Jack Shaw

A glowing crystal ball sits on an ornate, silver-colored metal stand in a grand, dimly lit library. The crystal ball is the central focus, emitting a bright blue light from its base and containing a complex, multi-colored energy field of swirling lines and particles. The word "INNOVATION" is written in a glowing, golden-yellow serif font across the center of the crystal ball. The library background features dark wood paneling, bookshelves filled with books, and a checkered floor. Two red-upholstered chairs are visible on either side of the crystal ball, and the overall atmosphere is one of intellectual pursuit and discovery.

INNOVATION

**Yogi Berra**

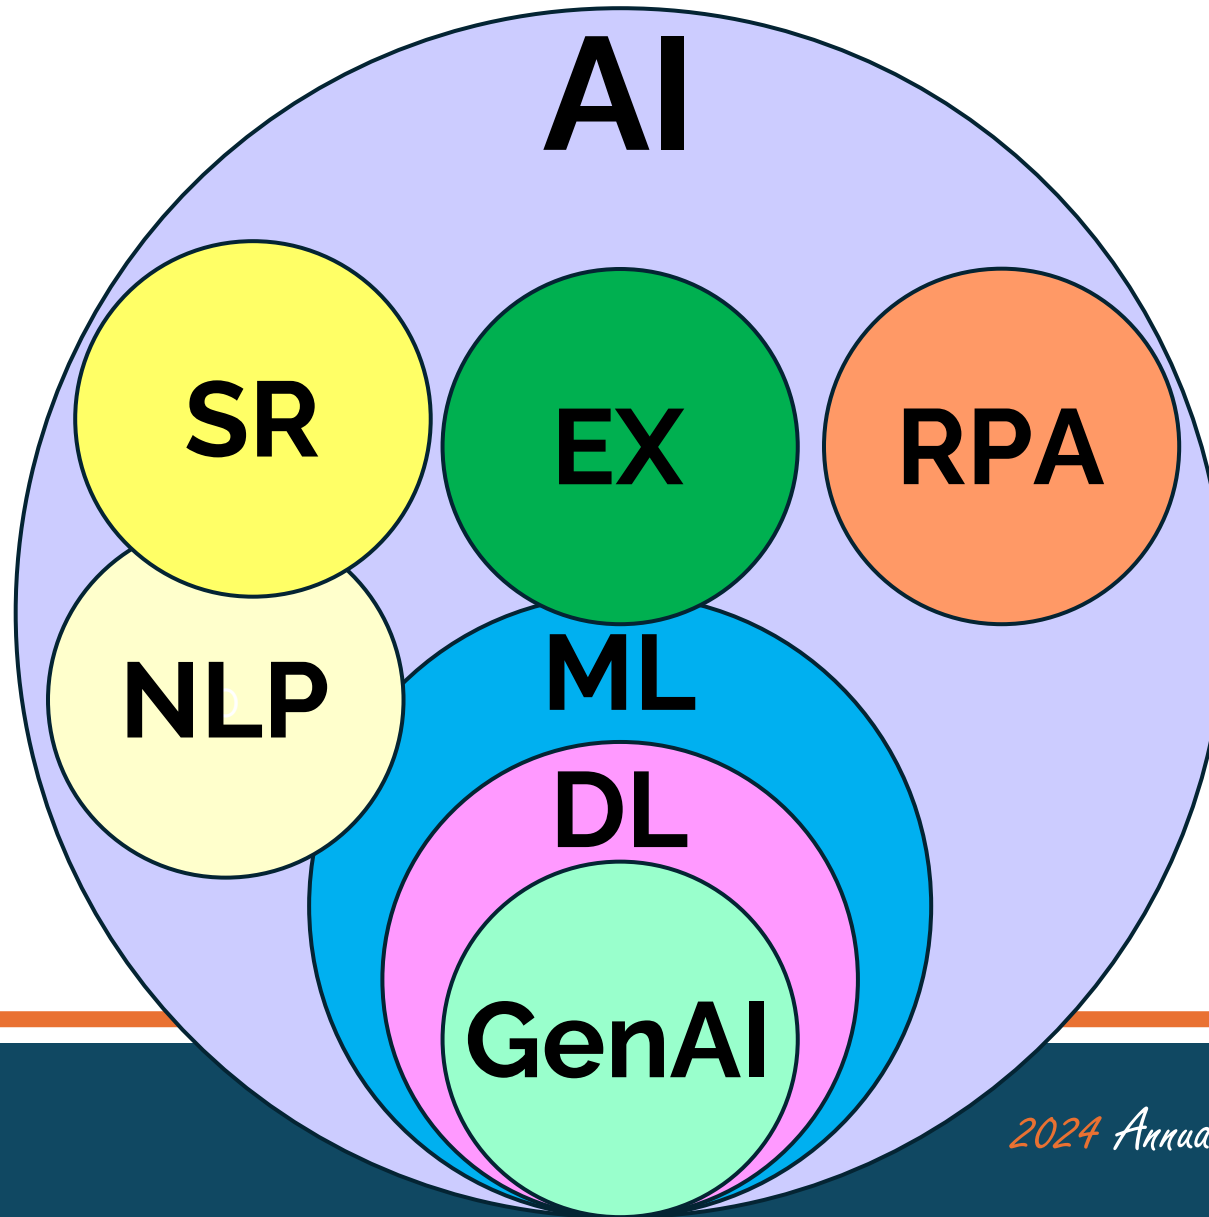

**“Making predictions is very hard, especially about the future.”**

---

# Strategic Planning in Times of Disruption

- **Strategic Planning in 2020**
- **Who has a written strategic plan for 2024?**
- **Who has a written 2024 strategic plan that explicitly addresses AI?**

# Many Kinds of AI!

AI

# The AI Revolution in Utilities

Leveraging Tactical and Strategic AI for Municipal Electric Utilities

## AI Reshaping Energy Landscape

AI technologies are transforming the energy sector by optimizing operations, predicting demand, and integrating renewable energy sources efficiently.

## Enhancing Efficiency and Reliability

Implementation of AI leads to improved operational efficiency, enhanced grid reliability, and reduced downtime through predictive maintenance.

## Empowering Customer Service

AI enables personalized customer interactions, real-time issue resolution, and tailored energy solutions, enhancing overall customer satisfaction.

## Addressing Municipal Utility Challenges

Strategic AI applications tackle challenges like aging infrastructure management, demand-response optimization, and cybersecurity threats in municipal electric utilities.

# Building a Strong Data Foundation for AI

- **Centralized, accessible, validated data**
- **Significant effort to centralize and model data**
- **Drive value from unified systems**
- **Essential for maximizing AI potential**

## Tactical AI Applications

# What is Tactical AI?

Exploring the Practical Applications of Tactical AI in Utilities

**Automates specific tasks**

**Boosts individual productivity**

**Narrow focus, quick wins**

**Examples: Chatbots, drafting documents**

## AI Impact in Electric Utilities

# What is Strategic AI?

Unleashing the Power of AI in  
Municipal Electric Utilities

### Comprehensive AI Integration

Seamless incorporation of AI technologies into all operational aspects for heightened efficiency.

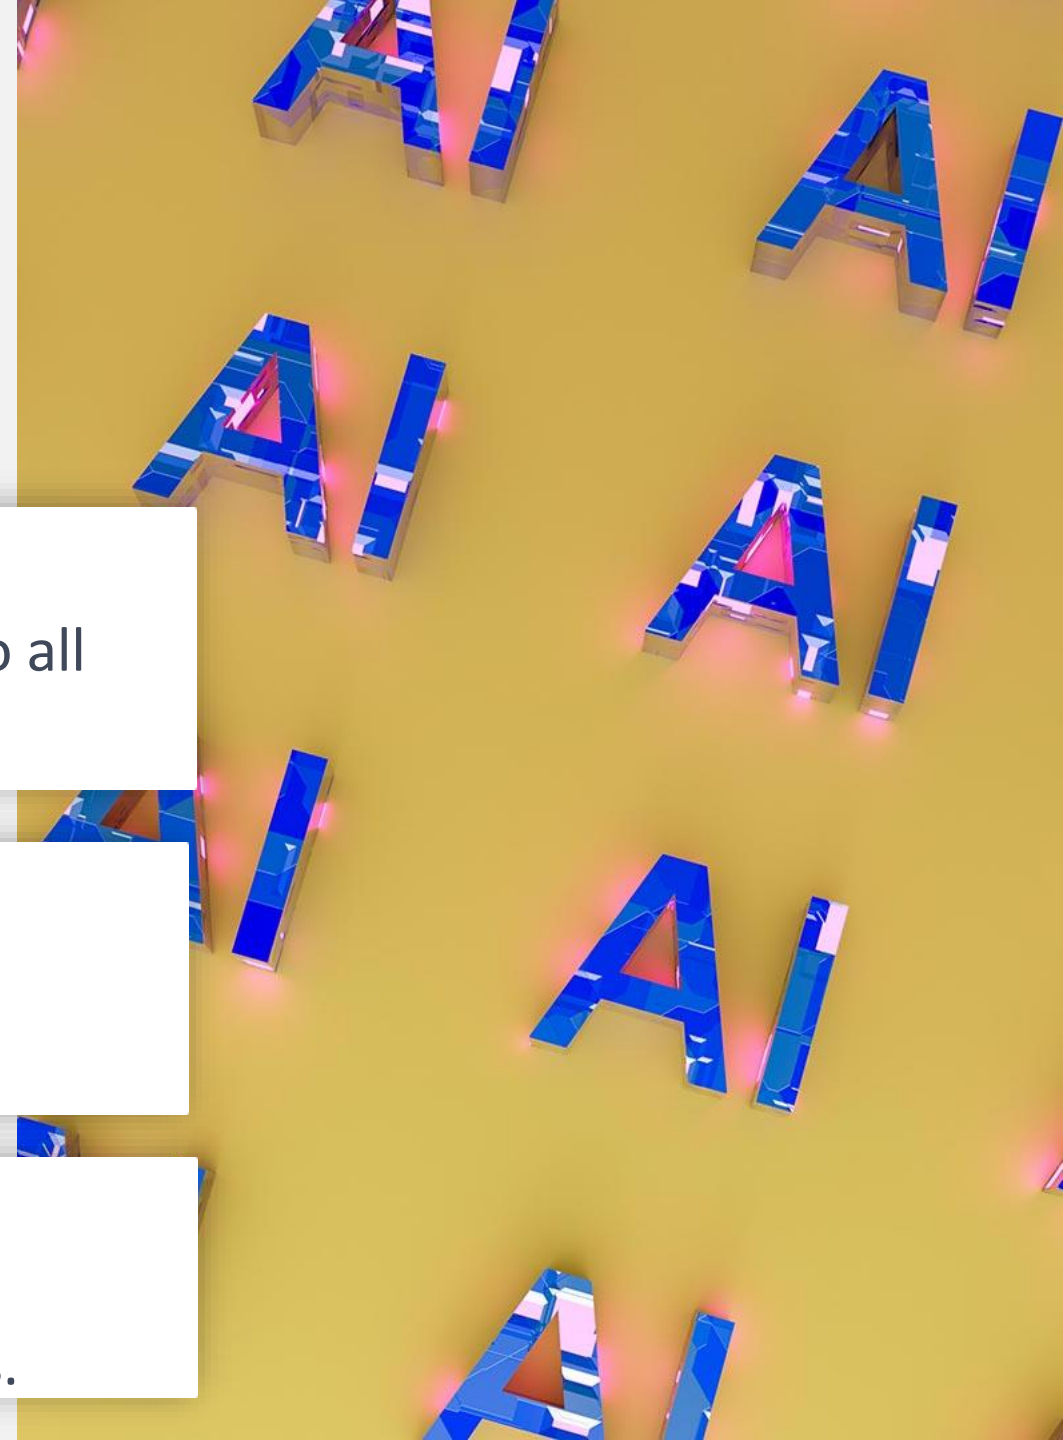

### Digital Transformation Driver

Catalyzes the shift towards modernization by leveraging AI capabilities in utility operations.

### Broad Business Impact

Extends AI's influence across various business functions, optimizing processes and strategies.

Utility AI

## Tactical vs. Strategic AI: A Comparison

Key Contrasts in AI Applications for  
Municipal Electric Utilities

**Tactical: Narrow focus,  
immediate impact**

**Strategic: Broad focus,  
long-term transformation**

**Tactical: Boosts  
productivity, cost savings**

**Strategic: Enables new  
capabilities, business models**

# Technologies Powering AI in Utilities

Enhancing Efficiency and Security with Advanced AI Solutions

## Tactical Applications

Utilize Machine Learning (ML), Natural Language Processing (NLP), and Robotic Process Automation (RPA) for real-time operational insights and process automation.

## Data Quality Importance

Emphasize the significance of clean and structured data to enhance the accuracy and reliability of AI-driven decision-making processes.

## Strategic Implementations

Leverage Deep Learning and Reinforcement Learning techniques to optimize resource allocation, predictive maintenance, and long-term planning.

## Cybersecurity Measures

Implement robust cybersecurity protocols to safeguard critical infrastructure and prevent potential cyber threats in the utility sector.

# The Future of AI in Utilities

## Empowering Municipal Electric Utilities through AI Transformation

### **Blend Tactical and Strategic Approaches**

Integrate short-term operational enhancements with long-term strategic AI implementations to maximize efficiency and effectiveness.

### **Invest in Data Infrastructure and Talent**

Allocate resources to strengthen data infrastructure and upskill talent for optimal utilization of AI technologies in municipal electric utilities.

### **Quick Wins to Transformation**

Initiate with immediate AI solutions for quick wins, paving the way for gradual transformational changes across utility operations.

### **Collaborate with Tech Partners and Academia**

Engage in strategic partnerships with technology firms and academic institutions to leverage cutting-edge AI innovations tailored to the utility sector.

### **Preparing for an AI-Driven Future**

Anticipate and adapt to an energy future dominated by AI technologies, ensuring readiness for the evolving landscape of municipal electric utilities.

# Enhancing Utility Inspections with AI and Autonomous Drones

- Critical role of computer vision
- Managing digital content overload
- Identifying anomalies in images
- Enhanced inspections with drones

# How Generative AI Works - The Basics

Exploring the Fundamentals of Generative AI

## Real-World Applications

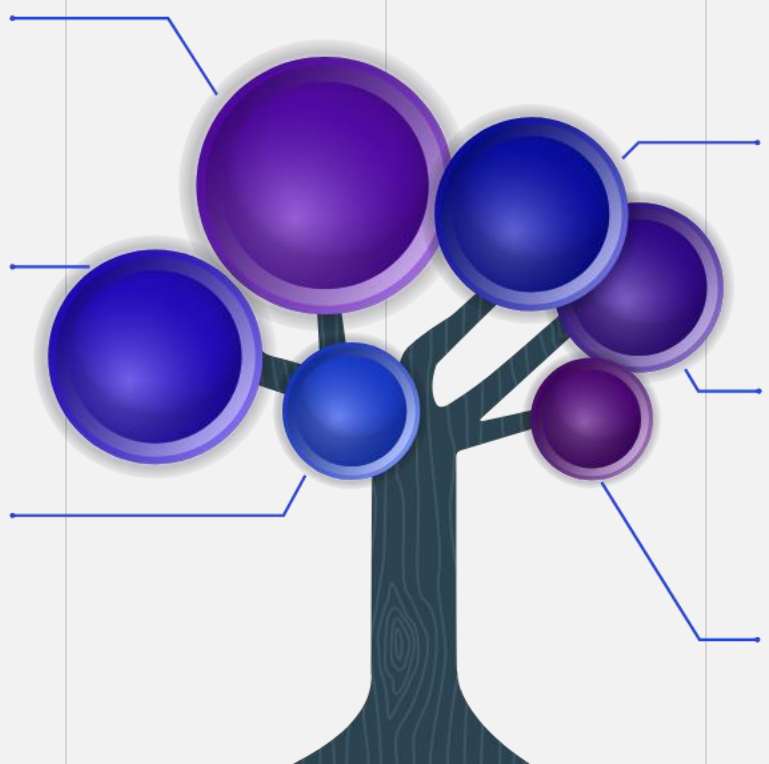

Generative AI finds practical use in various fields such as art generation,

## From Input to Creativity

It transforms input data into creative outputs, mimicking human-like

## Learning from Data

Generative AI learns patterns and insights from vast amounts of data

## Enhancing Efficiency

By automating creative tasks, Generative AI enhances operational efficiency and accelerates innovation.

## Personalized Content Generation

It enables the creation of tailored content to meet specific user

## Ethical Considerations

Addressing ethical concerns around AI-generated content and ensuring

# AI Solution Providers

**Public or Private Sector AI**

**Requires the Support of AI Technology Solution Partners.**

---

# AI Solution Providers

## Consumer Generative AI

- Google Bard/Gemini
- OpenAI ChatGPT (Microsoft)
- Anthropic Claude (AWS)
- Others

## Enterprise AI

- AWS Bedrock
- Google AI
- IBM watsonx
- Microsoft Azure OpenAI
- Oracle / Cohere

# AI can improve performance

**Boston Consulting Group:**

Consultants using AI:

**finished 12.2% more tasks on average,**

**completed tasks 25.1% more quickly, and**

produced

**40% higher quality**

**results than those without.**

*2024 Annual Conference*

# AI can improve performance

Figure 5: **Bottom-Half Skills and Top-Half Skills - Inside the Frontier**

# Share Of Job Tasks Potentially Aided By GenAI

For jobs that often require ...

**High school diploma or less**

6%

Jobs like: sewing machine operators, dry cleaners, fast-food workers

**High school diploma**

17%

Manicurists and pedicurists, actors, security guards

**Vocational or 2-yr. degree**

38%

Electricians, paramedics, facilities managers

**Four-year degree**

75%

Nurses, nuclear engineers, human resources specialists

**Graduate school**

64%

Pharmacists, psychiatrists, lawyers

*Cornell University: An Early Look at the Labor Market Impact Potential of Large Language Models*

# Internal Buy-in: Fear of Being Replaced by AI

© Blutgruppe/Corbis

*The Good News:*

---

**AI Will NOT  
Replace  
People!**

***The Bad News:  
(for some of you)***

---

**People Who Understand How to Use  
AI-Enabled Tools And Technology  
Will Replace Those Who Don't**

# Preparing for Generative AI Implementation

- **Employees already using GenAI**
- **Enhancing capabilities with AI tools**
- **Safe, regulated, and legal environment**
- **Enable creativity with proper guardrail**

# Implementing Generative AI Systems

- **Start small, think big**
- **Collaboration is key**
- **Learning from mistakes**

# Scaling Generative AI: Transforming Organizations

- **Outdated paradigms hinder GenAI scaling**
- **GenAI: Personal transformation tool**
- **Framework: Train, Chain, Codify, Scale**

# Step 1: Train – The Foundation of Scaling GenAI

- **Shift from super users to structured training**
- **Emphasize creative, innovative training methods**
- **Foster a culture of curiosity and exploration**

## Step 2: Chain – Creating an AI-powered Workflow

- **Proficiency leads to consistent use**
- **Overcome 'Google brain' with task chaining**
- **Envision an AI-powered workday**

## Step 3: Codify – Systematizing Team GenAI Use

- **Team-based GenAI system development**
- **Establish rules, guardrails for use**
- **Accountability within team crucial**

# Step 4: Scale – Uniting Teams for GenAI Excellence

- **AI Task Forces centralize learning**
- **Share best practices and policies**
- **Reimagine workdays and collective goals**

# Transforming Work with GenAI: A New Paradigm

- **Paradigm shift from individual to collective**
- **GenAI redefines productivity and collaboration**
- **Framework: Blueprint for success**

---

## Digital Transformation Means You Need

To discern not only ...

... is the technology ready for you ...

... but is your organization ready for the technology?

# Digital Transformation

**Don't force fit new technologies**

**Don't "pave the cow paths"**

**Don't make marginal improvements**

**Rethink business model & ecosystem**

**Apply new technologies as needed**

# Strategic Disruptions

**Pandemics**

**Weather Related Disruptions**

**Political Disruptions**

**Emerging Technologies**

---

# Dynamic Transformational Planning – Goals

Identify high-level strategic Goals needed to execute your overall Plan

Core Competencies

Resources

Capabilities

Changing Stakeholder Needs

Address Current and Potential Strategic Threats and Disruptions

---

# Dynamic Transformational Planning – Plans

- To accomplish a Goal, you must have a Plan.
- You can have more than one Plan for a Goal.

## Example:

<b>Goal</b>	Drive Home from Work
<b>Plan A</b>	Take the Expressway
<b>Plan B</b>	Take Surface Streets

- Each plan has advantages and disadvantages
- You may choose to switch plans.
- Example: If there's an accident on the Expressway, you could switch to Take Surface Streets

# Monitoring the Situation

To select best plan, important to continuously monitor circumstances.

Why people use tools like Waze to monitor traffic situation/alternatives.

Proactively monitor for

- Potential strategic disruptions
- Evolving tech. / bus. opportunities

– even if not currently happening

**NOT** passively observing. **Proactively Monitoring** – defining and actively seeking trigger / inflection points

# Dynamic Transformational Planning Summary

**Organizations can think long-term, setting strategic goals.**

**Provides flexibility to shift dynamically in short & medium-term.**

**Address anticipated & unanticipated strategic contingencies:**

● ——— ● ——— ●  
**Opportunities      Threats      Disruptions**

# Change & Progress

**“Change does not necessarily assure progress, but progress implacably requires change.”**

**Historian Henry Steele Commager**
