FLORIDA LAW 64E-9.3018

According to Florida Law 64E-9.018, Public Pool Service Technician Certification, "An individual who services a public pool by maintaining the cleanliness, water quality and chemical balance of public pools shall be certified. To be certified an individual must demonstrate knowledge of public pools. . . . To ensure that the pool technician is knowledgeable, said technician shall attend a training course of national recognition that is approved by the department of at least 16 hours in length and shall pass a test acceptable to the department. Certification is conferred upon an individual and is nontransferable."

Every 5 years the coursework and test must be retaken by individuals servicing public pools to maintain Pool Operator Certification!
