

About Weber Scientific

Since 1959, Weber Scientific has been dedicated to promoting quality control and assurance in the dairy industry. We offer a superior selection of laboratory supplies and equipment specifically designed for dairy testing—from raw milk to finished products.

Weber Scientific originated in response to the evolving needs of our clients, particularly dairy processors. Many sought to establish in-house laboratories for the first time and turned to us for the necessary supplies. Our vast and exclusive products have further solidified our reputation in the industry.

Our headquarters are located in Hamilton, NJ, with additional distribution points across North America.

**Our Commitment and Solutions:
Quality, Productivity & Compliance**

We specialize in providing testing solutions that meet the rigorous demands of the dairy industry. In the current landscape, farmers, processors, and inspectors encounter substantial challenges in obtaining reliable and quality products. As the demand for testing solutions grows, addressing these needs has never been more crucial.

We remain dedicated to supporting the dairy industry with innovative testing solutions that assure quality, improve productivity, and meet regulatory compliance.

Our commitment to quality and innovation is unwavering as we make every effort to meet the evolving needs of the dairy sector.
