

# PRINT IT CHAIRSIDE

A 3D printer for in-clinic production.

## Over 500 materials available.

Experience the widest choice of materials on the market with unlimited and unrestricted access to many industry-leading materials for a variety of applications. Future-proof your business and stay up-to-date with the latest validated 3D print materials thanks to Asiga's Open Material Architecture.

### 4K Imaging Resolution

The latest high resolution imaging chipset delivers extraordinary resolution over a large build envelope.

### Active Layer Monitoring

Asiga's pioneering Smart Positioning System (SPS™) achieves precise layer thickness control of each and every layer, ensuring optimal print accuracy and speed.

### Auto-Calibrating UV LED

Combining the latest generation of high-power ultraviolet solid-state light sources with an integrated radiometer ensures years of consistent printing performance.

### DLP Micromirror Technology

Achieve the highest standard of reliability with the broadest wavelength capability of any imaging technology.

Asiga Ultra 50 - \$14,990
