

ALLISON MUTH TEXAS CHILDREN'S HOSPITAL

Allison Muth is a Facilities Project Manager with Facilities Planning & Development at Texas Children's Hospital (TCH), responsible for budgeting, planning and project delivery in the Austin market.

Prior to joining the healthcare industry, Allison spent many years in traditional architectural practice and was involved in all phases of projects at architectural firms in both Washington (D.C.) and Houston (TX). Her career in healthcare began with facilities project management at TCH in 2003. Her leadership in project management quickly resulted in her leading the entire project management program. Her passion to align project management with facilities standards created an effortless transition of the Facilities Interiors and Logistic Programs under her leadership in 2011. She spent 2016 thru 2018 focused on strategic planning efforts to develop future growth and relocation scenarios and develop space management guidelines to respond to the rapid growth of TCH.

Allison is a graduate of Virginia Tech University, where she obtained her bachelor's degree from the College of Architecture. She is a licensed architect in Texas, an NCARB certificate holder, and is currently seeking her Interior Design license in the State of Texas.

Allison is a member of the American Institute of Architects (AIA), the Texas Society of Architects, the Austin Chapter of AIA, and currently serves as President of the Construction Owner's Association of America (COAA). She previously served as President of COAA's Texas chapter and participated on the Committee on Architecture for Health for AIA Houston.
