

# INDUSTRY MAKES ADVANCES IN TECHNOLOGY

New technologies are making Louisiana's industries safer, cleaner and leaner and the industry is changing rapidly and leading the way toward the green economy.

## Partnerships

Industry is leading the way to new thinking through the TEC NEXT Conference, a partnership between local industry, associations, government and education where the latest new technologies are featured and showcased. Connections being made at events like these "think-tank" activities are planting the seeds for future careers and long-term growth in Louisiana.

## Investment

The latest technology development requires investment and Louisiana's industries are seeking out new ideas for carbon capture, block chain smart contracts, and supply chain enhancements.

The logo consists of the text "TEC" in white above "NEXT" in white, both on a green square background. The "C" in "TEC" and the "T" in "NEXT" have double arrows pointing to the right.
