

Manufacturing Machine Operator (HAAS) Program

Accelerate your career with our SUNY Orange Plus programs, crafted to efficiently train or upskill you for a rewarding career with a sustainable salary and comprehensive benefits to succeed in a competitive work market. Join the ranks of our alumni who have launched or enhanced their careers upon completion of our practical classes and degree programs.

Our Manufacturing Machine Operator (HAAS) Program is strategically designed by SUNY Orange and partners so students can complete a series of courses in as little as 4 weeks with convenient hours for workforce development. Covering fundamental topics such as shop math, assembly, maintenance, machining, inspection, and more, this industry-driven certification demonstrates that the individual has basic knowledge of manufacturing and may be an ideal candidate for entry-level manufacturing employment.

Course Length: 4 weeks

Cost: \$3,399

Average Salary: \$48,500

Scholarships are available to those who qualify.

DESIGN FOR MANUFACTURING

Learn the basics in design for manufacturing including topics such as Isometric, Orthographic, Oblique, 3D Modeling, Blueprint Reading, AutoCAD Standard and Fusion 360.
