

2025 January Meeting Webinar

Saturday, January 18, 2025 ~ 9:00 am - 4:00 pm PST

This course meets the DBC's requirements for 6 units of CE

Speaker
Sponsor:

“Digital Workflow and How to Better Incorporate in our OMS Office”

Invite Your Restorative Colleagues to Attend at the Member Price!

Vishtasb Broumand, DMD, MD

This is a comprehensive, detailed, step-by-step program on restoring full arch Hybrid implant cases using a completely digital workflow. We will discuss virtual surgery, digital restorative protocols, including intraoral scanning, photogrammetry, 3D printing of temporary teeth followed by staining and glazing of the teeth. You will discover how to restore full arch implant cases in the Maxilla and Mandible utilizing Digital Dentistry. Our simple digital workflow eliminates messy denture conversion and you and your staff will learn to perform the step-by-step process to make it possible to perform in your office.

What each participant will learn in the course:

- Digital Workflow for All on X procedures without an in-house dedicated lab technician utilizing photogrammetry, grammetry and intraoral scanning.
- How to restore severely atrophic maxilla with Zygomatic and Pterygoid implants utilizing 3D printers.
- Dental Assistant Training to take intraoral scans and help you on how to restore All on X Hybrids. No lab tech needed.

Speaker Bio: Vishtasb Broumand, DMD, MD serves as Medical Director of the Oral and Maxillofacial Surgery at the University of Arizona, Banner University Medical Center. He is also the editor for “Atlas of the Oral and Maxillofacial Surgery Clinics”, and the editor for the “Clinics of Oral and Maxillofacial Surgery” for three volumes from 2025 through 2026, on the topic of Implant Solutions for Complex Cases: Graftless Solutions, Solutions with Grafting and Digital Workflows to be published by Elsevier Inc. He devotes most of his clinical practice to the comprehensive treatment of patients with missing teeth using Zygomatic, Pterygoid, Patient Specific and Conventional dental implants with the latest digital workflow and technology. In 2018 he founded an advanced dental implant training center “Total Dental Implant Solutions” in Phoenix, AZ. He has trained close to 500 surgeons during live surgery courses in the USA and overseas on Zygomatic, Pterygoid, Patient Specific and conventional Full Arch Dental Implants and teaches all attendees his digital workflow as well at the Desert Ridge Oral Surgery Institute.

Max Kempf, RDT, MA

Comprehensive overview of cutting edge fully digital full arch implant restoration workflows - start your case with 3D visualized final. Featuring face driven, bone dictated waxups, 3D implant planning with stackable guides, immediate load with photogrammetry, easy path to definitive restorations, Zygomatic and pterygoid options.

What each participant will learn in the course:

- Fully digital AOX surgical plan with various guide options.
- Do's and don'ts - fool-proof AOX surgery - avoid common mistakes and recover from complications.
- Let digital technology take off pressure from you and your referrals.

Speaker Bio: Max Kempf, RDT, MA is a passionate industry expert, who consults and trains dental professionals and offers innovative turn-key full arch implant solutions: from digital wax-ups, virtual implant placement, stackable surgical guide design and production, through photogrammetry to final state of the art model-less digital restorations. Max mentors a great team of technicians to achieve cutting edge results and caters to customers at every level of expertise.
