This report is an **estimate** of total U.S. supply and demand for processed tomato products. Reports are based on voluntary pack and inventory reports furnished by participating U.S. processors.

All positions are stated on a "raw product tons" equivalent basis.

CLFP "Pack Year" begins June 1 and ends May 31.

2023-2024 pack year statistics based on reports from processors handling 95.1% of U.S. tonnage. USDA no longer reports production for other states, so a three-year average of production for those states for the period 2017-2019 was assumed in calculation of 100% reporting estimates.
