

DIGITAL TWINS – 11 SUBSTATIONS, 11 UTILITIES, 10 DAYS, MANY BENEFITS

Duane Guidry
Director
Austin, TX

NOVEMBER 13, 2024

AGENDA

1 Brief Company Overview

2 Strategic Partnership

3 Technology Week Event

4 Business Application / Use Cases

5 Questions

THE POWER OF PRIMTECH

ENGINEERING EXCELLENCE

A global market and innovation leader

More than 25 years
of innovation

Globally local

From experts
for experts

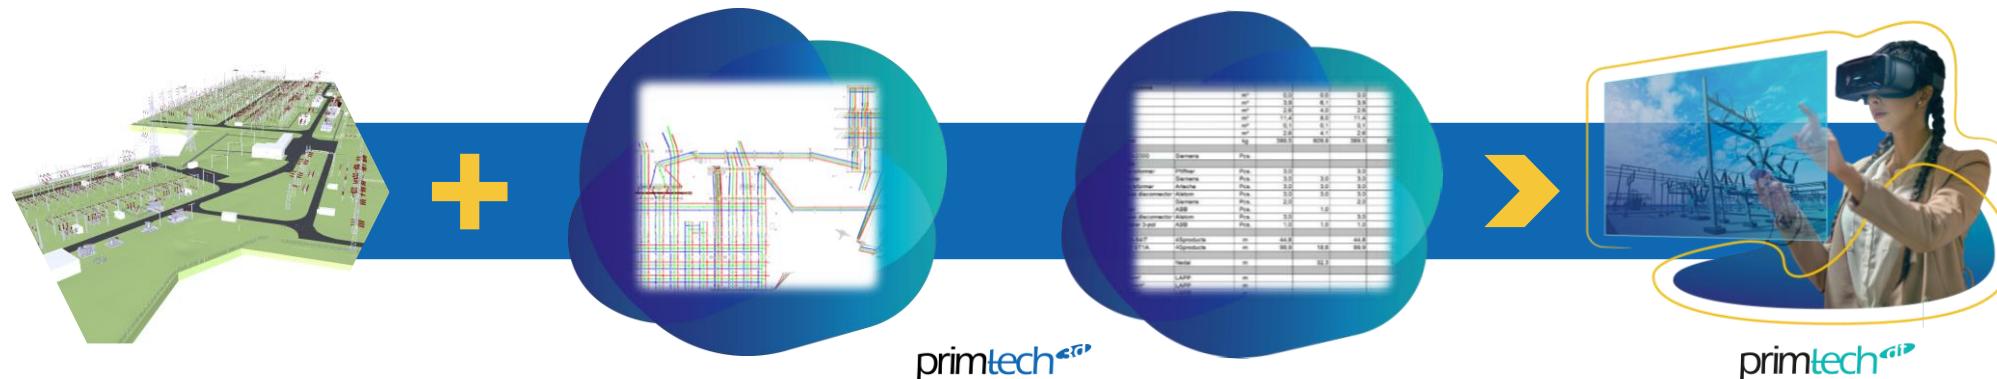

Adopted and used in
over 60 countries

● Partners

PRIMTECH SOLUTION

2D / 3D CAD

- Synchronized 2D drawings from 3D
 - Substation layout
 - Modeling and drawings
 - Geometry with parameters
- ... and many more

BIM

Smart Objects

- Topology
Structured and electrically connected station
- Simulation
Phases, Lightning Protection, Switching
- Checking
Minimum distances, clamps, ...
- Calculations
Short circuit current, Sag

SQL Graph Database

- Evaluations & Analyses
- Detail technology
- Complete and structured BOM
- ERP connection
- Data integration / CIM compliant

Digital Twin

- Easy and safe access from everywhere
- Small and smart
- Simulation
Phases, safe motion areas
- Single Line and power flow
- Data integration
ERP, Asset, Photo, ...

Intelligent substation BIM and engineering database

STRATEGIC PARTNERSHIP

primtech

POWER ENGINEERS

TECHNOLOGY WEEK EVENT

TECHNOLOGY WEEK EVENT

Where: POWER Fort Worth, Texas Office

What: Opportunity for **Participants** to Leverage POWER's Experience to Demonstrate the Value of Incorporating BIM-based Substation Design and Digital Twin Technology within the Lifecycle of Their Substation Assets – **Using Participating Utility's Data**

Who: POWER BIM and primtech Technical Teams

Why: Technical Teams Training and Collaboration Unique Offer to **Select** POWER Clients to Share Innovative Technology

TECHNOLOGY WEEK EVENT

primtech

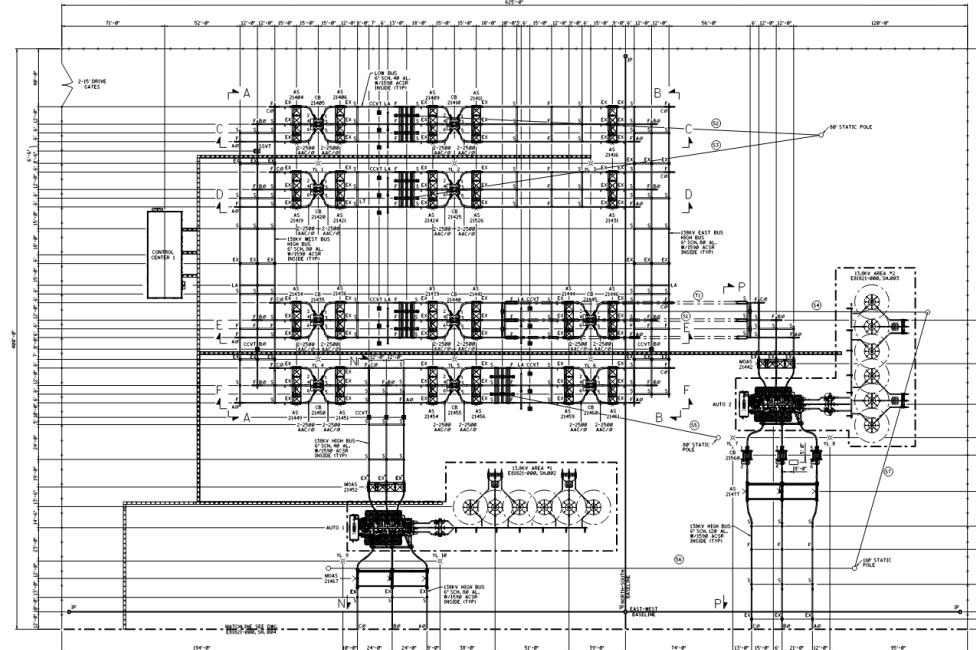

4 BIM subject matter experts

3 primtech 3d subject matter experts

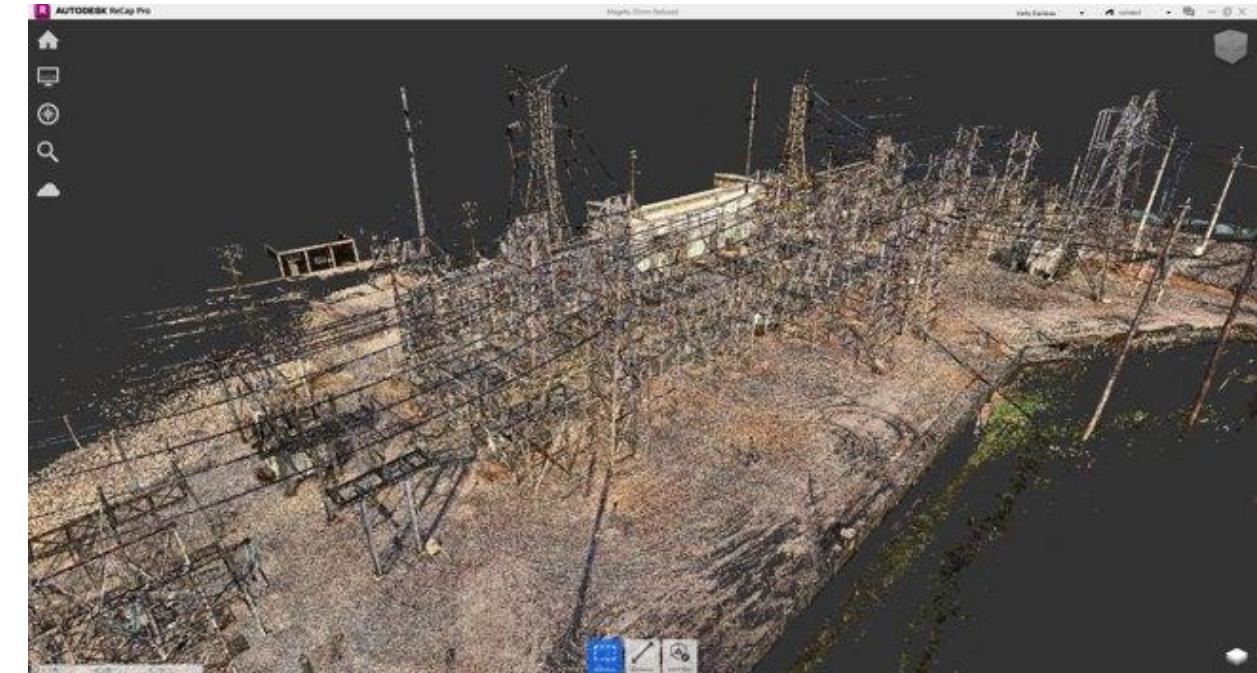

11 Utilities

TECHNOLOGY WEEK EVENT

Source Data Provided by Each Utility

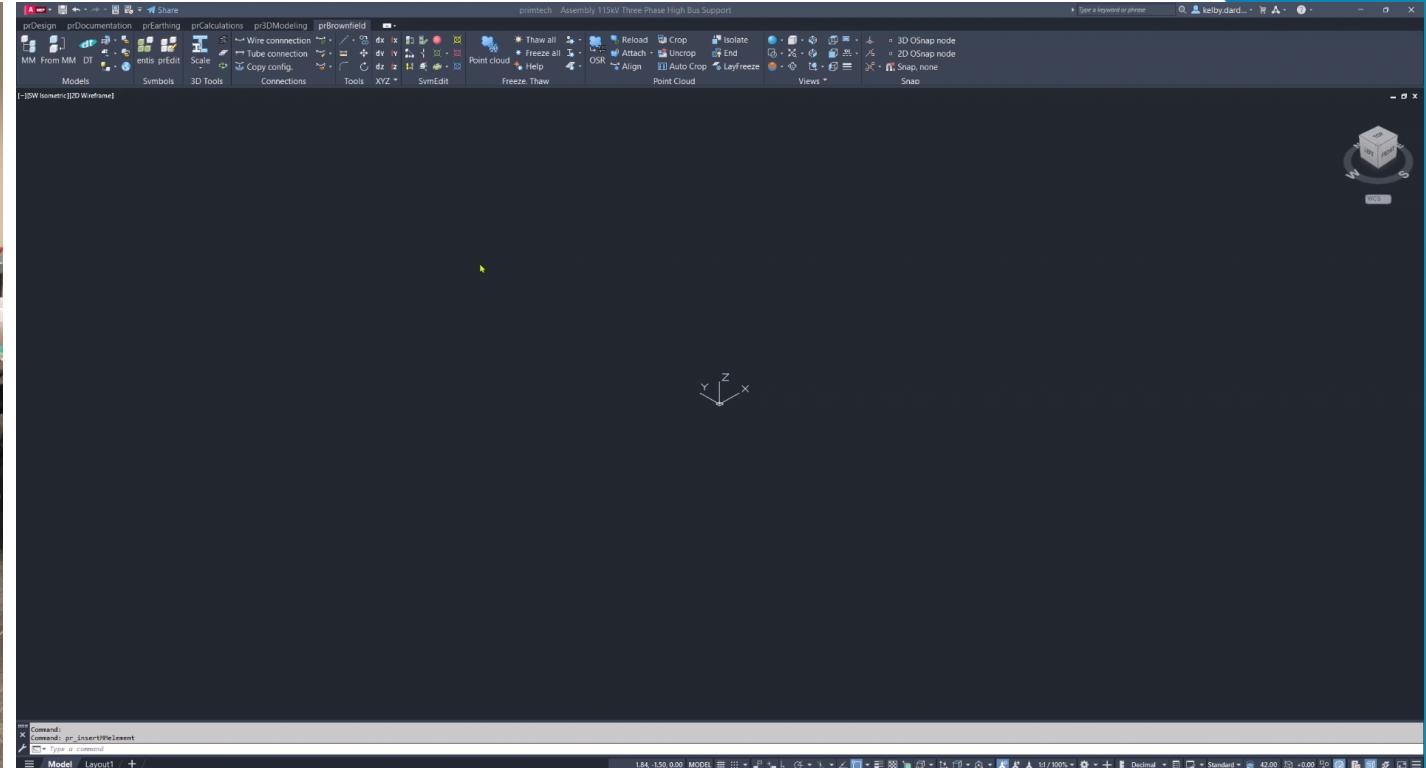

CAD Drawings

LiDAR Scan

TECHNOLOGY WEEK EVENT

TECHNOLOGY WEEK EVENT

DIGITAL TWIN DEVELOPMENT SERVICE:

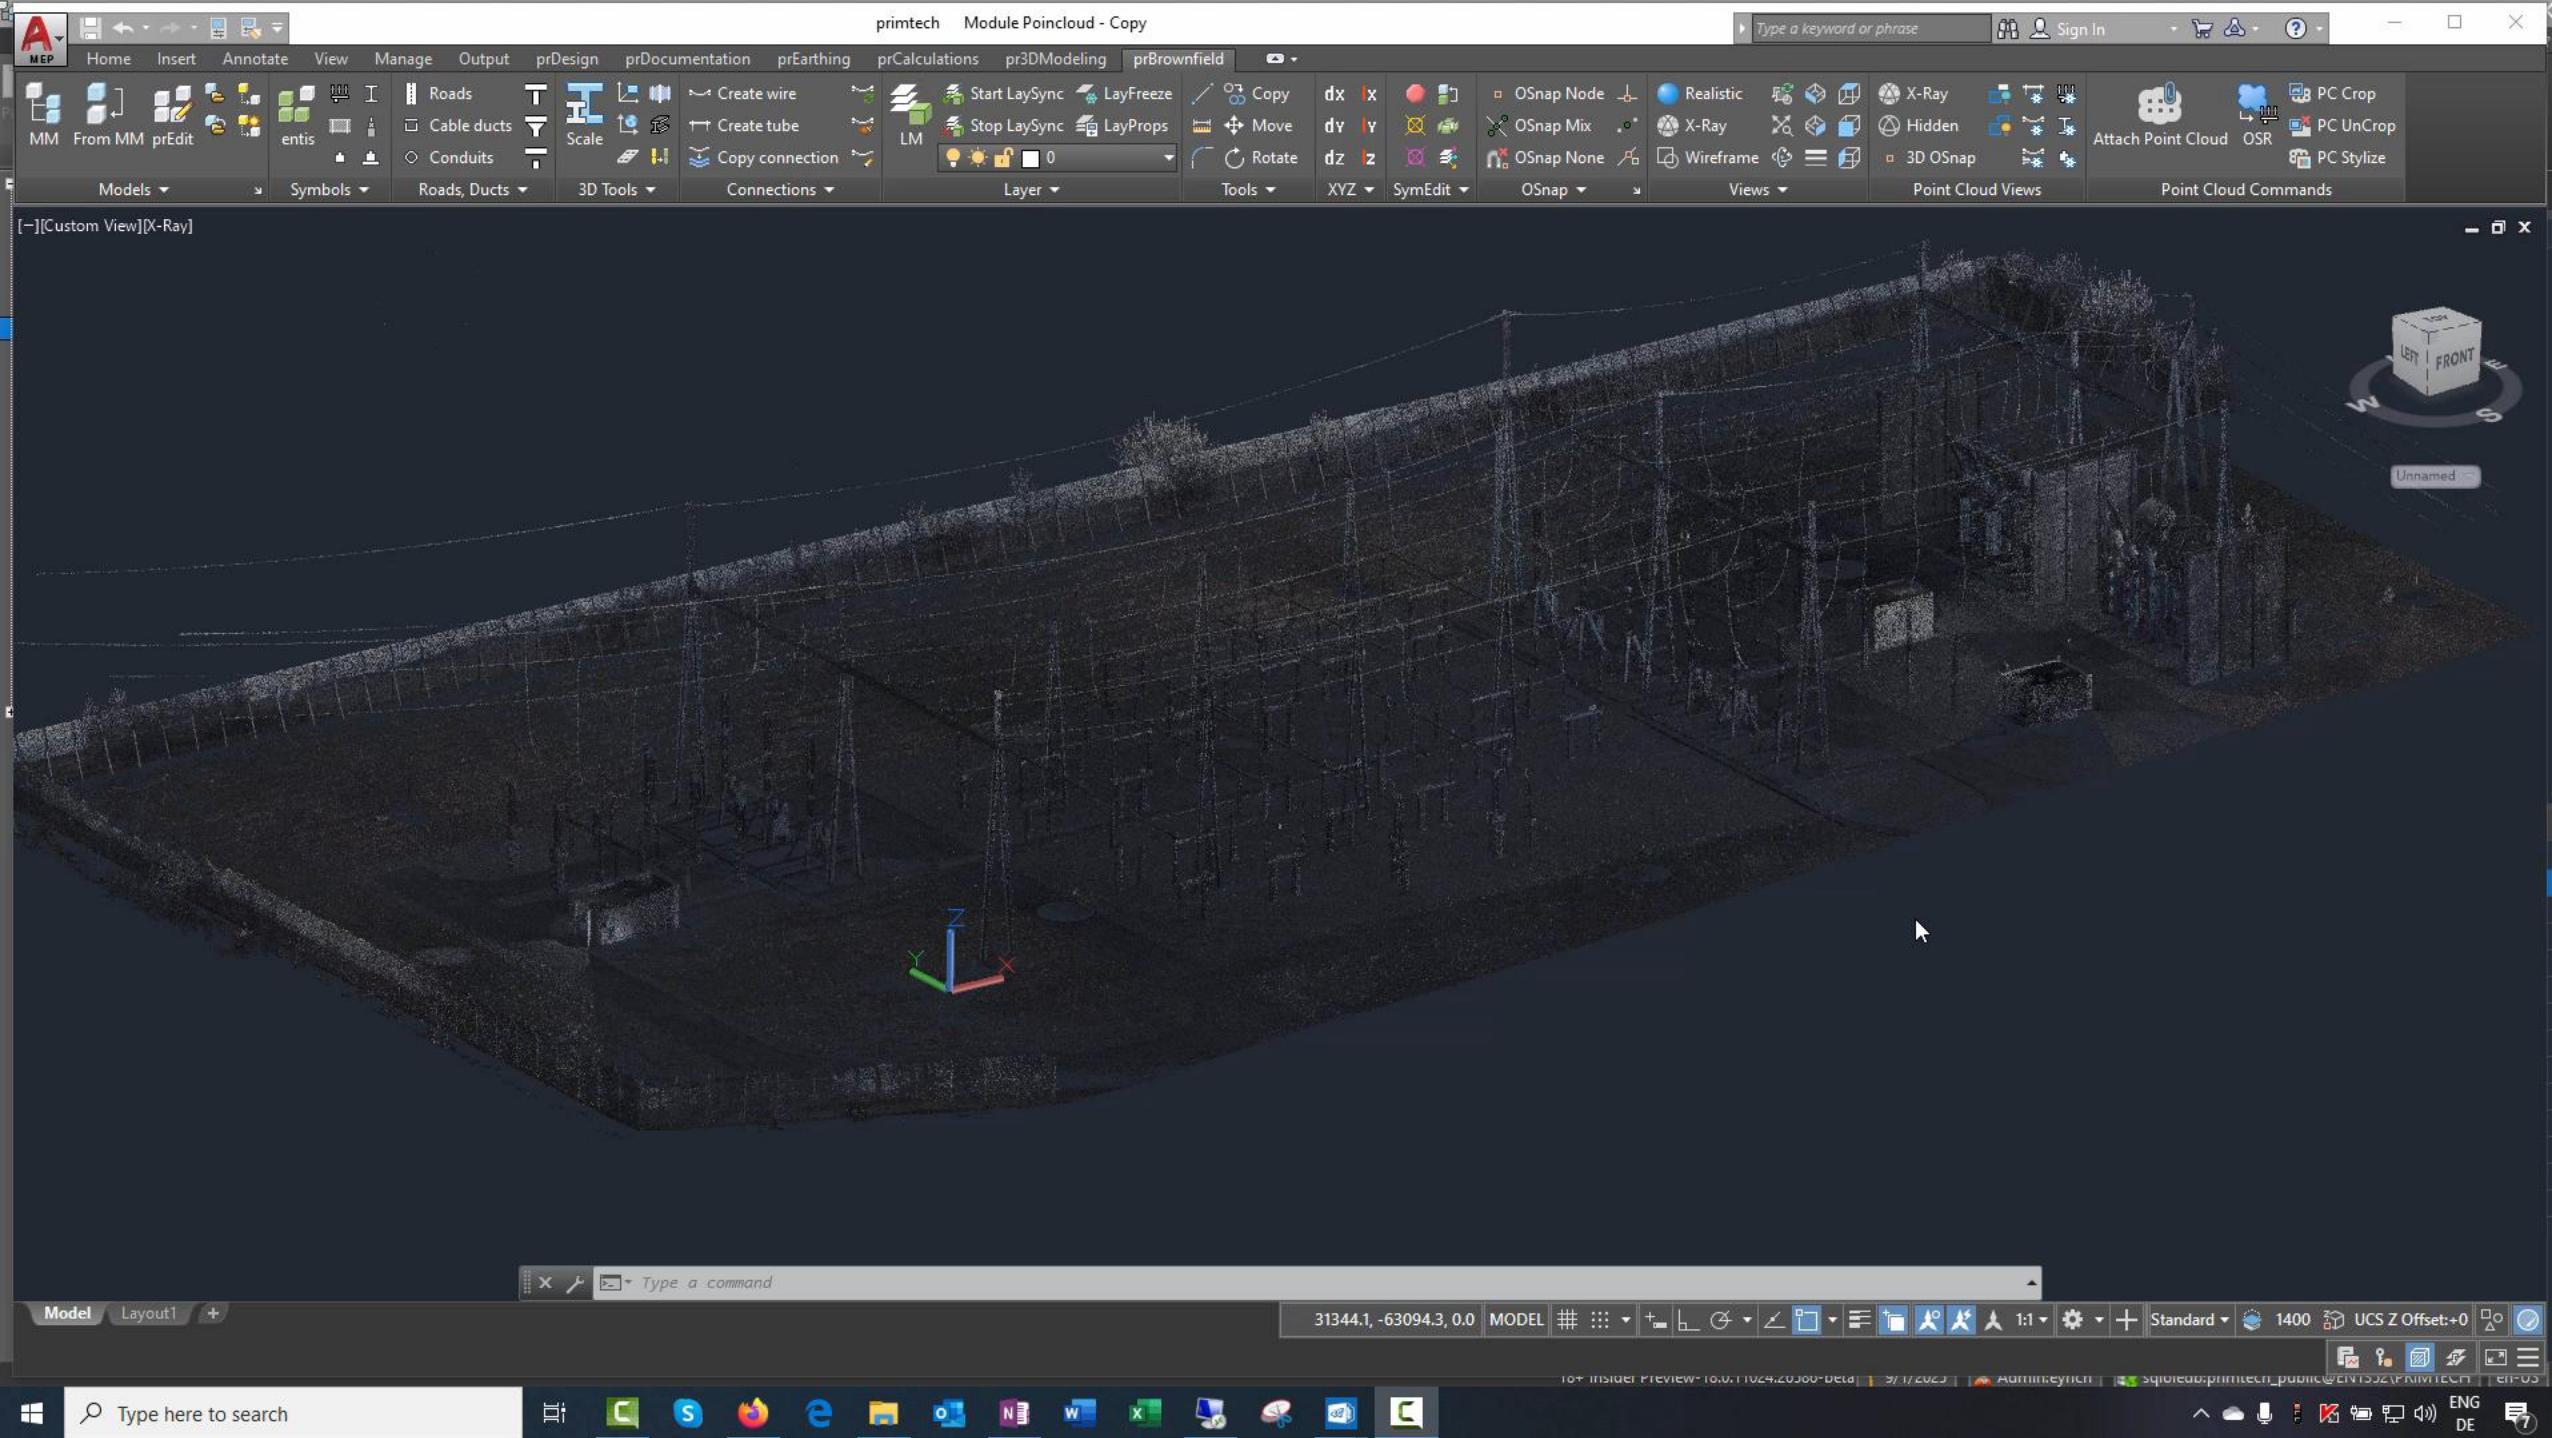

DIGITALIZE YOUR EXISTING HV SUBSTATIONS WITH EASE

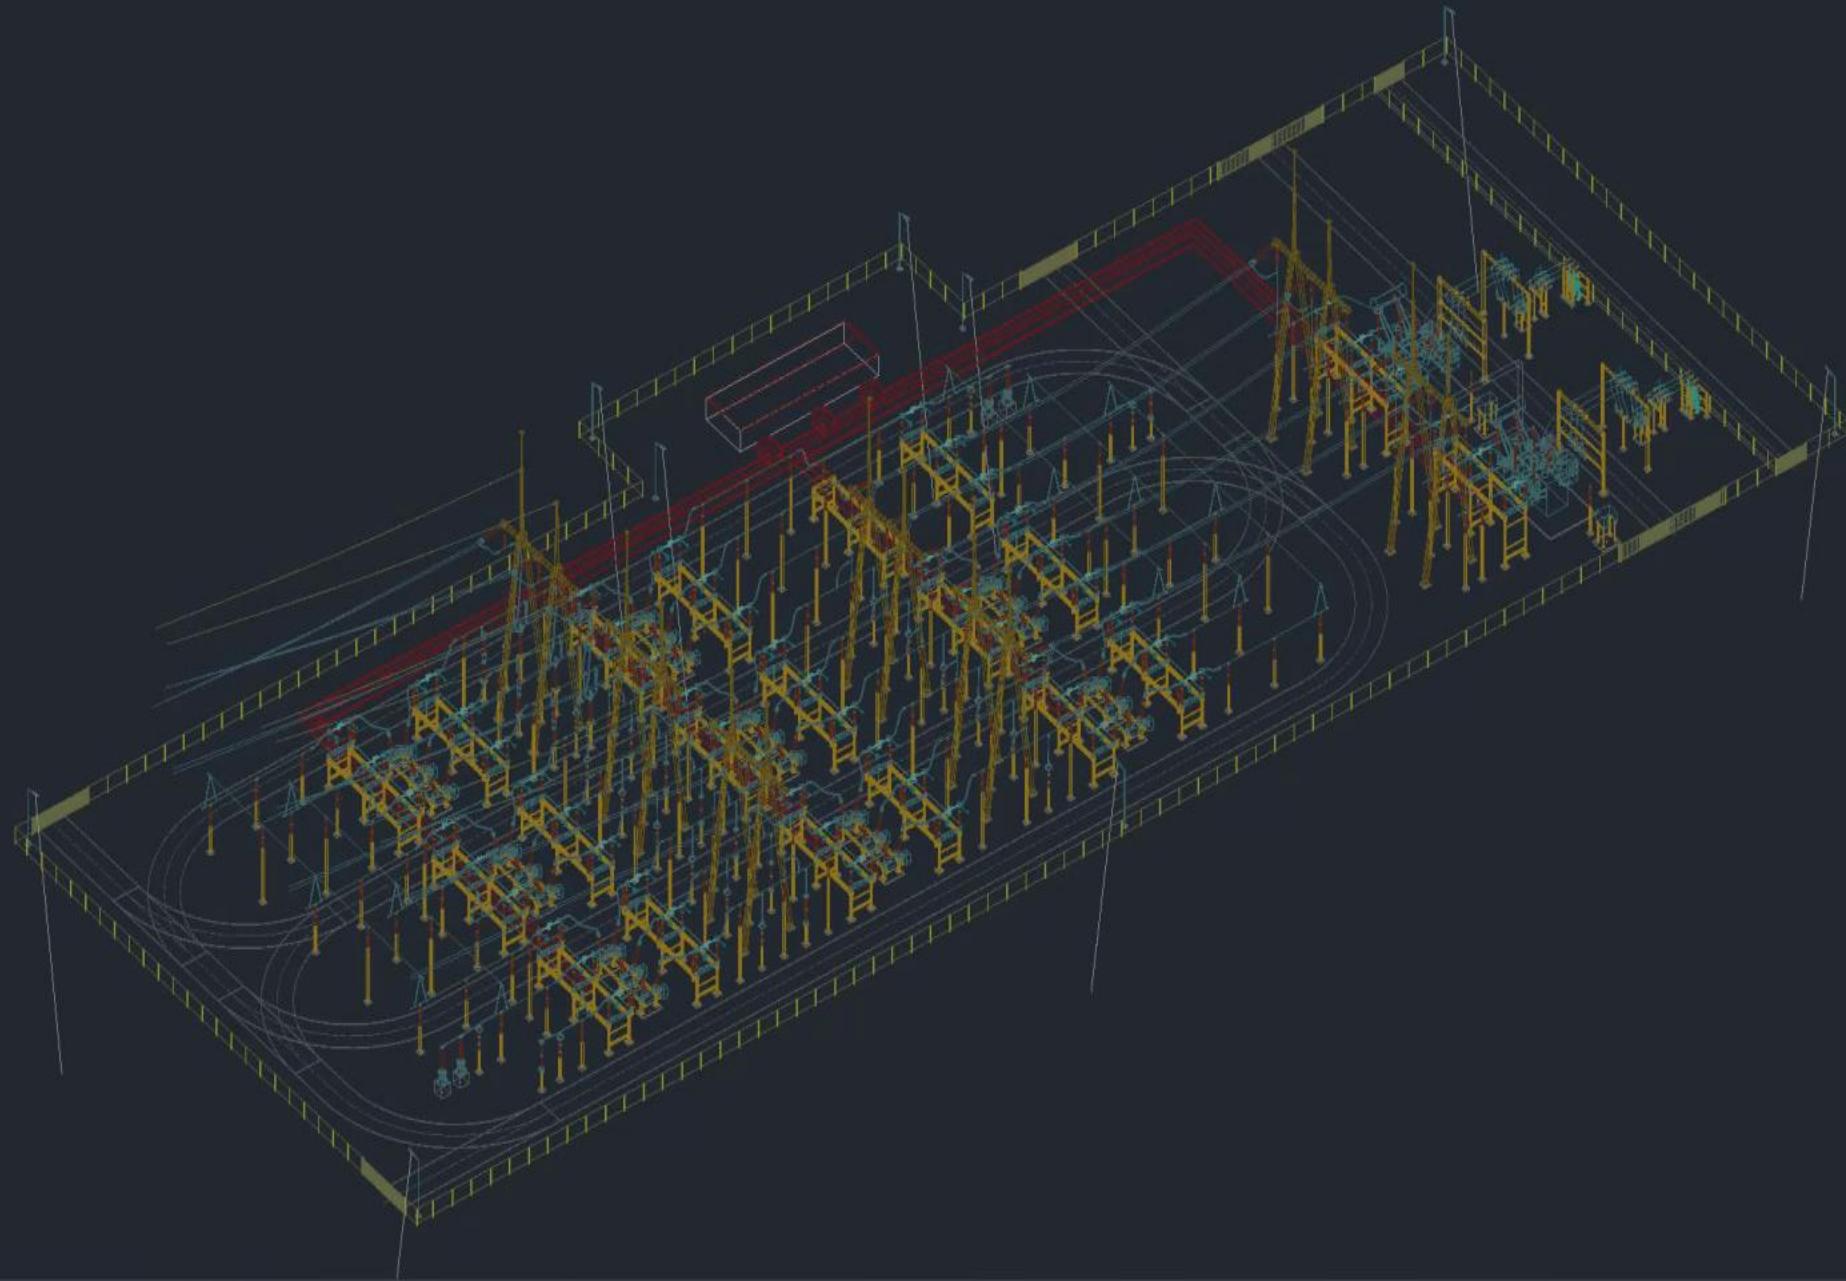

From the real substation to a valid 3D model and a virtual reality digital twin.

Our OSR+PRO service is an AI-supported service for digitalizing your existing HV substations into a data-valid and functional 3D and VR model and thus the basis for creating a digital twin.

[OSR+PRO Video](#)

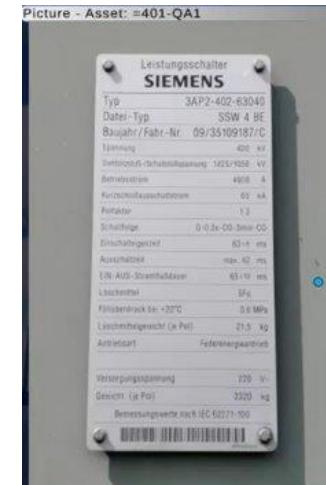

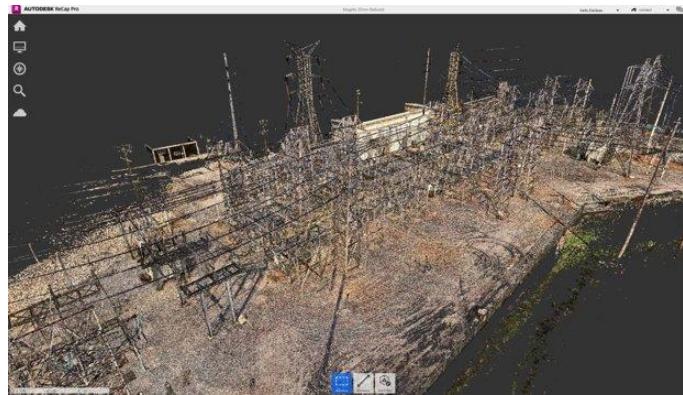

TECHNOLOGY WEEK EVENT

TECHNOLOGY WEEK EVENT

Digital Twin Source Data Requirements

- Good quality terrestrial LiDAR scan
- Equipment nameplate images
- Asset data
- One-line diagram (optional but useful)

| Database Id | Inventory Id | Equipment Class | Company No. | Manufacturer | Mfr. Rated KV | Operating KV | Serial Number | Switch Number | Application Description | Bank Number |
|-------------|-----------------|-----------------|--------------|--------------|---------------|--------------|-------------------|---------------|-------------------------|-------------|
| 3 | B65182 | Siemens | D | Siemens | 15.5 | 13.2 | 30117444-109-4 | 416 | Feeder | |
| 4 | 204898 Breaker | B65283 | Siemens | Siemens | 15.5 | 13.2 | 30057527376-100-2 | 410 | Feeder | |

...Connecting the World

BUSINESS APPLICATIONS / USE CASES

- Quick and economical as-built validation
- Leverage BIM investment & benefits
- Greenfield & brownfield solution
- Improved safety
- Reduced cost, schedule, errors
- Quicker return on assets
- Talent acquisition / retention
- Security / ballistic threat
- Disaster recovery
- Citizen communication
- Regulatory / facility ratings and more ...
