

California Processing Tomato Report

California Department of Food and Agriculture, California Agricultural Statistics Service

Cooperating with the USDA, National Agricultural Statistics Service, California Field Office

California Field Office · P.O. Box 1258 · Sacramento, CA 95812 · (916) 498-5161 · (916) 498-5186 Fax · www.nass.usda.gov/ca

Released: May 24, 2013

As of May 24, California's tomato processors reported they have or will have contracts for 13.1 million tons of processing tomatoes for 2013. This production is a 4.5 percent increase from the final contracted production total from last year.

The May contracted acreage of 259,000 is two thousand below the January intentions forecast and one thousand above from last year's final contracted acreage.

Fresno County remains the top California County in contracted planted acreage for 2013 with 99,000 acres. Yolo, Kings, San Joaquin, Merced, and Stanislaus County make up the remaining top five counties for contracted planted acreage, respectively.

These counties make up 80 percent of the 2013 total contracted planted acreage for California.

Tomato beds were formed and received pre-plant herbicides in February. Processing tomato transplants were planted in early spring as allowed by weather and soil conditions. Curly top virus is an issue this year. Significant damage has been reported throughout the State causing growers to replant some fields.

This early processing tomato estimate is funded by the California League of Food Processors, in cooperation with the California Department of Food and Agriculture.

ACREAGE AND PRODUCTION (CONTRACT AND TOTAL) - CALIFORNIA

Year	Total Crop			Contract Only			
	Planted Acres	Harvested Acres	Production Tons	Planted Acres	Harvested Acres	Production
