

Regional Weather Resilience Workshop for Electric Utilities | Southeast

On behalf of the Department of Energy, Office of Cybersecurity, Energy Security, and Emergency Response (CESER), along with Argonne National Laboratory, EPRI, the Orlando Utilities Commission, and the Florida Municipal Electric Association, you are invited to participate in the ***Regional Weather Resilience Workshop for Electric Utilities | Southeast***

[REGISTER](#) for this interactive workshop designed to support cooperative, municipal, and tribal utilities' weather resilience planning efforts. Utilities attending the regionally focused workshop will gain exposure to the topics of extreme weather modeling, assessing vulnerabilities, and resilience strategies. Attendees will engage with industry leaders and experts on how to successfully apply weather data to drive change within their organization. Workshop goals include:

- Increase utilities' weather resilience by providing access to leading data;
- Create a space for regional utilities to collaborate on weather-based threats; and
- Deliver step-by-step guidance and customizable templates to build and execute a weather resilience plan.

Who Should Attend?

Representatives from cooperative, municipal, or tribal utilities from AL, FL, GA, KY, MS, NC, SC, and TN with an interest in:

- Exploring weather-based threats to their utility's infrastructure and operations;
- Discovering risk mitigation opportunities; and
- Connecting with regional peers on weather resilience.

Registration will be open through October 1, 2025. Please register as early as possible. Your registration will be reviewed and approved by members of the Workshop Planning Committee before you receive a confirmation email.

You're Invited

October 9, 2025
