

Mike Caskey

Having been around systems for over 50 years, I've had the opportunity to see and be involved with a wide variety of technology. While at the Stanislaus County Office of Education, I was blessed with an incredible staff and we were able to provide services to all the districts in the county, with the exception of Modesto City Schools. We developed some "cool" applications and, in general, had a lot of fun doing great things for our customers.

I joined CETPA as the MIS Sig Chair (Some may remember Sigs). Over the years, I was fortunate enough to hold most of the board positions. The highlight of my professional career was serving as CETPA President in 2003. Another highlight was serving on the committee that developed the CTO Mentor Program, and then serving as an instructor for the first cohort. CETPA has been an incredibly important part of my life and I am very grateful that I have been part of such an exceptional organization.

BA Degree, Mathematics – San Jose State College 1968

MS Degree, Computer Science – San Jose State University 198

Programmer Analyst, Project Manager - County of Santa Clara 1965-1981

Adjunct Instructor, Computer Science – San Jose State University, Evergreen Valley College, Modesto Junior College, San Joaquin Delta College 1976 (I think) - present

IS Director – Stanislaus County Office of Education 1981 – 2003
