

# Data Security Managed Services: Identify. Classify. Monitor.

**Gartner predicts by 2027, Agent Sprawl will be one of the top identified risks for an organizations MS365 deployment**

## SUMMARY:

Forsyte's Guardian 365 Data Security Managed Service leverages Microsoft Purview and Guardian 365 24x7 monitoring, detection, and response activities to provide comprehensive data security and governance across the Microsoft 365 suite, with extensibility to hybrid and multi-cloud environments. By unifying Microsoft Purview's capabilities into three strategic pillars: Data Loss Prevention, Sensitivity Labeling, and Insider Risk Management, Guardian 365 offers a streamlined, cost-effective approach to safeguarding sensitive data, backed by 24x7 expert monitoring.

## OFFERING:

Guardian 365 Data Security Managed Services secures your data estate through onboarding, ongoing monitoring and remediation, and advanced features powered by Microsoft Purview. This additional service ensures that you have visibility to your sensitive data, how it is classified, where it is moving, who has access to it, and how it is retained, 24x7.

## ONBOARDING: THE INITIAL SETUP INCLUDES

- Data Discovery and Classification. Automate the discovery and classification of sensitive data across Microsoft 365 applications and connected third-party services.
- Risk Assessment. Identify data security gaps, insider threats, and infrastructure vulnerabilities.
- Policy Configuration. Enforce policies across multiple products including Data Loss Prevention (DLP), Sensitivity Labels, Insider Risk Management (IRM), and Communications Compliance.
- Copilot. Monitor & govern the usage of generative AI tools, such as Microsoft 365 Copilot, and their access to organizational data.

## ONGOING SUPPORT

Guardian 365 leverages Microsoft Purview's real-time, AI-powered insights to detect data security risks across Microsoft 365 and connected environments. Additional support includes quarterly policy optimization, monthly reporting, 24x7x365 monitoring for critical data security threats, and up to 4 support hours per month for tuning purposes.

## YOUR DATA IS YOUR MOST VALUABLE ASSET.

Guardian 365 leverages Purview DSPM's real-time, AI-powered insights to detect data security risks across Microsoft 365 and connected environments. Additional support includes quarterly policy optimization, monthly reporting, and up to 4 billable hours monthly for tuning

*"Working with Forsyte is a breath of fresh air. My team can sleep at night while their SOC looks over our environment and acts as necessary. They're a competent organization that has leveraged our Microsoft A5 license to the fullest and saved us money by not paying for other third-party products."*
