

# Patch Management: Secure. Streamline. Succeed.

## SUMMARY:

In today's fast-paced digital environment, unpatched systems are one of the most common entry points for cyberattacks. Patch management is the proactive process of identifying, acquiring, testing, and deploying software updates to ensure your systems remain secure, compliant, and optimized.

At Forsyte, we understand that security is not a one-time event—it's a continuous commitment. Our patch management service was born out of a need we saw across our customer base: organizations struggling to keep up with the volume and complexity of software updates. By offering this service, we help our clients reduce risk, maintain compliance, and focus on what they do best—without worrying about vulnerabilities lurking in outdated systems.

## OFFERING:

Guardian 365 Patch Management ensures that your operating systems and critical updates for your Windows, macOS, and Linux machines are continuously updated, minimizing vulnerabilities from unpatched software. Forsyte's approach is simple, we will pull a list of patches, prioritize them, collaborate with your team, and push patches out on a regular cadence. This exciting new addition is another way that Guardian 365 is an extension of your team, ensuring that you have the support you need 24x7.

# GUARDIAN365 Patch Management

## Secure. Streamline. Succeed.

### OFFERING INCLUDES:

- Evaluation, Assessment, and Planning. Review, categorize, and prioritize devices.
- Deploy Device Management Workload. Enroll devices and deploy Intune, Azure ARC, and Azure Update Manager.
- 24x7 Ongoing Monitoring. Reduce risk of managed endpoints.

### ONGOING SUPPORT

Guardian 365 Patch Management will include a number of designated service hours per month, automated management of operating system patching for Windows Server, Windows 10/11 workstations, and Linux systems, and monthly reporting shared with your team on the status of all patching activities.

### TIRED OF CHASING PATCHES?

Let Guardian 365 do the heavy lifting, so you don't have to.

*"Working with Forsyte is a breath of fresh air. My team can sleep at night while their SOC looks over our environment and acts as necessary. They're a competent organization that has leveraged our Microsoft A5 license to the fullest and saved us money by not paying for other third-party products."*
