

PortXchange PilotTracker

The next generation platform for real-time pilot scheduling and vessel movement information

PilotTracker is designed to provide you with timely information and updates about planned and actual vessel movements at the port and help you optimize your operations and vessel turnaround time.

It gives you access to the movement type, scheduled and actual times, destinations, vessel particulars, pilot status, towage requirements, and booking agent information – all in one place.

How can you benefit from PilotTracker?

Improve planning

Get timely pilot schedule updates and adjust your planning accordingly.

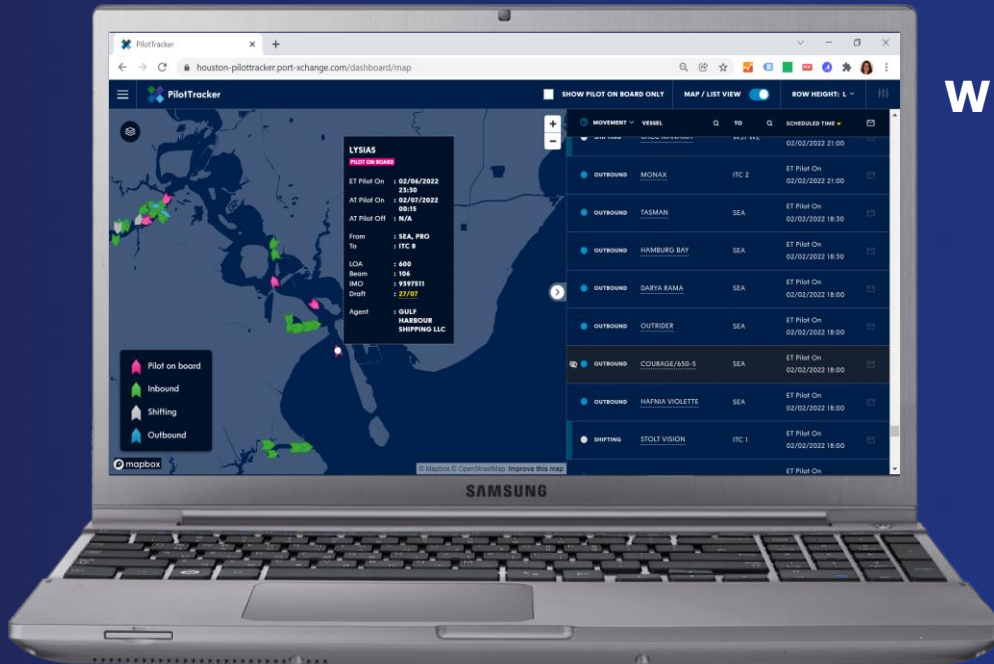

Increase predictability

Increase predictability of port operations by receiving alerts when a pilot is on board.

Communicate efficiently

With the pilot schedule at your fingertips, you can reduce time spent on phone calls and e-mails.

Why PilotTracker?

1-stop shop
for pilot and vessel
movement information

99.9%
average uptime

Features:

- ✔ Detailed list of movements 5 days in the past and 5 days in the future
- ✔ Real-time pilot schedule and status
- ✔ Automatic schedule updates
- ✔ Pilot on board notification email
- ✔ Map view with live satellite AIS tracking
