

# STAY IN THE PROCESS

Design restorations in-house with exocad.

Take your practice to the next level.

Exocad is single-visit dentistry and much more. Utilize the software for design, collaboration with your preferred lab, esthetic planning and for communication with patients. exocad software serves as the centerpiece of your digital workflows.

## Single-visit treatments

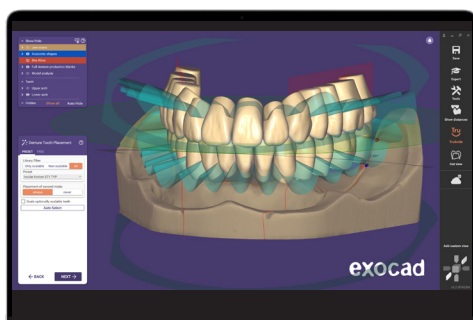

Design beautiful and functional dental restorations, such as crowns, bridges, copings, veneers, inlays, onlays, pontics, provisionals and dental appliances.

## User-friendly

Benefit from the intuitive, guided approach of exocad that offers you maximum ease of use and consistent results. exocad's proven wizard-based workflow guides you through every step of the CAD/CAM process.

## Seamless integration

Maximize your return on hardware investments with exocad. With its open software architecture, all design data is exported in an STL file format. This allows you to manufacture your restorative designs on almost any open 3D printer or milling machine.

exocad Ultimate Bundle - \$6,520.00
