and Industrial Research in Biomedical Engineering," one of our goals was to increase participation among clinicians, academics, and industry. Of course, New England is home to a number of biomedical industries which has brought new faces to our exhibit hall, and new supporters, with a first time ever Diamond Supporter from New England's own Covidien (thanks to all of our supporters). To increase clinical participation, for the first time ever, we have incorporated Continuing Medical Education (CMEs) Credits into the program. For those that do not know, it is required that clinicians complete a certain number of CMEs every year and we hope that this new direction for BMES will continue in the years to come to improve clinical participation. As New England is home to more than 300 Universities and Colleges, the strong academic presence at BMES will continue this year. We have also continued the well received "Meet the Faculty Candidate" event to help our newest graduates find jobs and we will have a special birthday to celebrate this year—Dr. Shu Chien turns 80 ! (be sure to check out the special symposium in his honor—party hats required).

On a more practical level, this year, we moved into a longer abstract format, incorporated required financial disclosures of presenters to become a more open society, and established stronger guidelines for abstract reviews. A longer abstract format improves our society by increasing quality and providing more information for assessment. It is also anticipated that the new longer abstract format will increase research visibility both in terms of references in scholarly journals and presentations.

So get out there BMES attendees, catch up with old friends, meet new people, and have a great meeting (just don't eat too much lobster) !

## Don Peterson PhD

*Annual Meeting Vice-Chair  
University of Connecticut*

**IT IS WITH GREAT HONOR AND PRIVILEGE** that I welcome you to Hartford, Connecticut, for the 2011 Annual Meeting of the Biomedical Engineering Society! We here at the University of Connecticut are honored to be co-hosting the Annual Meeting in the Connecticut Convention Center with Brown University! For several decades following the Civil War, Hartford was the wealthiest city in the U.S. and, from October 12th through the 15th, 2011, it will once again become the nation's wealthiest – but this time in BME!

The BMES Annual Meetings provide a vehicle for understanding the latest trends in BME as it embodies the cutting-edge of BME research and technological developments from faculty and students from top universities and colleges. The theme for this year's meeting is "Fostering Collaborative Academic, Clinical, and Industrial Research in Biomedical Engineering" and the Technical Program Chair, Karen Haberstroh, has composed a great Program that will certainly expand upon this theme. I am proud to announce that a newly restructured Translational Biomedical Engineering track has been incorporated into this year's Program that promises to demonstrate how Translation is BME's next engineering milestone. This track will have platform presentations and posters from students and faculty who are on the cutting-edge of translational work and it will also feature panel sessions on Nanomedicine, Personalized Medicine, Translational Education, and the translational initiatives of universities funded by the Coulter Foundation. Also new this year is an additional plenary lecture sponsored by the National Institute of Biomedical Imaging and Bioengineering (NIBIB) on Robotics and Sensory Motor Restoration. And, I would also like to welcome BMES's first ever Diamond-level sponsor, Covidien, who is Connecticut's largest manufacturer of medical devices.

The conference theme is ideally suited for the location of this year's BMES Annual Meeting. The Hartford metropolitan area continues to be a dynamic leader in economic development and in Biomedical Engineering. In 2010, the Hartford area ranked 2nd nationally based on per capita economic activity behind San Francisco, California, and is currently ranked 32nd (out of 318 metropolitan areas) in total economic production. The Hartford-Springfield metropolitan region is collectively nicknamed the "Knowledge Corridor" because of its 32 universities and colleges (including several of the America's most prestigious) and approximately 160,000 students. The Corridor also has a significantly large educated workforce that supports a concentration of high-tech industries, from health care services to the precision manufacturing of metals, plastics, and electronics. Incidentally, the Knowledge Corridor region generates over \$110 billion GDP, which is higher than the GDP of 16 U.S. states. Connecticut alone has about 800 biomedical companies, half of which are medical device manufacturers producing \$3.5 billion in sales and about \$1 billion in exports per year. Overall, Hartford and the Knowledge Corridor have become vital components to the thriving medical device manufacturing industry in the United States and to the advancement of Biomedical Engineering.

The city of Hartford, which is nicknamed the "Insurance Capital of the World" as it is the headquarters for many of the world's insurance companies, is rich in history and accomplishment. At nearly 375 years old, Hartford is one of oldest cities in the U.S. In 1639, the world's first written constitution used to establish a government was created here and served as a prototype for the U.S. Constitution. Hartford has the oldest continually-published newspaper in the U.S., the Hartford Courant, whose first issue appeared on October 29, 1764 (as the Connecticut Courant). Many of the nation's oldest landmarks are here: the oldest state house in the U.S. (1796), the oldest public art museum, the Wadsworth Atheneum (1842 and has a collection that spans over 5000 years), and the world's oldest publically-established park, Bushnell Park (1854). (All three of these landmarks are just a short walk from the Convention Center.)

Hartford was home to several famous people, such as authors Mark Twain and Harriet Beecher Stowe, and to inventors like Samuel Colt, who patented the first revolving cylinder firearm (1836) and invented the first electrically-powered underwater torpedo (1841). (If you walk out the back side of the Convention Center overlooking Interstate 91 and look off in the distance to your right, you will see a large red brick building with a large blue onion dome on top. This was his firearms factory, the Colt Armory.) Hartford is also home to many of the nation's firsts. Apollos Kinsley built the first steam-powered road wagon (1797), Charles Richtel flew the first successful dirigible flight for two hours (1878), and the first pneumatic tires were manufactured here (1895). Hartford was the birth place of the American automobile industry and was its center for many years, where the Pope Manufacturing Company made electric and gasoline powered automobiles (and motorcycles and bicycles) under the brand name Columbia (1897). President Theodore Roosevelt was the first president to ride in an automobile on August 22, 1902, as he rode through Hartford in a Columbia Electric Victoria. Hartford was also the first city in the world to have a radio station broadcast in FM (WDRC in 1939).

Many thanks to Tom Webster, the Meeting Chair, and Karen Haberstroh, the Technical Program Chair, for all their hard work to make this event possible and to the entire staff at BMES for supporting this Annual Meeting, especially Ed Schilling, BMES Executive Director, and Debby Tucker, BMES Meetings Director, for their patience and support of our ideas, suggestions, and modifications. This will truly be a great meeting and I hope that you find it both beneficial and experiential in your career as a Biomedical Engineer! I hope your visit to BMES 2011 and to Hartford will be enjoyable and memorable.

Sincerely,

**Don Peterson, PhD**

**W**ELCOMES TO BMES 2011 and to Hartford, CT! This year's meeting promises to be very exciting. From systems biology to tissue engineering - it includes tracks and sessions that have been well-received in previous years, and also features some new biomedical engineering research and educational sessions. Of note, the technical program now highlights multiple sessions and panels focused on translational biomedical engineering and industrial collaborations, including "Clinical and Translational Research and Science in Biomedical Engineering" and "Research to Practice (R2P)". In total, the meeting contains 14 concurrent sessions, 704 oral presentations, and 1,357 poster presentations, and represents speakers chosen from over 2,188 submitted abstracts. In addition, we have an excellent representation of undergraduate student presenters, as highlighted in the Saturday afternoon undergraduate sessions. Please attend their talks and support the next generation of biomedical engineers!

We know that there were a lot of changes put into effect with this year's meeting, including a new one page abstract, a new abstract scoring rubric, and an earlier abstract deadline. We appreciate everyone's patience in this process and hope is that these have all helped to ensure the highest quality of technical presentations in each of these exciting areas.

Before we all head to our favorite sessions, I'd like to take this opportunity to thank a few people that have helped to make this meeting a success. First and foremost, I'd like to thank the staff at BMES for their patience and guidance in this process - I now (fully) appreciate all of the hard work that goes into planning a meeting of this scale, and I hope that the staff knows how much they are appreciated and valued. Debby Tucker, in particular, has spent endless hours communicating with myself, the track chairs, Mira, researchers, and the Hartford convention center, among others; she has aided in creating not only a fantastic technical and social agenda, but also a high quality and professional meeting program. I would also like to thank all of the track chairs, reviewers, and session chairs - as specialists in their fields, these scientists have each volunteered their (extensive) time and effort to this event, and I truly appreciate all of their hard work. I'd like to thank the meeting co-chairs, Tom Webster and Don Peterson, who together have helped the BMES staff and I pull off this monumental event. Finally, I'd like to thank all of the previous meeting and technical chairs - I now understand the hard work and care that they donated in making their own BMES meeting run smoothly. We are very fortunate to have members so dedicated to this society, and to making this annual meeting a success!

Again, welcome to Hartford and enjoy BMES 2011!

Who knew that space exploration would lead us closer to the human heart?

We did.

**We're always exploring new ways to apply innovative technologies.** By applying NASA technology we were able to leverage an innovative polymer originally designed to survive challenges in space.

Its stability in extreme environments, corrosion-protective qualities and ability to work in very small places allowed us to reach the complex left side of the heart, which led to one giant leap in product design. We're always reaching further, going farther.

## Modeling Life

**WE SEEK TO CONSTRUCT** physical and mathematical models of life. Such models allow us to test our understanding of how living systems function and how they respond to human imposed stimuli. Our “Body-on-a-Chip” is a microfabricated, microfluidic system with cells or tissue constructs representing various organs in the body. It can be constructed from human or animal cells and used in drug discovery development. The model is a physical representation of a physiologically based pharmacokinetic model. The second system is a genomically and chemically complete model of a minimal cell. This cell is a hypothetical bacterium with the fewest number of genes possible. Such a minimal cell provides a platform to ask about the essential features of a living cell and forms a platform to investigate “synthetic biology.” While the two systems differ greatly in detail, both illustrate an engineering approach to understand “What is life?” and how living organisms can be manipulated for human benefit.

**MICHAEL SHULER** is the James and Marsha McCormick Chair of the Department of Biomedical Engineering as well as the Samuel Eckert Professor of Chemical Engineering in the School of Chemical and Biomolecular Engineering at Cornell University. He is also the Director of the Center on the Microenvironment and Metastasis, a Physical Sciences-Oncology Center funded by the National Cancer Institute. Shuler received his degrees in chemical engineering (BS, University of Notre Dame, 1969 and Ph.D., University of Minnesota, 1973) and has been a faculty member at Cornell University since January 1974. He joined the faculty of chemical engineering and chaired the School of Chemical and Biomolecular Engineering from 1998 to 2002. He was the founding chair of Biomedical Engineering starting July 2004. Mike has advised 59 PhD students as well as numerous Masters level students and 17 post-doctoral associates.

Shuler's research is focused on biomolecular engineering and nanobiotechnology with a recent emphasis on applications in human health. His work includes development of an “artificial” animal (in vitro) for testing pharmaceuticals, models of the vasculature to identify interactions of circulating tumor cells with the endothelium, controlled drug delivery to treat brain tumors, production systems for useful compounds, such as paclitaxel from plant cell cultures, and computer models of cells relating physiological function to genomic structure. Shuler's research has led to commercial processes for production of the anticancer agent, Taxol, to tools to produce proteins from recombinant DNA (the “High Five” cell line), to software to support systems biology, and to devices for drug development (HuRel system).

He has received numerous awards for his research and teaching. He has an honorary doctorate from the University of Notre Dame. He has received the Amgen Award in Biochemical Engineering, the Professional Progress and Warren K. Lewis Awards from the American Institute of Chemical Engineers and the Marvin Johnson Award from American Chemical Society. Also, he was the inaugural awardee for the J.E. Bailey Award from the Society for Biological Engineering. Shuler has been elected to membership in the National Academy of Engineering (1989) and the American Academy of Arts and Science (1996).

## **The Critical Roles of Convergence Science and Technological Innovation in Tomorrow's Healthcare**

**A**DDRESSING THE CURRENT AND emerging challenges in healthcare through biomedical science and technological innovation increasingly requires expertise from several disciplines such as chemistry, physics, mathematics, engineering, computer science, cell /molecular biology and genomics. Scientists from different disciplines collaborating to form a new interdisciplinary team is a powerful approach to achieve an important research and development goal. This is essential for realizing the vision of patient-centric medicine that is more personalized and globally accessible. Moreover, meeting the opposing modern challenges of increased medical access and functionality while decreasing cost is critically dependent on technological innovation. Such innovation has already begun to show advances in a number of healthcare areas, including point-of-care systems, mobile health, image guided interventions, regenerative medicine, and molecular theranostics. This promises even greater advances in both the understanding and treatment of disease and in reshaping tomorrow's practice of medicine towards more effective healthcare for all.

**RODERIC I. PETTIGREW, PH.D., M.D.**, is the first Director of the National Institute of Biomedical Imaging and Bioengineering at the NIH. Prior to his appointment at the NIH, he was Professor of Radiology, Medicine (Cardiology) at Emory University and Bioengineering at the Georgia Institute of Technology and Director of the Emory Center for MR Research, Emory University School of Medicine, Atlanta, Georgia.

Dr. Pettigrew is known for his pioneering work at Emory University involving four-dimensional imaging of the cardiovascular system using magnetic resonance (MRI). More recently he has focused on integrated coronary imaging and the biomechanics of atherosclerotic plaque. Dr. Pettigrew graduated cum laude from Morehouse College with a B.S. in Physics, where he was a Merrill Scholar; has an M.S. in Nuclear Science and Engineering from Rensselaer Polytechnic Institute; and a Ph.D. in Applied Radiation Physics from the Massachusetts Institute

of Technology, where he was a Whitaker Harvard-MIT Health Sciences Scholar. Subsequently, he received an M.D. from the University of Miami School of Medicine in an accelerated two-year program, did an internship and residency in internal medicine at Emory University and completed a residency in nuclear medicine at the University of California, San Diego. Dr. Pettigrew then spent a year as a clinical research scientist with Picker International, the first manufacturer of MRI equipment. In 1985, he joined Emory as a Robert Wood Johnson Foundation Fellow with an interest in non-invasive cardiac imaging.

Dr. Pettigrew's awards include membership in Phi Beta Kappa, the Bennie Award (Benjamin E. Mays) for Achievement, and being named the Most Distinguished Alumnus of the University of Miami. In 1989, when the Radiological Society of North America celebrated its 75th Diamond anniversary scientific meeting, it selected Dr. Pettigrew to give the keynote Eugene P. Pendergrass New Horizons Lecture. He has also served as chairman of the Diagnostic Radiology Study Section, Center for Scientific Review, NIH. He has been elected to membership in both the Institute of Medicine, and the National Academy of Engineering of the National Academies, fellowship in the American Heart Association, American College of Cardiology, American Institute for Medical and Biological Engineering, International Society for Magnetic Resonance in Medicine, and was elected an Honorary Fellow of the Biomedical Engineering Society.

# Numerical and Statistical Methods for Bioengineering Applications in MATLAB

Michael R. King, *Cornell University, New York*

Nipa A. Mody, *Cornell University, New York*

"The book is really easy to read and places frameworks for numerical analysis into realistic bioengineering concepts that students will find familiar and relevant. This is most evident in the excellent boxed examples, but also in many of the homework problems. I also really liked the 'key points to consider' at the end of the chapters – these are useful reminders for the students. Finally, the book presents bioinformatics in a manageable fashion that should help demystify this subject for interested students."

- K. Jane Grande-Allen, *Rice University*

The first MATLAB-based numerical methods textbook for bioengineers that uniquely integrates modeling concepts with statistical analysis, while maintaining a focus on enabling the user to report the error or uncertainty in their result. A unique feature of the book is the inclusion of examples from clinical trials and bioinformatics, which are not found in other numerical methods textbooks for engineers. With a wealth of biomedical engineering examples, case studies on topical biomedical research, and the inclusion of end of chapter problems, this is a perfect core text for a one-semester undergraduate course.

### Robotics and Sensory Motor Restoration

**A**DVANCES IN ROBOTICS are assisting people with sensory motor impairment in achieving greater mobility. For example, exoskeletons help people with paralysis to walk and use their hands, and robotic training devices allow movement training to be delivered in more intense, motivating, and quantifiable ways. Yet, even with these advances in rehabilitation technology, individuals with mobility impairment still too often experience too little recovery. This talk will describe efforts of rehabilitation, robotics, and neural engineers to develop technologies to assist the injured motor system in reorganizing in a way that best promotes functional recovery. A central theme is that technologies that provide an optimal level of challenge to the patient produce better therapeutic outcomes; a key question is whether optimal recovery requires more sophisticated assistive technologies, such as multi-joint exoskeletons, that can assist in more naturalistic movement. Ultimately, treatments that combine regenerative or plasticity-enhancing therapies with intensive motor learning experiences will facilitate neuro-recovery beyond what is currently possible. These treatments will require a new science of combination therapies to be developed.

**DAVID REINKENSMAYER** is Professor in the Departments of Mechanical and Aerospace Engineering, Anatomy and Neurobiology, and Biomedical Engineering at the University of California at Irvine. He received the B.S. degree in electrical engineering from the Massachusetts Institute of Technology and the M.S. and Ph.D. degrees in electrical engineering from the University of California at Berkeley, in 1988, 1991, and 1993, respectively, studying robotics and the neuroscience of human movement. He carried out postdoctoral studies at the Rehabilitation Institute of Chicago and Northwestern University Medical School from 1994 to 1997, building one of the first robotic devices for rehabilitation therapy after stroke. He became an assistant professor at U.C. Irvine in 1997, establishing a research program that develops robotic and sensor-based systems for movement training and assessment following neurologic injuries and disease. He recently served as the chair of the National Science Foundation initiated International Study on Technology for Mobility, and is the lead researcher for iMove, a collaborative effort at U.C. Irvine focused on using technology to help restore human mobility.

Dr. Reinkensmeyer's research group seeks to understand how to improve sensory motor recovery following neurologic injury and disease. Since motor learning and neuroplasticity occur in response to the physical effects of motion, his group manipulates the physics of motor tasks with robots to try to enhance motor learning, developing and drawing on computational models of neuromotor learning and plasticity to provide a rational framework for device development. Increasingly his group is interested in combining technologies for movement training with regenerative therapies, including stem cell therapies. His group is also seeking to develop sensor-based technologies for movement evaluation that improve insight into regenerative clinical trials by enabling continuous, high-resolution assessment of neuro-muscular control.

## Polymeric Nanoparticles for Cell-Specific Intracellular Delivery

**T**HERE IS A NEED to safely and effectively deliver biological molecules inside cells to treat many diseases. We have developed a library of polymers to encapsulate various molecules including nucleic acids into biodegradable nanoparticles. These particles degrade either hydrolytically or in response to changing environmental conditions. Nucleic acid-based medicines (DNA or RNA) in particular hold great promise in treating many genetic disorders including cancer, but lack a viable delivery method. The nanobiotechnologies that we develop here are more effective than the leading commercially available reagents for *in vitro* intracellular delivery to a range of cell types including human primary cells and human cancer cells and are promising for *in vivo* use. Small changes to chemical structure tune intracellular delivery in a cell-type specific manner. Leading polymeric nanoparticles exhibit low non-specific toxicity and high transfection efficiencies of ~80% in difficult to transfect human cells. Certain nanoparticle formulations are particularly effective for transfection of human macrovasculature and microvasculature cells and for transfection of human brain cancer cells.

**DR. JORDAN J. GREEN** is an assistant professor of Biomedical Engineering and Ophthalmology at the Johns Hopkins University School of Medicine. He is also a member of the Institute for NanoBioTechnology and the Translational Tissue Engineering Center at JHU. Dr. Green received his B.S. in biomedical engineering and chemical engineering from Carnegie Mellon University in 2003 and studied at Imperial College London from 2001-2002. He was awarded Whittaker, NSF, and Phi Kappa Phi Fellowships for graduate study and completed his Ph.D. in biological engineering from the Massachusetts Institute of Technology in 2007. Subsequently, Dr. Green was a postdoctoral associate at MIT in Institute Professor Robert Langer's lab from 2007-2008 and was also a biotechnology consultant. His work has resulted in 25 papers and book chapters, 24 invited talks, multiple patents, and has been featured by News@Nature.com and the Boston Globe among other outlets. He has served on national grant panels for the National Institutes of Health, the National Science Foundation, the Department of Defense, and the American Association for the Advancement of Science. Dr. Green's main research interests are in developing biomaterials and nanobiotechnology to meet challenges in regenerative medicine, ophthalmology, and cancer. His work on biomaterials and drug delivery is supported by grants from the National Institutes of Health, the Maryland Technology Development Corporation, the Institute for Nanobiotechnology, and the Edward N. and Della L. Thome Memorial Foundation, Award in Age-Related Macular Degeneration Research.

*BMES established this award in 2000 to honor Rita M. Schaffer, former BMES Executive Director. Rita's gift of her estate, along with contributions from her family, friends, and associates, has enabled BMES to create the Rita Schaffer Young Investigator Award, which includes the Rita Schaffer Memorial Lecture.*

**What I Teach When I Mentor, What I've Learned When I've Been Taught**

**CATO T. LAURENCIN, M.D., PH.D.** is an elected member of the Institute of Medicine of the National Academy of Sciences and an elected member of the National Academy of Engineering.

Dr. Laurencin is the Albert and Wilda Van Dusen Distinguished Chair in Orthopaedic Surgery, and Professor of Chemical, Materials and Biomolecular Engineering at the University of Connecticut. In addition, Dr. Laurencin is a University Professor at the University of Connecticut (the 5th in the institution's history). An internationally prominent orthopaedic surgeon, engineer, and administration, Dr. Laurencin directs the Institute for Regenerative Engineering at the University of Connecticut Health Center, and is Chief Executive Officer of the Connecticut Institute for Clinical and Translational Science. Dr. Laurencin previously served as Vice President for Health Affairs and Dean of the School of Medicine at the University of Connecticut Health Center.

Dr. Laurencin earned his undergraduate degree in chemical engineering from Princeton University and his medical degree Magna Cum Laude from Harvard Medical School. During medical school, he also earned his Ph.D. in biochemical engineering/biotechnology from the Massachusetts Institute of Technology.

Dr. Laurencin has been named to America's Top Doctors and America's Top Surgeons, and is a Fellow of the American Surgical Association, a Fellow of the American College of Surgeons, and a Fellow of the American Academy of Orthopaedic surgeons.

Dr. Laurencin's research involves tissue engineering, biomaterials science, nanotechnology and stem cell science. He is an International Fellow in Biomaterials Science and Engineering and a Fellow of the American Institute for Medical and Biological Engineering. His work was honored by Scientific American Magazine as one of the 50 greatest achievements in science in 2007. Dr. Laurencin was named the 2009 winner of the Pierre Galletti Award, medical and biological engineering's highest honor and was named one of the 100 Engineers of the Modern Era by the American Institute of Chemical Engineers at its Centennial celebration.

Dr. Laurencin's work in mentoring students is well known. He received the Presidential Award for Excellence in Science, Mathematics and Engineering Mentoring from President Obama in ceremonies at the Whitehouse. He has been a member of the National Science Foundation's Advisory Committee for Engineering (ADCOM), and has served both on the National Science Board of the FDA, and the National Advisory Council for Arthritis, Musculoskeletal and Skin Diseases at N.I.H. Dr. Laurencin is a former Speaker of the House of the National Medical Association, and currently serves as Chairman of the Board of the W. Montague Cobb/National Medical Association Health Policy Institute. Dr. Laurencin is also a member of the National Academies Board on Life Sciences, and sits on the National Academy of Sciences Roundtable on Evidence Based Medicine and Value.

Biomedical Engineering at Tufts University draws from core disciplines such as engineering, biology, computer science, physics, chemistry, and physiology emphasizing an interdisciplinary approach to research and education. Strong emphasis is placed on interactions with faculty in Arts and Sciences and the professional schools. The Tissue Engineering Resource Center (TERC) was initiated in August of 2004 as a Resource Center supported through the National Institutes of Health P41 program. The core themes in the Center focus on functional tissue engineering achieved through a systems approach – integrating cells, scaffolds and bioreactors to control the environment in vitro for translation in vivo.

VU BME exists at both the scientific and geographic intersection of Vanderbilt's engineering and basic science departments and its renowned medical center, providing an ideal location for engineering research at the interface of technology and medicine. Research strengths exist in image-based technologies, nanobiotechnology and biophotonics and are complemented by other core competencies, including modeling and forecasting, biomaterials and bioregenerative engineering, bioMEMS, multiscale systems biology and the capacity for translation of research into practice. In close association with VU BME is the Institute of Imaging Science ([vuis.vanderbilt.edu](http://vuis.vanderbilt.edu)), the Institute of Nanoscale Science and Engineering ([www.vanderbilt.edu/vinse](http://www.vanderbilt.edu/vinse)) and the Institute for Integrative Biosystems Research and Education ([www.vanderbilt.edu/viibre](http://www.vanderbilt.edu/viibre)). The VU School of Medicine is among the top ten in funding from the NIH and includes a cancer center, a children's hospital and a Level I trauma center. Proximity to these resources, all positioned within our compact campus, and the strong relationships among faculty across multiple Vanderbilt schools stimulate high impact research and provide unique educational and research opportunities for learners. A comprehensive and highly integrated program of graduate education, including a unique first year curriculum, rapidly prepares graduate students for success in research.

### Platform Presentations

Each technical session room will be equipped with a PC-compatible computer with a USB port and PowerPoint along with an LCD projector, screen and a lectern with microphone.

During the half hour before your session begins, please upload your presentation onto the computer using a memory stick or flash drive. Because of the potential difficulty transferring some Mac files to PC format, we encourage you to avoid use of animation if there is a question about transferability.

Please do not try to connect your own laptop. Please note, it will not be possible to provide special equipment. Any additional equipment will need to be supported by the presenter. Although BMES has paid for WiFi throughout the convention center during the Annual Meeting, there will not be specific dedicated hard-wired internet access in the meeting rooms.

Sessions chairs should keep sessions on the listed schedule so that attendees can move back and forth among sessions. In most cases, presentations should be done in twelve minutes, allowing three minutes for questions and answers and transition to the next speaker.

### Poster Presentations

Posters will be presented Thursday, Friday and Saturday. Posters for both the morning and afternoon sessions will be on display throughout the entire day and should be manned by the author during the time indicated in the Scientific Program, especially during the breaks between platform sessions. All posters will be in the Exhibit Hall on the first level of the Convention Center. Posters are numbered with a card corresponding to the number assigned in the program.

### Speaker Ready Room

*Hall B Office Convention Center*

In the BMES Speaker Ready Room you will find cables, LCD projector and screen to practice your presentation. Please bring your own laptop.

*Don't Miss These Events*

**WEDNESDAY, October 12**

**Welcome Reception**

5:00pm - 6:00pm

*Convention Center, Exhibit Hall Foyer*

Light refreshments will be served. All registrants are invited to attend.

**THURSDAY, October 13**

**Celebration of Minorities in BME Luncheon\***

12:00noon - 1:30pm

*Convention Center, Ballroom C*

This is the second year of this event sponsored by the BMES Diversity Committee to create a community and network within the Society that fosters support and professional development of minorities in BMES at all levels. Everyone is invited to attend, as diversity only increases when all groups play a part.

This year's speaker is **Roderic I. Pettigrew, Ph.D., M.D.**, the first and current Director of the National Institute of Biomedical Imaging and Bioengineering (NIBIB). Dr. Pettigrew is known for his pioneering research involving four-dimensional imaging of the heart using magnetic resonance (MRI). He has been elected to the Institute of Medicine, and as a Fellow in the American Heart Association, the American College of Cardiology, the American Institute for Medical and Biological Engineering, the International Society for Magnetic Resonance in Medicine, and the Biomedical Engineering Society.

This luncheon complements the Diversity Award lecture to be delivered on Saturday and the Women in BMES Networking Luncheon on Friday.

*Celebrities of Minorities in BME Luncheon Supported by*

**\*additional registration and \$25 ticket required**

**Refreshment Breaks**

Please note that your meeting registration includes morning and afternoon refreshments breaks on Thursday, Friday and Saturday. All refreshment breaks will be in the Exhibit Hall.

*Thursday morning & afternoon refreshment breaks are sponsored by*

*Friday morning refreshment break sponsored by*

**BMES Town Hall, Fellows Induction & Awards Ceremony**

5:30pm – 7:00pm

*Convention Center, Ballroom AB*

Please join us for a dialogue with BMES President Richard Waugh and other leaders of the Society. The BMES Awards will also be presented. See page 39 for the award winners.

**FRIDAY, October 14**

**Women in BMES Luncheon\***

12:00noon - 1:30pm

*Convention Center, Ballroom C*

**"I Never Have Enough Time... A Pro-active Approach to Work-Life Balance" Luncheon work-shop with networking opportunities**

Networking events for women in BMES create a community within the Society that fosters support and professional development, while offering opportunities to nourish old ties and forge new relationships. Women in BMES activities have made a visible impact at the meeting, creating a forum for exchange across disciplines, between industry and academia, and between senior leaders in the field and junior faculty, trainees, and students.

**SPECIAL EVENT**

**Science Museum**

6:30pm - 9:30pm

*250 Columbus Blvd Hartford—*

*one block from the Convention Center*

All full and guest registrations receive a ticket for the event that includes food and one drink ticket. A cash bar will be available. Additional tickets may be purchased for \$100 each.

## STUDENT & EARLY CAREER PROGRAMS

### BMES Career Development

Wednesday, October 12

3:00pm - 5:00pm

Convention Center, Exhibit Hall

### Meet the Faculty Candidate Poster Session

This event will provide an opportunity for faculty, recruiters, and Department Chairs to speak directly with current graduate students and postdoctoral researchers who are seeking faculty positions. More than 120 faculty candidates will be presenting.

Thursday, October 13

4:00pm - 5:30pm

Convention Center, Ballroom C

### BME Alumni Panel

BME alumni share their industry experiences and lessons learned to the audience.

5:45pm - 7:15pm

Convention Center, Ballroom C

### Resume Writing Workshop

Students and early career alike can participate and take away writing tips from career professionals representatives.

Friday, October 14

1:00pm - 4:00pm

Convention Center, Exhibit Hall

### Career Fair OPEN TO ALL ATTENDEES

Employers and candidates come together at The Biomedical Engineering Society (BMES) Career Fair. This event is designed to connect organizations looking to hire high-level people with candidates that can bring specialized knowledge and innovation to new product and process development, teaching/training, scientific research, critical resource management, and more. Many of these BMEs are at the cutting edge of such areas as high-speed electronics, sophisticated mathematical analysis, sensors, safety studies, and massive data storage and processing.

### Career Counseling in the FASEB MARC Booth #409

The FASEB MARC Program will provide career counseling and resume critiquing in booth 409 in the exhibit hall during the BMES meeting. This service is free to you; therefore come by and sign-up for a session with either Dr. Howard Adams or Dr. Andrew Green.

### Career Counseling Scheduling:

Thursday, October 13, 10:00am-4:30pm

Friday, October 14, 10:00am-4:30pm

Saturday, October 15, 10:00am-1:00pm

### BMES Student Chapter Development Meeting

Friday, October 14

10:00am - 11:30am

Marriott, Ballroom C

This workshop is designed to provide information in how to charter and/or renew a BMES Student Chapter, and its benefits. Also it is an opportunity for interaction with the BMES staff and successful chapters providing examples of best practice, the place where the chapter members exchange ideas and generate new ones, as well setting chapter goals for the upcoming year.

### BMES Student Chapter Leadership Meeting

Friday, October 14

1:30pm - 2:30pm

Marriott, Ballroom C

This workshop will be for those students that are interested in enhancing their leadership skills and/or their involvement with BMES at a national level. Various leadership methods and techniques will be discussed. Students' newly acquired leadership skills will then be applied to the development of community, a vision, and a plan of action for the BMES national student leadership.

### Professional Development Workshop

Decrease Time to Market through Academic Collaborations

Saturday, October 15

10:30am - 12:30pm

Marriott, Capital Room

Join us for this workshop to discover the benefits universities provide to industry leaders from research to clinical trials. Hear from top universities on how they positioned themselves to be selected for collaborative projects. See how time to market may be reduced through academic resources. Learn about cutting-edge software solutions that can give you a competitive advantage. If you're an industry leader looking for new outsourcing opportunities or if you are affiliated with a college/university and are interested in exploring the possibilities with industry, then this workshop is for you!

### REU / Summer Undergraduate Technical Sessions

Saturday, October 15

Convention Center, Room 26

There will be two Undergraduate Research platform sessions on Saturday, October 15 featuring eighteen oral presentations. See pages 157 and 161 for details. The presentations in these sessions were chosen from submissions of undergraduates during the summer of 2011. Over 300 posters will also be presented on Saturday morning from 9:30am to 1:00pm. See pages 134 - 212.

## Whitaker International Fellows and Scholars Program: Funding Opportunity for Young Biomedical Engineers

Thursday, October 13  
4:00pm - 5:30pm

Convention Center, Room 12

Initially funded by the Whitaker Foundation, the Whitaker Fellows and Scholars Program is managed by the Institute of International Education (IIE) and supports international collaboration in the growing field of biomedical engineering. For all levels of emerging bioengineers, from graduating seniors to post-doctorate degree-holders in biomedical engineering, the Whitaker Program provides funding to U.S. citizens and permanent residents to undertake activities overseas directly related to the field. Past awards have included research in heart blood flow, improved prosthetic leg design, and development of affordable oral cancer screening tools. Projects are implemented worldwide, including countries like Australia, China, Kenya, Switzerland, the UK and Vietnam. The Whitaker Session will feature a panel of current and former Whitaker Program participants who will present their research projects, talk about their grant experience and offer application tips.

## Alpha Eta Mu Beta (AEMB) Programs

### Alpha Eta Mu Beta Annual Grand Meeting

Thursday, October 13  
10:30am - 12noon

Marriott, Capital 1 Room

**Session Chair:** Anthony McGoron, PhD and Dominic Nathan, PhD

At this annual grand meeting, members representing chapters nationwide will come together to discuss important contemporary events relating to AEMB. In addition, we will also be conducting several development workshops that focusing on areas of chapter management, leadership and professional development. (Attendance is mandatory for all AEMB members).

### Alpha Eta Mu Beta Annual Banquet

Thursday, October 13  
12:30apm - 2:00pm

Marriott, Capital 1 Room

**Session Co-Chairs :** Alicia Fernandez and Stefanie Gonzalez

The Annual AEMB banquet will be held at City Steam Brewery Café (942 Main Street, Hartford, CT 06103). We are delighted to have Ken Horner, husband of the late Patricia I Horner as our distinguished guest of honor. Ken has been very supportive of AEMB and Pat's role in leading AEMB since its beginning. We are also honored to have Dr. Jerry Collins as our distinguished banquet key note speaker. This session is open to all AEMB student and faculty members.

### Alpha Eta Mu Beta Annual Ethics Session: The Role of Wonder in the Life of the Engineer : Curiosity and Professional Humility

Thursday, October 13  
2:30pm - 4:00pm

Marriott, Capital 1 Room

**Session Co-Chairs:** David Smith, PhD and Stephanie Naufel, MS

The significance of ethics in driving key engineering decisions that shape the biomedical and biotechnology fields every day is one that merits true attention. Indeed, the ethically-conscious engineer must properly cultivate his or her innate curiosity to innovate with sound judgment and informed decision-making. But what are the necessary steps to bring about such awareness, and what is the role of professional humility? The goal of this session is to provide students, professionals, and educators with a framework to understand how ethics drive the field of biomedical engineering, and to discuss its impact on human dynamics in academics, industry and society as a

whole. This session further examines the role of professional humility and its influence on creating engineers who understand contemporary challenges, recognize limitations in the field, and who listen and respect the contributions of others.

Alpha Eta Mu Beta (AEMB), the National Biomedical Engineering Honor Society, is committed to promoting ethics in the field of biomedical engineering. This year, AEMB is honored to host Dr. David Smith, Director of the Yale Interdisciplinary Bioethics Center, as the distinguished ethics speaker. Dr. Smith has over 40 years of experience in the field of ethics, and has deliberated ethics education, care for the dying, research ethics, ethics and corporate responsibility, and ethics in genetic testing. An accomplished professional in the field, Dr. Smith is the author of over 13 books, numerous papers, and is the recipient of several grants that specifically examine various aspects of bioethics.

### **AEMB Special Session: Postharvest Intervention to Minimize Losses on Horticulture Crops in Sub-Saharan African Countries: A Case Study**

Friday, October 14

11:00am - 12noon

*Marriott, Capital 1*

**Session Co-Chairs:** Jerry C. Collins, PhD, Lamin S. Kassama, PhD and Dominic E. Nathan, PhD.

The ability to maintain reliable supply of food to Sub-Saharan African (SSA) regions is a significant challenge. The lack of appropriate infrastructure to support good postharvest management has led to significant losses (40-80%) and waste. This has led to an increase in poverty and hunger in the region. In addition, change in climate, political instability and living habits have made matters worse. Such an event presents itself as an ethical challenge to bioengineers and others in the field, who are endowed with the technical knowledge to assist in alleviating the human suffering that threatens to plunge the developing world into chaos. The central question is how do we confront and contribute to providing innovative and sustainable solutions appropriate to these SSA regions? This session defines the problem specifically in terms of a bioengineering context and engages students and faculty to actively determine how bioengineers can provide solutions to compliment current relief efforts.

This case study presented in this session is real and relevant. This is part of a larger research initiative on using real-world case studies as pedagogical tools in biomedical and bioengineering education. This is an inter-institution collaborative effort focused on curriculum development, teaching and assessment methods that encompasses a large but related group of disciplines within the biomedical and bioengineering fields.

### **Student Session: How Public Policy and Funding Affect You (Co-sponsored by AEMB and AIMBE)**

Friday, October 14

2:00pm - 3:00pm

*Marriott, Capital 1 Room*

**Session Co-Chairs:** Jennifer Ayers, Sean Gallagher and Teresa Murray

How does government funding impact biomedical research? How does this affect public health? Moreover, how can you influence policy-making? Find the answers at this informative session co-hosted by Alpha Eta Mu Beta (AEMB), the National Biomedical Engineering Honor Society, and the American Institute for Medical and Biological Engineering (AIMBE). AIMBE is the leading voice for public policy supporting medical and biological engineering innovation to improve public health. During this session, we will demonstrate how advocacy for the profession and the field can have important personal impact and ensure public policy continues to support our work. Furthermore, you will learn about the different types of government funding, how levels have changed, what impact that will have on our field and what you can do to influence policy-makers. AEMB members represent the top BME students across the US. Starting in 2006, we have sponsored the Student Ethics Session training future BMEs to evaluate the broader impacts of emerging biomedical innovations. Last year, we initiated the first student public policy session at BMES with our co-sponsor, AMIBE. AIMBE represents the top 2% of medical and biological engineers in the field, biomedical and bioengineering university programs through the US, industry and 18 professional societies. We play a critical role in advancing public policy for medical and biological engineering by meeting regularly with key administration officials, Congress, and monitoring trends in public policy that may impact the field. In total we reach nearly 50,000 individuals who are leading the way towards improved medical and biological engineering interventions for human health and well-being.

## 2011 BMES Awards Recipients

One of the more important – and most enjoyable – tasks of the Society is to recognize contributions to the intellectual and professional development of the field of biomedical engineering. On behalf of the awards committee we would like to thank all the members who submitted nominations and provided letters of support and for the high quality of their nominees. Congratulations to the following award winners.

# Whitaker International Fellows And Scholars Program

## Grants For Biomedical Engineering Study or Research Abroad

The **Whitaker Program** provides young biomedical engineers the opportunity to expand their geographic and academic horizons.

Potential activities to pursue overseas include:

- conducting research at an academic institution or with a corporation
- interning at a policy institute
- studying for a post-baccalaureate degree
- pursuing post-doctoral work

For more information, including program details, application requirements, and the online application, visit our website.

### ACTIVITIES

A Whitaker International Fellow or Scholar experience will ideally advance your career, while also advancing the goal of increased international collaboration in BME.

#### *Activities could include:*

- **After BS:** Pursuing an academic year of study or research that leads into graduate study in BME, Business or another field with the possible ability to transfer credit toward an advanced degree.
- **During Graduate Studies:** Conducting study or research at an overseas institution.
- **Internship:** Performing in-depth work in industry or policy-making (related to BME).
- **During/After Ph.D:** Engaging in a culminating experience by conducting research to foster career opportunities and/or link the U.S. and international BME communities.
- **Post-Doctoral:** Pursuing pre-professional post-doctoral work at a leading overseas institution.

## Biomedical Engineering Society's Annual Meeting Clinical Track

The Biomedical Engineering Society's Annual Meeting Clinical Track is jointly sponsored by the Warren Alpert Medical School of Brown University and the Biomedical Engineering Society (BMES).

The Alpert Medical School, an accredited provider by the Accreditation Council for Continuing Medical Education, is committed to presenting CME activities that promote quality improvements in health-care and are that are independent of control of commercial interests.

Platform Sessions and specific talks approved for *American Medical Association (AMA) PRA Category 1 Credit* are identified with the following symbol. 

**If you are a clinician and would like to submit for CME credit, please stop by the BMES registration desk for the complete packet of information.**

### CME ACCREDITATION

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the Warren Alpert Medical School of Brown University and the Biomedical Engineering Society. The Warren Alpert Medical School of Brown University is accredited by the ACCME to provide continuing medical education for physicians.

### CREDIT DESIGNATION

Physicians: The Warren Alpert Medical School of Brown University designates this live activity for a maximum of 18.5 *AMA PRA Category 1 Credits*.™ Physicians should only claim credit commensurate with the extent of their participation in the activity.

The following entire sessions have been approved for CME :

THURSDAY, OCTOBER 13  
TODAY'S HIGHLIGHTS**PLENARY SESSION** 8:00am - 9:30am  
Ballroom, Convention Center**Robert A. Pritzker**  
Distinguished Lecture  
Michael L. Shuler, PhD  
Cornell University**EXHIBIT HALL OPEN** 9:30am - 5:00pm  
Exhibit Hall, Convention Center**POSTER SESSION Thurs A** 9:30am - 1:00pm  
Exhibit Hall, Convention Center**PLATFORM SESSIONS Thurs-1** 10:30am - 12:00noon  
See pages 60-64, Convention Center**Celebration of Minorities  
in BME Luncheon** 12:00noon - 1:30pm  
*Additional ticket purchase required*  
Convention Center, Ballroom C**PLATFORM SESSIONS Thurs-2** 1:30pm - 3:00pm  
See pages 77-81, Convention Center**POSTER SESSION Thurs B** 1:30pm - 5:00pm  
Exhibit Hall, Convention Center**PLATFORM SESSIONS Thurs-3** 4:00pm - 5:30pm  
See pages 82-87, Convention Center**CAREER ALUMNI PANEL** 4:00pm - 5:30pm  
Ballroom C, Convention Center**RESUME WRITING  
WORKSHOP** 5:45pm - 7:15pm  
Ballroom C, Convention Center**BMES Town Hall  
& Award Ceremony** 5:45pm - 7:15pm**Hosted Receptions**  
*Invitation only***Thursday, October 13, 2011**9:30AM - 1:00PM  
POSTER SESSION – THU-A**Track: Cardiovascular Engineering****Cardiac Electrophysiology****PS-Thurs-A-1****Dauricine Suppresses Early After Depolarizations and Torsade de Pointes in Rabbit Hearts with Long QT2 Syndrome**A. PARIKH<sup>1,2</sup>, X.Y. YANG<sup>3</sup>, F.-D. ZENG<sup>3</sup> AND G. SALAMA<sup>2</sup><sup>1</sup> Department of Bioengineering, University of Pittsburgh, Pittsburgh, PA, <sup>2</sup>Department of Medicine, Cardiovascular Institute, University of Pittsburgh, PA, <sup>3</sup>Department of Pharmacology, Tongji Medical College, Huazhong University of Science and Technology, Wuhan, China**PS-Thurs-A-2****Temporal Evolution of Motor Evoked Potentials in Post Cardiac Arrest Rats**X. JIA<sup>1</sup>, Y. MA<sup>1</sup>, R. GEOCADIN<sup>1</sup>, AND N. V. THAKOR<sup>1</sup><sup>1</sup>Johns Hopkins University School of Medicine, Baltimore, MD**PS-Thurs-A-3****Hysteresis in Restitution of Action Potential Duration in a Human Ventricular Myocyte Model**A. AGARWAL<sup>1</sup>, AND A. PATWARDHAN<sup>1</sup><sup>1</sup>University of Kentucky, Lexington, KY**PS-Thurs-A-4****Adaptive Mesh Refinement for Modeling Electric Propagation in a Realistic Heart**M. A. FUNK<sup>1</sup>, AND K. T. NG<sup>1</sup><sup>1</sup>New Mexico State University, Las Cruces, NM**PS-Thurs-A-5****Effects of Phase Variation on Formation of Discordant Alternans**L. JING<sup>1</sup>, S. CHOURASIA<sup>1</sup>, A. AGARWAL<sup>1</sup>, AND A. PATWARDHAN<sup>1</sup><sup>1</sup>University of Kentucky, Lexington, KY**Track: Cardiovascular Engineering****Cardiac Structure and Function****PS-Thurs-A-6****Low Order Dynamical Model of the Left Ventricle**M. J. MOULTON<sup>1</sup>, AND T. W. SECOMB<sup>1</sup><sup>1</sup>University of Arizona, Tucson, AZ**PS-Thurs-A-7****Surface Deformation Analysis of the Mouse Heart via Computer Aided Speckle Interferometry**R. HARTNETT<sup>1</sup>, P. SWASZEK<sup>1</sup>, AND F. VETTER<sup>1</sup><sup>1</sup>University of Rhode Island, Kingston, RI**PS-Thurs-A-8****Investigation of the Collagen Structure of Right-Ventricular Myocardium**D. VALDEZ-JASSO<sup>1</sup>, H. C. HUNTER<sup>1</sup>, M. A. SIMON<sup>1</sup>, AND M. S. SACKS<sup>1</sup><sup>1</sup>University of Pittsburgh, Pittsburgh, PA

**Track: Cardiovascular Engineering****Cardiovascular Fluid Dynamics****PS-Thurs-A-9****Quantification of Variation of Blood Pressure Dynamics During Sleep Apnea**R. ALEX<sup>1</sup>, D. E. WATENPAUGH<sup>2</sup>, A. BASHABONYINA<sup>1</sup>, G. BHAVE<sup>1</sup>, M. AL-ABED<sup>1</sup>, S. IYER<sup>1</sup>, E. ALTUWAJRI<sup>1</sup>, R. ZHANG<sup>3</sup>, AND K. PLATFORM SESSION - THU - I

Track: Translational Biomedical Engineering –  
OP- Thurs-I-1Education and Promotion of Translational  
Biomedical Engineering I

Chair: Paul G. Yock

Convention Center – Room 11

Entrepreneurship and Product Development in Biomedical Engineering Programs – This session will feature a lively panel of faculty who lead BME programs and courses that have created environments that provide substantial experiential learning opportunities to support student engagement in translation and commercialization of biomedical innovations. Panelists will discuss emerging best practices in innovation, design, technology transfer and entrepreneurship in biomedical engineering education. This session is sponsored by the National Collegiate Inventors and Innovators Alliance (NCIIA).

Panelists include:

- Paul G. Yock, Martha Meier Weiland Professor of Medicine and Director of Biodesign, Stanford University
- Yousef Yazdi, Director of the Center for Bioengineering Innovation and Design (CBID), Johns Hopkins University
- Aileen Huang-Saad, Assistant Director of Academic Programs, College of Engineering Center for Entrepreneurship, University of Michigan
- Andrew DiMeo, Senior Design Director and Assistant Professor UNC/ NCSU Joint Department of Biomedical Engineering

## Track: Systems Biology, Bioinformatics and Computational Bioengineering – OP- Thurs-I-4

### High Throughput Genomics and Computational Proteomics

**Chairs:** Jason Papin, Matteo Pellegrini  
*Convention Center – Room 14*

#### 10:30AM Thurs-I-4-A

##### Metabolic Network Reconstruction and Genome-scale Model of Butanol-producing Strain *Clostridium beijerinckii* NCIMB 8052

C. B. MILNE<sup>1</sup>, J. A. EDDY<sup>1</sup>, H. P. BLASCHEK<sup>1</sup>, AND N. D. PRICE<sup>1</sup>

<sup>1</sup>University of Illinois, Urbana-Champaign, Urbana, IL

#### 10:45AM Thurs-I-4-B

##### Evaluation of Normalization Methods in microRNA-Seq Data

L. GARMIRE<sup>1</sup>, AND S. SUBRAMANIAM<sup>1</sup>

<sup>1</sup>University of California San Diego, La Jolla, CA

#### 11:00AM Thurs-I-4-C

##### Systems Analysis of Epithelial Cell Response to *Clostridium difficile* Toxins

K. D'AURIA<sup>1</sup>, G. DONATO<sup>1</sup>, M. GRAY<sup>1</sup>, G. KOLLING<sup>1</sup>, C. WARREN<sup>1</sup>, E. HEWLETT<sup>1</sup>, AND J. A. PAPIN<sup>1</sup>

<sup>1</sup>University of Virginia, Charlottesville, VA

#### 11:15AM Thurs-I-4-D

##### A Systems Approach to Identifying the Global Effects of Genetic Mutations on Cancer Metabolism

E. M. BLAIS<sup>1</sup>, R. W. TILGHMAN<sup>1</sup>, D. WALTERS<sup>1</sup>, T. W. BAUER<sup>1</sup>, J. T. PARSONS<sup>1</sup>, AND J. A. PAPIN<sup>1</sup>

<sup>1</sup>University of Virginia, Charlottesville, VA

#### 11:30AM Thurs-I-4-E

##### Analyzing DNA Methylation Profiles in Mice Using Reduced Representation Bisulfite Sequencing (RRBS)

P-Y. CHEN<sup>1</sup>, A. K. GANGULY<sup>1</sup>, L. RUBBI<sup>1</sup>, S. DEVASKAR<sup>1</sup>, AND M. PELLEGRINI<sup>1</sup>

<sup>1</sup>University of California, Los Angeles, Los Angeles, CA

#### 11:45AM Thurs-I-4-F

##### Robust Clustering of ERBB Phosphorylation Dynamics Predicts Protein Macromolecular Complex Formation and Reveals a Role for Novel Components of the ERBB Network

K. NAEGLER<sup>1</sup>, F. M. WHITE<sup>1</sup>, D. A. LAUFFENBURGER<sup>1</sup>, AND M. B. YAFFE<sup>1</sup>

<sup>1</sup>Massachusetts Institute of Technology, Cambridge, MA

## Track: Neural Engineering – OP- Thurs-I-5

### Cellular and Molecular Neurophysiology

**Chairs:** Lance Kam, David Schaffer  
*Convention Center – Room 15*

#### 10:30AM Thurs-I-5-A

##### Mapping Calcium-activated Potassium Channels (SK) in Living Neurons Using Single Molecule Force Spectroscopy

J. L. MACIASZEK<sup>1</sup>, A. TZINGOUNIS<sup>1</sup>, AND G. LYKOTRAFITIS<sup>1</sup>

<sup>1</sup>University of Connecticut, Storrs, CT

#### 10:45AM Thurs-I-5-B

##### Synaptic Pathway-Dependent Effects of DC Electric-Fields In Rat Cortical Brain Slices

A. RAHMAN<sup>1</sup>, D. REATO<sup>1</sup>, L. C. PARRA<sup>1</sup>, AND M. BIKSON<sup>1</sup>

<sup>1</sup>City College of New York, CUNY, New York, NY

#### 11:00AM Thurs-I-5-C

##### Multicompartmentalized Microfluidic Primary Culture Platform for the Study of Fast Axonal Transport in Neurons

H. CAICEDO<sup>1</sup>, T. SARMA<sup>1</sup>, G. PIGINO<sup>1</sup>, AND S. BRADY<sup>1</sup>

<sup>1</sup>University of Illinois at Chicago, Chicago, IL

#### 11:15AM Thurs-I-5-D

##### Spinal Neuronal Hyperexcitability is Induced Within 1 Day of a Painful Facet Joint Injury

N. CROSBY<sup>1</sup>, AND B. A. WINKELSTEIN<sup>1</sup>

<sup>1</sup>University of Pennsylvania, Philadelphia, PA

#### 11:30AM Thurs-I-5-E

##### Migration of Microglia Is Modulated by Amyloid Beta during the Progression of Alzheimer Disease

H. CHO<sup>1,2</sup>, E. HUDRY<sup>1</sup>, M. TONER<sup>1,2</sup>, H. T. BRADLEY<sup>1</sup>, AND D. IRIMIA<sup>1,2</sup>

<sup>1</sup>Massachusetts General Hospital, Charlestown, MA, <sup>2</sup>Harvard Medical School, Charlestown, MA

#### 11:45AM Thurs-I-5-F

##### Very-low Carbohydrate Diet Reduces Long-Term Potentiation in the Dentate Gyrus of Freely-behaving Rats

D. N. RUSKIN<sup>1</sup>, J. L. KORANDA<sup>2</sup>, S. A. MASINO<sup>1</sup>, AND J. H. BLAISE<sup>1</sup>

<sup>1</sup>Trinity College, Hartford, CT, <sup>2</sup>University of Chicago, Chicago, IL

## Track: Orthopedic and Rehabilitation Engineering – OP- Thurs-I-6

### Orthopedic Bioengineering

**Chairs:** Lawrence Bonassar, Pamela Yelick  
*Convention Center – Room 16*

#### 10:30AM Thurs-I-6-A

##### Enzyme-Sensitive Adhesives for On-Demand Separation in 3D Co-Culture Platforms

S. K. HAMILTON<sup>1</sup>, N. C. BLOODWORTH<sup>1</sup>, C. S. MASSAD<sup>1</sup>, T. M. HAMMOUDI<sup>1</sup>, H. LU<sup>1</sup>, AND J. S. TEMENOFF<sup>1,2</sup>

<sup>1</sup>Georgia Institute of Technology, Atlanta, GA, <sup>2</sup>Emory University, Atlanta, GA

#### 10:45AM Thurs-I-6-B

##### Analysis of Bone Ongrowth and Ingrowth of Retrieved Porous Tantalum-Coated Tibial Trays

J. A. HANZLIK<sup>1</sup>, D. W. MACDONALD<sup>1</sup>, J. S. DAY<sup>1,2</sup>, G. R. KLEIN<sup>3</sup>, H. B. LEVINE<sup>3</sup>, M. A. HARTZBAND<sup>3</sup>, C. M. RIMNAC<sup>4</sup>, J. PARVIZ<sup>5</sup>, AND S. M. KURTZ<sup>1,2</sup>

#### 11:00AM Thurs-I-6-C

##### Injury Risk from Repeated Axial Loading in the Lumbar Spine

A. L. SCHMIDT<sup>1</sup>, C. R. BASS<sup>1</sup>, K. A. LYONS<sup>1</sup>, G. PASKOFF<sup>2</sup>, AND B. SHENDER<sup>2</sup>

<sup>1</sup>Duke University, Durham, NC, <sup>2</sup>NAVAIR, Patuxent River, MD

#### 11:15AM Thurs-I-6-D

##### Inadequate Bone Compensatory Approaches to Diet-Induced Obesity

A. TSOI<sup>1</sup>, M. BOTROS<sup>1</sup>, E. FIEVISOHN<sup>1</sup>, M. CHAN<sup>1</sup>, AND C. RUBIN<sup>1</sup>

<sup>1</sup>Stony Brook University, Stony Brook, NY

#### 11:30AM Thurs-I-6-E

##### Bone Tissue Quality Determination of Mice Through Novel Reference Point Indentation Technique

M. LENDHEY<sup>1</sup>, J. BASTA-PLIAKIC<sup>1</sup>, O. KENNEDY<sup>1</sup>, D. BRIMER<sup>2</sup>, AND M. SCHAFFLER<sup>1</sup>

<sup>1</sup>The City College of CUNY, New York, NY, <sup>2</sup>Active Life Scientific Inc., Santa Barbara, CA

#### 11:45AM Thurs-I-6-F

##### Partial Preservation and Restoration of Bone Lost to Disuse with Bisphosphonate and Remobilization

P. E. PALACIO MANCHENO<sup>1</sup>, D. BAJAJ<sup>2</sup>, M. B. SCHAFFLER<sup>1</sup>, L. CARDOSO<sup>1</sup>, AND J. C. FRITTON<sup>2</sup>

<sup>1</sup>City College of New York, New York, NY, <sup>2</sup>New Jersey Medical School / University of Medicine & Dentistry of New Jersey, Newark, NJ

## Track: Biomedical Imaging and Optics – OP-Thurs-I-7

### Novel Biomedical Imaging and Microscopy

**Chairs:** Michael Choma, Elizabeth Hillman  
*Convention Center – Room 17*

#### 10:30AM Thurs-I-7-A

##### Optical Sensing of Cell Nano-Architecture During Early Carcinogenesis: Implications to Colorectal Cancer Screening

D. DAMANIA<sup>1</sup>, H. SUBRAMANIAN<sup>1</sup>, Y. ZHU<sup>1</sup>, L. CHERKEZYAN<sup>1</sup>, Y. STYPULA<sup>1</sup>, M. DELACRUZ<sup>2</sup>, C. A. WHITE<sup>1</sup>, P. PRADHAN<sup>1</sup>, H. K. ROY<sup>2</sup>, AND V. BACKMAN<sup>1</sup>

<sup>1</sup>Northwestern University, Evanston, IL, <sup>2</sup>Northshore University Healthsystem, Evanston, IL

#### 10:45AM Thurs-I-7-B

##### Real-time Optical-Sectioning Microscopy for Guiding Brain tumor Resection Using Molecular Probes

S. Y. LEIGH<sup>1</sup>, D. WANG<sup>1</sup>, M. J. MANDELLA<sup>2</sup>, O. SOLGAARD<sup>2</sup>, C. H. CONTAG<sup>2</sup>, AND J. T. LIU<sup>1</sup>

<sup>1</sup>Stony Brook University, Stony Brook, NY, <sup>2</sup>Stanford University, Stanford, CA

#### 11:00AM Thurs-I-7-C

##### Lensless Optical Tomography On a Chip

S. O. ISIKMAN<sup>1</sup>, W. BISHARA<sup>1</sup>, S. MAVANDADI<sup>1</sup>, F. W. YU<sup>1</sup>, S. FENG<sup>1</sup>, R. LAU<sup>1</sup>, AND A. OZCAN<sup>1</sup>

<sup>1</sup>University of California, Los Angeles, CA

#### 11:15AM Thurs-I-7-D

##### Photothermal Optical Coherence Tomography with Gold Nanorod Contrast Agents

J. TUCKER - SCHWARTZ<sup>1</sup>, T. MEYER<sup>1</sup>, C. DUVALL<sup>1</sup>, AND M. SKALA<sup>1</sup>

<sup>1</sup>Vanderbilt University, Nashville, TN

#### 11:30AM Thurs-I-7-E

##### Microfluidic Phenotyping of Cilia-Driven Fluid Flow Using Optical Coherence Tomography-Based Particle Tracking Velocimetry

S. JONAS<sup>1</sup>, D. BHATTACHARYA<sup>1</sup>, M. K. KHOKHA<sup>1</sup>, AND M. A. CHOMA<sup>1</sup>

<sup>1</sup>Yale University, New Haven, CT

#### 11:45AM Thurs-I-7-F

##### In Vivo Imaging of NIR FRET in Small Animals using Time-resolved Fluorescence Molecular Tomography

V. VENUGOPAL<sup>1</sup>, R. WANIEWSKI<sup>1</sup>, M. BARROSO<sup>2</sup>, AND X. INTES<sup>1</sup>

<sup>1</sup>Rensselaer Polytechnic Institute, Troy, NY, <sup>2</sup>Albany Medical College, Albany, NY

## Track: New Frontiers in Biomedical Engineering – OP-Thurs-I-8

### Immunobioengineering and Regenerative Medicine

**Chairs:** Yupeng Chen, Frank Marini  
*Convention Center – Room 21*

#### 10:30AM Thurs-I-8-A

##### Enzyme-free Method for Amplifying Detection of Cytokines Released by Single Immune Cells *Ex Vivo*

J. CHOI<sup>1</sup>, K. R. LOVE<sup>1</sup>, Y. GONG<sup>1</sup>, T. M. GIERAHN<sup>1</sup>, AND J. LOVE<sup>1</sup>

<sup>1</sup>Massachusetts Institute of Technology, Cambridge, MA

#### 10:45AM Thurs-I-8-B

##### Stimulation of CD8+ T-cell Responses by Mucosal Vaccination Via Toll-Like Receptor Agonist-Carrying Nanoparticles

A. V. LI<sup>1</sup>, M. YEN<sup>1</sup>, J. VELAZQUEZ<sup>1</sup>, J. ELKHADER<sup>1</sup>, AND D. J. IRVINE<sup>1,2</sup>

<sup>1</sup>Massachusetts Institute of Technology, Cambridge, MA, <sup>2</sup>Howard Hughes Medical Institute, Chevy Chase, MD

#### 11:00AM Thurs-I-8-C

##### Identification of Therapeutic Agent that Expands Muscle Stem Cells in Bioengineered Niche Platform

B. D. COSGROVE<sup>1</sup>, P. M. GILBERT<sup>1</sup>, AND H. M. BLAU<sup>1</sup>

<sup>1</sup>Stanford University School of Medicine, Stanford, CA

#### 11:15AM Thurs-I-8-D

##### Engineered *In Vivo* Erythrocyte-Binding Antigen Induces Immune Tolerance

S. KONTOS<sup>1</sup>, K. Y. DANE<sup>1</sup>, AND J. A. HUBBELL<sup>1,2</sup>

<sup>1</sup>Ecole Polytechnique Fédérale de Lausanne, Lausanne, Switzerland, <sup>2</sup>University of Miami Miller School of Medicine, Miami, FL

#### 11:30AM Thurs-I-8-E

##### Poly(propylene) Sulfide Nanoparticles for Immunomodulating the Tumor Microenvironment

I. C. KOURTIS<sup>1</sup>, H. SACHIKO<sup>1</sup>, S. KONTOS<sup>1</sup>, J. A. HUBBELL<sup>1</sup>, AND M. A. SWARTZ<sup>1</sup>

<sup>1</sup>Ecole Polytechnique Fédérale de Lausanne, Lausanne, Switzerland

#### 11:45AM Thurs-I-8-F

##### Mechanosensitive Costimulation of T Lymphocytes

E. JUDOKUSUMO<sup>1</sup>, E. TABDANOV<sup>1</sup>, M. DREYER<sup>1</sup>, B. AGUILAR<sup>1</sup>, AND L. KAM<sup>1</sup>

<sup>1</sup>Columbia University in the City of New York, New York, NY

## Track: Tissue Engineering – OP-Thurs-I-9

### Host Response to Biomaterials

**Chairs:** Julie Babensee, Lijie Zhang  
*Convention Center – Room 22*

#### 10:30AM Thurs-I-9-A

##### Polymethacrylates Mediated Differential Dendritic Cell Phenotype Through Distinct Transcription Factor Activation Profiles

P. KOU<sup>1</sup>, R. PATEL<sup>1</sup>, N. PALLASSANA<sup>2</sup>, B. CUNNINGHAM<sup>2</sup>, J. KOHN<sup>2</sup>, AND J. E. BABENSEE<sup>1</sup>

<sup>1</sup>Georgia Institute of Technology, Atlanta, GA, <sup>2</sup>Rutgers University, Piscataway, NJ

PLATFORM SESSION - THU - 2

**Track: Translational Biomedical Engineering – OP-Thurs-2-1****Education and Promotion of Translational Biomedical Engineering II****Chair:** Phil Weilerstein*Convention Center – Room 11*

Student Engagement in Translation and Commercialization – A panel of student innovators who launched technologies and products will discuss the process of translating research innovations to commercially viable products and businesses as university students. Speakers will include BMEidea competition award winning innovators and others who led the translation of breakthrough technologies to successful commercial outcomes. Speakers will address the development of research based ideas from science to commercially viable innovations with impact on health-care delivery, the personal development that they experienced in doing so and the factors in the educational environment that supported their success. This session is sponsored by the National Collegiate Inventors and Innovators Alliance (NCIIA). Panelists include:

- Phil Weilerstein, Executive Director, National Collegiate Inventors and Innovators Alliance (NCIIA)
- Matthew Callaghan, Founder, One Breath
- Brian Mullen, Founder and CEO, Therapeutic Systems
- Gerard Cote, Professor and Department Head, Biomedical Engineering, Texas A&M University

## Track: Systems Biology, Bioinformatics and Computational Bioengineering – OP-Thurs-2-4

### Image-based Modeling and Characterization for Biomedicine

**Chairs:** Brian P. Helmke, Melissa Klein Gardner  
Convention Center – Room 14

#### 1:30PM Thurs-2-4-A

##### In-Vivo MRI-Based Models Of Infarcted Hearts Successfully Predict Optimal Ablation Site

H. J. AREVALO<sup>1</sup>, C. PARK<sup>1</sup>, R. BLAKE<sup>1</sup>, H. HALPERIN<sup>1</sup>, AND N. TRAYANOVA<sup>1</sup>  
<sup>1</sup>Johns Hopkins University, Baltimore, MD

#### 1:45PM Thurs-2-4-B

##### Biological Interpretation of Image Biomarkers for Cancer Diagnosis

S. KOTHARI<sup>1</sup>, M. D. WANG<sup>2</sup>, AND J. H. PHAN<sup>2</sup>  
<sup>1</sup>Georgia Institute of Technology, Atlanta, GA, <sup>2</sup>Georgia Institute of Technology and Emory University, Atlanta, GA

#### 2:00PM Thurs-2-4-C

##### AAAVASC: A novel Integrated Approach for Image Based Modeling Toward Individualized AAA Rupture Risk Assessment

S. S. RAUT<sup>1</sup>, J. SHUM<sup>1</sup>, S. CHANDRA<sup>2</sup>, A. JANA<sup>3</sup>, P. LIU<sup>4</sup>, K. LEE<sup>1</sup>, E. S. DI MARTINO<sup>5</sup>, T. C. DOEHRING<sup>6</sup>, AND E. A. FINOL<sup>1</sup>

#### 2:15PM Thurs-2-4-D

##### Quantifying Rib Morphology Across Ages and Genders Using Image Segmentation and Registration Techniques

A. A. WEAVER<sup>1</sup>, C. NGUYEN<sup>1</sup>, C. L. WYATT<sup>2</sup>, AND J. D. STITZEL<sup>1</sup>  
<sup>1</sup>Virginia Tech-Wake Forest University Center for Injury Biomechanics, Winston-Salem, NC, <sup>2</sup>Virginia Tech, Blacksburg, VA

#### 2:30PM Thurs-2-4-E

##### Blood Clot Structure and Integrity as a Function of Intra-Thrombus Chemo-Transport and Local Stress Mechanics: Modeling Based On In-Vivo Imaging Under Flow

R. S. VORONOV<sup>1</sup>, T. J. STALKER<sup>2</sup>, L. F. BRASS<sup>2</sup>, AND S. L. DIAMOND<sup>1</sup>  
<sup>1</sup>University of Pennsylvania, Philadelphia, PA, <sup>2</sup>University of Pennsylvania School of Medicine, Philadelphia, PA

#### 2:45PM Thurs-2-4-F

##### Mechanical Characterization of Multi-Layered Biological Samples using Atomic Force Microscopy

J. DIAS<sup>1</sup>, D. GONZALEZ<sup>1</sup>, AND N. ZIEBARTH<sup>1</sup>  
<sup>1</sup>University of Miami, Coral Gables, FL

## Track: Neural Engineering – OP-Thurs-2-5

### Engineering the Neural Environment

**Chairs:** Ryan Gilbert, Erin Lavik  
Convention Center – Room 15

#### 1:30PM Thurs-2-5-A

##### Gradient-Engineered Synapse Formation in 3D Neural Cell Cultures

A. KUNZE<sup>1</sup>, A. VALERO<sup>1</sup>, AND P. RENAUD<sup>1</sup>  
<sup>1</sup>EPFL, Lausanne, Switzerland

#### 1:45PM Thurs-2-5-B

##### Neuronal Extracellular Matrix Synthesis and Deposition: Effects of Culture Dimensionality

S. BALASUBRAMANIAN<sup>1</sup>, N. VADALA<sup>1</sup>, AND J. B. LEACH<sup>1</sup>  
<sup>1</sup>University of Maryland Baltimore County, Baltimore, MD

#### 2:00PM Thurs-2-5-C

##### Guiding Neurites in Real-time with In Situ Multiphoton Photofabricated Topographies

M. ALI<sup>1</sup>, AND J. B. SHEAR<sup>1</sup>  
<sup>1</sup>University of Texas, Austin, TX

#### 2:15PM Thurs-2-5-D

##### Multi-Protein Nanoarrays to Study Axonal Preference

S. G. RICOULT<sup>1</sup>, J. P. CORREIA<sup>1</sup>, T. E. KENNEDY<sup>1</sup>, AND D. JUNCKER<sup>1</sup>  
<sup>1</sup>McGill University, Montreal, QC, Canada

#### 2:30PM Thurs-2-5-E

##### Intervertebral Disc Annular Yield May Play a Role in Lumbar Spine Segmental Instability

S. M. GONZALEZ<sup>1,2</sup>, J. L. BAISDEN<sup>1</sup>, AND B. D. STEMPEL<sup>1</sup>  
<sup>1</sup>MEDICAL COLLEGE OF WISCONSIN, MILWAUKEE, WI, <sup>2</sup>MILWAUKEE SCHOOL OF ENGINEERING, MILWAUKEE, WI

#### 2:45PM Thurs-2-5-F

##### Mechanical Induction of SH-SY5Y Cell Neurogenesis

S. HIGGINS<sup>1</sup>, J. LEE<sup>1</sup>, AND J. LIM<sup>1</sup>  
<sup>1</sup>University of Nebraska-Lincoln, Lincoln, NE

## Track: Orthopedic and Rehabilitation Engineering – OP-Thurs-2-6

### Orthopedic Imaging

**Chairs:** Hani Awad, Irene Georgakoudi, Mark Grinstaff  
Convention Center – Room 16

#### 1:30PM Thurs-2-6-A

##### Imaging of Angiogenic and Osteoblastic Parameters in a Model of Osteoarthritis

J. P. DYKE<sup>1</sup>, M. SYNAN<sup>1</sup>, P. EZELL<sup>1</sup>, D. BALLON<sup>1</sup>, AND R. K. AARON<sup>2</sup>  
<sup>1</sup>Weill Cornell Medical College, New York, NY, <sup>2</sup>Brown Medical School, Providence, RI

#### 1:45PM Thurs-2-6-B

##### A Method for Ultra-high Resolution Assessment of Cartilage Thickness in Small Animal Joints *ex vivo*

X. I. GU<sup>1,2</sup>, D. J. LEONG<sup>1,2</sup>, P. PALACIO<sup>1</sup>, N. MALDONADO<sup>1</sup>, E. WILLIAMS<sup>1</sup>, H. B. SUN<sup>1,2</sup>, AND L. CARDOSO<sup>1</sup>

**OP-Thurs-3-14****Whitaker International Fellows and Scholars Program: Funding Opportunity for Young Biomedical Engineers**

*Convention Center, Room 12*

Initially funded by the Whitaker Foundation, the Whitaker Fellows and Scholars Program is managed by the Institute of International Education (IIE) and supports international collaboration in the growing field of biomedical engineering. For all levels of emerging bioengineers, from graduating seniors to post-doctorate degree-holders in biomedical engineering, the Whitaker Program provides funding to U.S. citizens and permanent residents to undertake activities overseas directly related to the field. Past awards have included research in heart blood flow, improved prosthetic leg design, and development of affordable oral cancer screening tools. Projects are implemented worldwide, including countries like Australia, China, Kenya, Switzerland, the UK and Vietnam. The Whitaker Session will feature a panel of current and former Whitaker Program participants who will present their research projects, talk about their grant experience and offer application tips.

10:30AM - 12:00PM

PLATFORM SESSION - FRI - I

Track: Cellular and Molecular Engineering  
- OP - Fri - I - I

## Mechanotransduction &amp; Mechanobiology - I

Chairs: Robert Mauck, Nadine Chahine  
Convention Center - Room 11

10:30AM Fri - I - I - A

## Shear Stress Modulates RAGE-induced Inflammation in a Model of Diabetes-induced Metabolic Stress

J. S. DEVERSE<sup>1</sup>, K. BAILEY<sup>1</sup>, K. JACKSON<sup>1</sup>, AND A. PASSERINI<sup>1</sup><sup>1</sup>University of California, Davis, Davis, CA

10:45AM Fri - I - I - B

## Shear-Induced Resistance to Neutrophil Activation via the Formyl Peptide Receptor

M. J. MITCHELL<sup>1</sup>, AND M. R. KING<sup>1</sup><sup>1</sup>Cornell University, Ithaca, NY

11:00AM Fri - I - I - C

## Effects of Fluid Shear on Cardiac Myocytes Expressing Disease-Causing Plakoglobin Mutations

V. HARIHARAN<sup>1</sup>, A. ASIMAKI<sup>2</sup>, J. E. SAFFITZ<sup>2</sup>, AND H. HUANG<sup>1</sup><sup>1</sup>Columbia University, New York, NY, <sup>2</sup>Beth Israel Deaconess Medical Center, Boston, MA

## Models and Practices of Commercialization and Entrepreneurship

**Chair:** Mostafa Analoui  
*Marriott – Ballroom A*

Nanomedicine: Clinical Translation, Regulatory, and Investment Perspectives – Nanotechnology is impacting a wide range of sectors from energy, defense, materials, to life sciences. Nanotechnology applications in life sciences have brought together set of key sectors and as well as challenges. This session is designed to offer a series of unique views from three different, yet inter-related perspectives. Presenters will be sharing key activities within each of their respective institutions and companies, representing academic research, emerging biotech and clinical translation of therapeutic and diagnostic products, regulatory views and landscape in the business, federal and venture investment. In this panel discussion, key clinical science, business, and regulatory leaders will be discussing their current state of affairs, key challenges for moving forward, and the future trends. This session will conclude with a Q&A session providing opportunity for direct interaction between attendees and panelists. Panelists include:

- **Mostafa Analoui**, Head of Healthcare and Life Sciences  
*The Livingston Group*
- **Rutledge Ellis-Behnke**, Director  
*Nanomedicine Translational Think Tank*
- **Augenkllinik Mannheim**

## Translational Biomedical Engineering: Research to Practice (R2P) - Personalized Medicine in Real Time: A system engineering approach to enable gene-guided healthcare

**Chair:** Gualberto Ruano  
*Marriott – Ballroom B*

Personalized Medicine in Real Time: A system engineering approach to enable gene-guided healthcare – One of the promises of the Human Genome Project is individualization of patient care based on highly heterogeneous innate metabolic factors determined by DNA typing of gene polymorphisms. The practice of DNA-guided medicine requires the translation of such gene polymorphism into clinical decision support for personalized healthcare. Pharmacogenetics serves as the foundation for the most clinically advanced application of DNA-guided medicine. Located at Hartford Hospital, the Laboratory of Personalized Health (LPH), performs clinical DNA typing for pharmacogenetic case referrals and provided web-based decision support tools via its Portal of Personalized Health. Operational since October 2005, LPH has already diagnosed drug metabolism capacities for nearly 3000 patients referred by physicians at throughout Connecticut through a partnership with Clinical Laboratory Partners. The hepatic cytochrome P450 (CYP450) isoenzymes CYP2D6, CYP2C9, and CYP2C19 metabolize, inactivate many drugs (including antidepressants, antipsychotics, anticoagulants, antiplatelets, and analgesics) and also activate pro-drugs (e.g. codeine into morphine) into their active metabolites. These isoenzymes are highly polymorphic in gene sequence and protein structure. Their resultant variable biochemical properties substantially alter individual patient drug response. Inherited common variations in DNA result in extremes of enzymatic activity with resultant highly deficient or ultra rapid drug metabolism. DNA typing is valuable in the diagnosis of patients refractive to psychotropic therapy or prone to recurrent side effects. Therapy can be directed to drugs whose primary metabolic pathway is least deficient or normal in an individual patient. The evolutionary synergy of energy conservation and detoxification with appetite and food seeking behaviors has led to unexpected interactions in drug responses. Pharmacogenetics research suggests that drug responses in cardiometabolic and neuroendocrine axes may lead to the desired efficacy in one axis but undesired side effects in the other. Examples will be presented on the cardiometabolic side effects of psychiatric medications and the neuroendocrine side effects of lipid-lowering and diabetic drugs. Panelists include:

- **Gualberto Ruano**, President and CEO, Genomas Inc.,  
Director of Genetics Research, Hartford Hospital
- **Greg Makowski**, Clinical Laboratory Partners
- **John Goethe**, Institute of Living
- **Paul Thompson**, Hartford Hospital

Sponsored by Coulter Foundation – This session will feature three invited Principle Investigators, or BME Program Heads, from three of the ten institutions that received the Coulter Foundation Translational Partnership Award. Presenters will describe work done towards Program development, translational research, and all the lessons learned along the way. There will be ample time allowed for a Question/Answer period with the three panelists.

## Track: Devices: Nano to Micro UNDERGRADUATE POSTERS

### Devices: Nano to Micro

#### PS – Sat – B – 1

##### Extending the Shelf-Life of PCR Mixtures for Lab-on-a-Chip Applications

S. E. HAYWOOD<sup>1</sup>, AND N. CREWS<sup>1</sup>

<sup>1</sup>Louisiana Tech University, Ruston, LA

#### PS – Sat – B – 2

##### Study of the Fundamental Chemical and Physical Interactions Between Advanced Nanoparticles

A. WASHISPACK<sup>1</sup>, A. SAMANT<sup>1</sup>, AND A. MALSHE<sup>1</sup>

<sup>1</sup>University of Arkansas, Fayetteville, AR

#### PS – Sat – B – 3

##### "Proximity Activated" Smart Nanoparticle for the Delivery of siRNA to Metastatic Tumor Cells

T. WERFEL<sup>1</sup>, H. LI<sup>2</sup>, C. NELSON<sup>2</sup>, AND C. DUVAL<sup>2</sup>

<sup>1</sup>Murray State University, Murray, KY, <sup>2</sup>Vanderbilt University, Nashville, TN

#### PS – Sat – B – 4

##### Synthesis of Oxidized Alginate Microbeads

J. UNGERLEIDER<sup>1,2</sup>, O. KHANNA<sup>2</sup>, AND E. M. BREY<sup>2</sup>

<sup>1</sup>University of Virginia, Charlottesville, VA, <sup>2</sup>Illinois Institute of Technology, Chicago, IL

#### PS – Sat – B – 5

##### Magnetic Nanoparticles Coated with Antibiotics to Treat Bacterial Infections on Medical Implants

T. TSENG<sup>1</sup>, K. LEUBA<sup>2</sup>, E. TAYLOR<sup>2</sup>, AND T. WEBSTER<sup>2</sup>

<sup>1</sup>Duke University, Durham, NC, <sup>2</sup>Brown University, Providence, RI

#### PS – Sat – B – 6

##### Towards Designing a Muco-Specific Platform for the Treatment of *Helicobacter Pylori*

Y. CHAUHAN<sup>1</sup>, E. QUIJANO<sup>1</sup>, AND T. FAHMY<sup>2</sup>

<sup>1</sup>Yale University, New Haven, CT, <sup>2</sup>Yale School of Engineering and Applied Sciences, New Haven, CT

#### PS – Sat – B – 7

##### Capture of Circulating Tumor Cells Using a Microfluidic Chip with Wavy Surface

D. DEPIETRO<sup>1</sup>, Y. LIU<sup>1</sup>, S. YANG<sup>2</sup>, C-M. CHEN<sup>2</sup>, A. THOMAS<sup>1</sup>, AND X. CHENG<sup>1</sup>

<sup>1</sup>Lehigh University, Bethlehem, PA, <sup>2</sup>University of Pennsylvania, Philadelphia, PA

#### PS – Sat – B – 8

##### A Comparative Analysis of Quantum Dots to Fluorescent Dyes in a Microfluidic Immunoassay Device

I. JOHNSTON<sup>1</sup>, R. GUPTA<sup>1</sup>, AND J. ZAHN<sup>1</sup>

<sup>1</sup>Rutgers University, Piscataway, NJ

#### PS – Sat – B – 9

##### Analysis of 3D Bubble Dynamics Relevant to Cell Manipulation in Microfluidics

D. K. PIECH<sup>1</sup>, G. N. SANKIN<sup>1</sup>, AND P. ZHONG<sup>1</sup>

<sup>1</sup>Duke University, Durham, NC

#### PS – Sat – B – 10

##### Functionalization of Gold Nanorods with Thermoresponsive PolyNIPAAm to Improve Photothermal Ablation

T. A. MEYER<sup>1</sup>, J. W. STONE<sup>2</sup>, AND C. L. DUVAL<sup>1</sup>

<sup>1</sup>Vanderbilt University, Nashville, TN, <sup>2</sup>Armstrong Atlantic State University, Savannah, GA

#### PS – Sat – B – 11

##### Design and Fabrication of a Continuous Microfluidic Formulator Device

W. J. MATLOFF<sup>1</sup>, K. SEALE<sup>1</sup>, AND J. WIKSWO<sup>1</sup>

<sup>1</sup>Vanderbilt University, Nashville, TN

#### PS – Sat – B – 12

##### Microwave Absorption and Surface Enhanced Raman Scattering in Silver Nanoparticles

S. SCHRAER<sup>1</sup>, M. FIGUEROA<sup>2</sup>, K. POURREZAEI<sup>2</sup>, AND S. TYAGI<sup>2</sup>

<sup>1</sup>Villanova University, Villanova, PA, <sup>2</sup>Drexel University, Philadelphia, PA

#### PS – Sat – B – 13

##### Design and Calibration of a Microfluidics-Based Viscometer

S. BRAY<sup>1</sup>, S. CHO<sup>1</sup>, A. ZHANG<sup>1</sup>, AND E. SALDIVAR<sup>1</sup>

<sup>1</sup>West Wireless Health Institute, La Jolla, CA

#### PS – Sat – B – 14

##### Microrocket-Enabled Capture and Isolation of Pancreatic Cancer Cells

D. KANG<sup>1</sup>, D. KAGAN<sup>1</sup>, S. BALASUBRAMANIAN<sup>1</sup>, AND J. WANG<sup>1</sup>

<sup>1</sup>University of California, San Diego, La Jolla, CA

#### PS – Sat – B – 15

##### Ratiometric Optofluidic Device for Glucose Monitoring

A. VAN<sup>1</sup>, AND D. HENTHORN<sup>2</sup>

<sup>1</sup>Texas A&M, College Station, TX, <sup>2</sup>Saint Louis University, Saint Louis, MO

#### PS – Sat – B – 16

##### Microdevice for the Examination of Cells at Varying Oxygen Tensions

### Orthopedic & Rehabilitation Engineering

#### PS – Sat – B – 93

##### Pacemaker Waveform for Rapid Entrainment of Smooth Oscillators

V. T. DAHLEN<sup>1,2</sup>, AND I. Z. KISS<sup>2</sup>

<sup>1</sup>University of Iowa, Iowa City, IA, <sup>2</sup>Saint Louis University, St. Louis, MO

#### PS – Sat – B – 94

##### Electromyographic Responses to Rotational and Translational Perturbations

E. M. SCHNELLINGER<sup>1</sup>, J. L. ROCHE<sup>2</sup>, AND M. S. REDFERN<sup>2</sup>

<sup>1</sup>University of Rochester, Rochester, NY, <sup>2</sup>University of Pittsburgh, Pittsburgh, PA

#### PS – Sat – B – 95

##### Low Intensity Vibration Reduces Bone Loss in Obese Mice by Attenuating Osteoclast Development

M. CHEUNG<sup>1</sup>, K. KAWATRA<sup>1,2</sup>, A. H. TSOI<sup>1</sup>, M. E. CHAN<sup>1</sup>, AND C. T. RUBIN<sup>1</sup>

<sup>1</sup>Stony Brook University, Stony Brook, NY, <sup>2</sup>University of Minnesota, Minneapolis, MN

#### PS – Sat – B – 96

##### Low Intensity Vibrations Attenuate Adverse Effects of Obesity on B-Cell Lymphopoiesis & Maturation

K. KAWATRA<sup>1,2</sup>, M. CHEUNG<sup>1</sup>, M. E. CHAN<sup>1</sup>, D. GREEN<sup>1</sup>, B. ADLER<sup>1</sup>, AND C. T. RUBIN<sup>1</sup>

<sup>1</sup>Stony Brook University, Stony Brook, NY, <sup>2</sup>University of Minnesota, Minneapolis, MN

#### PS – Sat – B – 97

##### Sensitivity of Wheelchair Propulsion Kinetics to Increased Physiological Demands.

J. H. BRYANT<sup>1</sup>, M. S. NASH, PHD.<sup>1</sup>, AND R. E. COWAN, PHD.<sup>1</sup>

<sup>1</sup>The Miami Project to Cure Paralysis, Miami, FL

#### PS – Sat – B – 98

##### Effect of Age and Exercise on the Viscoelastic Properties of Rat Tail Tendon

A. S. LACROIX<sup>1</sup>, S. DUENWALD-KUEHL<sup>1</sup>, S. BRICKSON<sup>1</sup>, R. LAKES<sup>1</sup>, AND R. VANDERBY JR.<sup>1</sup>

<sup>1</sup>University of Wisconsin-Madison, Madison, WI

#### PS – Sat – B – 99

##### Electrospun Thin Films for Biodegradable Magnesium Implants

C. A. GARDNER<sup>1</sup>

<sup>1</sup>NC State University, Raleigh, NC

#### PS – Sat – B – 100

##### Finite Element Analysis of Low Intensity Pulsed Ultrasound Treatment on Hind Limb Suspend Mice

D. HWANG<sup>1</sup>, S. UDDIN<sup>1</sup>, AND Y-X. QIN<sup>1</sup>

<sup>1</sup>Stony Brook University, Stony Brook, NY

#### PS – Sat – B – 101

##### Strain Dependence of Articular Cartilage Tensile Modulus Following GAG Depletion

B. BERG-JOHANSEN<sup>1</sup>, Q. NGUYEN<sup>2</sup>, A. CHEN<sup>2</sup>, S. HAZELWOOD<sup>1</sup>, S. KLISCH<sup>1</sup>, AND R. SAH<sup>2</sup>

<sup>1</sup>California Polytechnic State University, San Luis Obispo, CA, <sup>2</sup>University of California, San Diego, La Jolla, CA

<sup>1</sup>University of Maryland, College Park, MD

#### PS – Sat – B – 105

##### Increase in Bone Marrow Adiposity as Caused by Irradiation is Mitigated by Low Intensity Vibration

J. LENNON<sup>1</sup>, D. GREEN<sup>2</sup>, M. E. CHAN<sup>2</sup>, AND C. T. RUBIN<sup>2</sup>

<sup>1</sup>Stony Brook University, West Babylon, NY, <sup>2</sup>Stony Brook University, Stony Brook, NY

#### PS – Sat – B – 106

##### Design Criteria for Preventing Friction-induced Squeak of Ceramic-on-Ceramic Hip Implants

M. A. SIDEBOTTOM<sup>1</sup>, AND M. PALIWAL<sup>1</sup>

<sup>1</sup>The College of New Jersey, Ewing, NJ

#### PS – Sat – B – 107

##### In Vitro Biomechanical Analysis of Repeated Dislocation/Reduction in Constrained Hip Arthroplasty

J. C. IVESTER<sup>1</sup>, M. FINN<sup>2</sup>, F. R. VOSS<sup>2</sup>, K. A. RUSAW<sup>1</sup>, R. J. RUSLY<sup>1</sup>, AND J. D. DESJARDINS<sup>1</sup>

<sup>1</sup>Clemson University, Clemson, SC, <sup>2</sup>University of South Carolina, Columbia, SC

#### PS – Sat – B – 108

##### The Effects of Water Content on the Mechanics and Microstructure of Bone

A. O. OJE<sup>1</sup>, N. LEE<sup>1</sup>, S. PATNAIK<sup>1</sup>, J. LIAO<sup>1</sup>, AND L. N. WILLIAMS<sup>1</sup>

<sup>1</sup>Mississippi State University, Starkville, MS

#### PS – Sat – B – 109

##### Biomechanical Assessment of Tibial Component Slope in Unicompartmental Knee Arthroplasty

**Sponsored by Coulter Foundation** – This session will serve as a companion to the previous Coulter Foundation session (on Friday) and will consist of another three invited Principle Investigators who have participated in the Coulter Translational Research Award program. This is a national competition which provides “gap” funding to reduce the risks in the technology and make it market ready. Awardees will make presentations on their projects and lessons learned about translational research. There will be ample time allowed for a Question/Answer period with the three panelists.
