It Starts with Strategy

Three Unique Health Benefit Strategies

Where does your company see itself positioned on this spectrum today and in the future?

EXECUTIVE SUMMARY

09/2022 – 1/2023

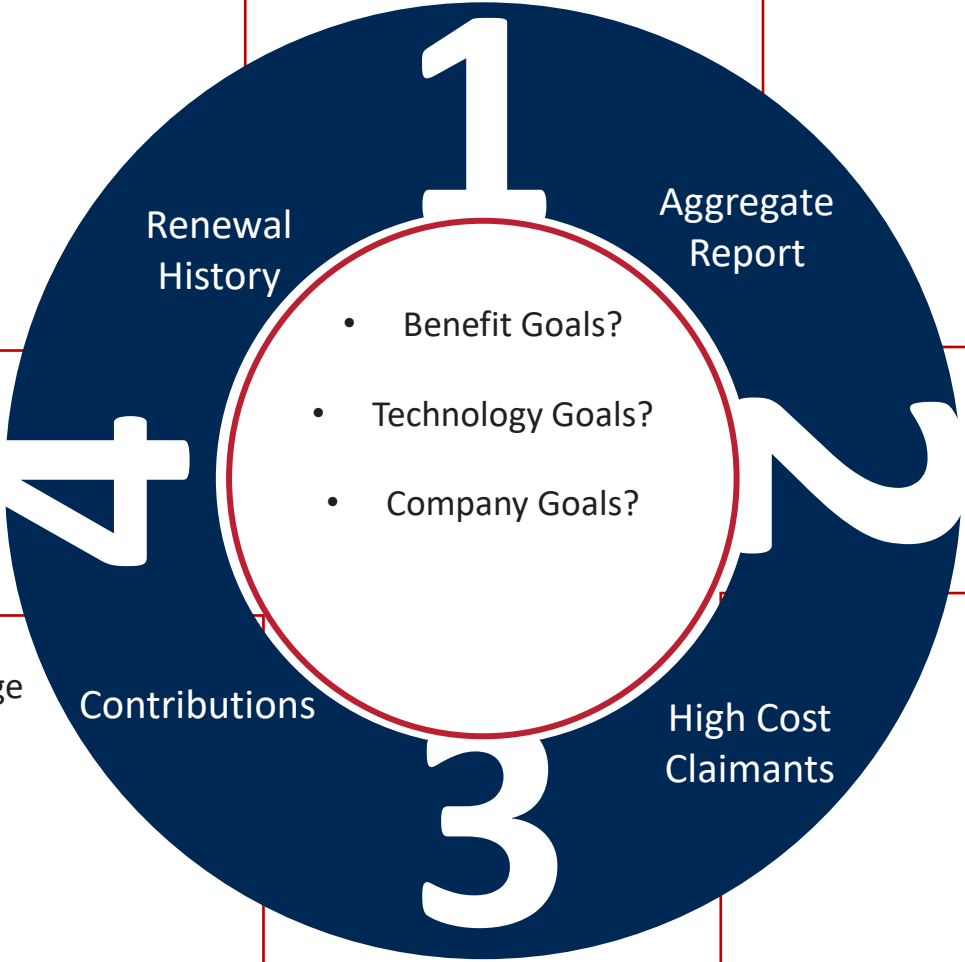

2018 Renewal: +14%
2019 Renewal: +10%
2020 Renewal: +13%
2021 Renewal: 0% (BCBS)
2022 Renewal: +11.6%(Aetna)

Plan Year Aggregate: \$103,062
Total Paid Claims: \$85,712

Loss Ratio: 83%

Surplus*:
\$17,349

**NOT Paid if carrier change*

100% ER paid for EE medical coverage
ER paid hospital indemnity benefit

No Visibility in HCC's due to size
Only available for 100+ FTE's

NETWORK OPTIMIZATION

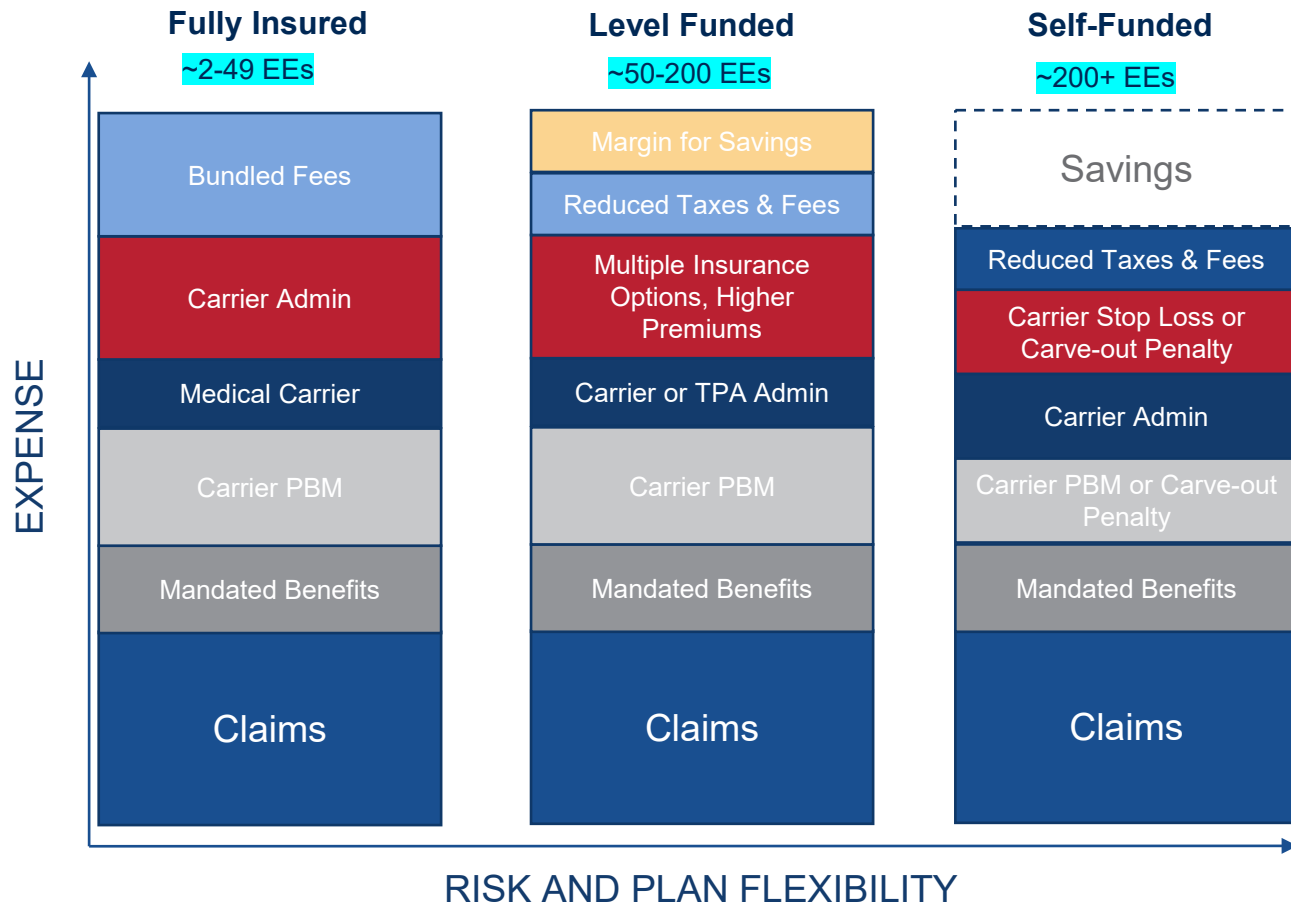

Third Party Administrators:

Cost Containment Strategies:

- Reference Based Pricing
- Secondary Medical
- Captives
- Specialty Rx Sourcing
- Carve-Outs
 - » Dialysis
 - » Transplant
 - » Gene and Cell Therapy

UNDERSTANDING THE OPTIONS

For groups with more than 100 covered lives, the most significant cost driver is claims expense

Employers can implement a variety of strategies to better control claim costs, but claims remain the same under any funding model

Alternative funding strategies can reduce or eliminate extraneous costs while introducing tremendous flexibility

The elimination of carrier profit, excess margin and the potential elimination of mandated benefits create savings

The reduction and/or elimination of ACA taxes and fees create additional savings

Stop Loss replaces pooling charges and protects the employer from large claims risk

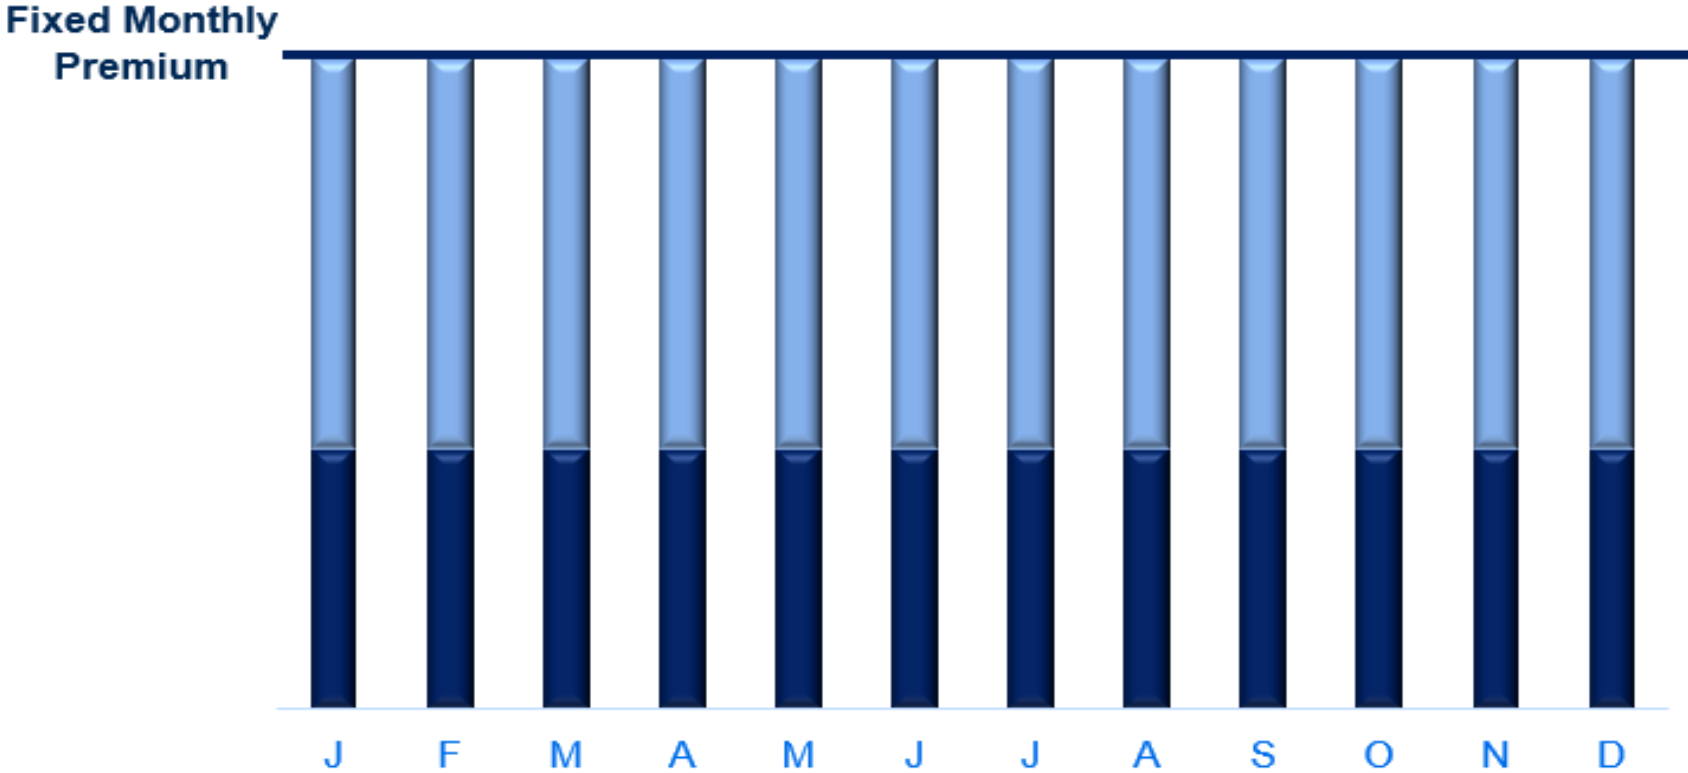

02

Fully Insured

FULLY INSURED

- Fixed monthly premium
- Insurance carrier retains potential savings and the potential risk

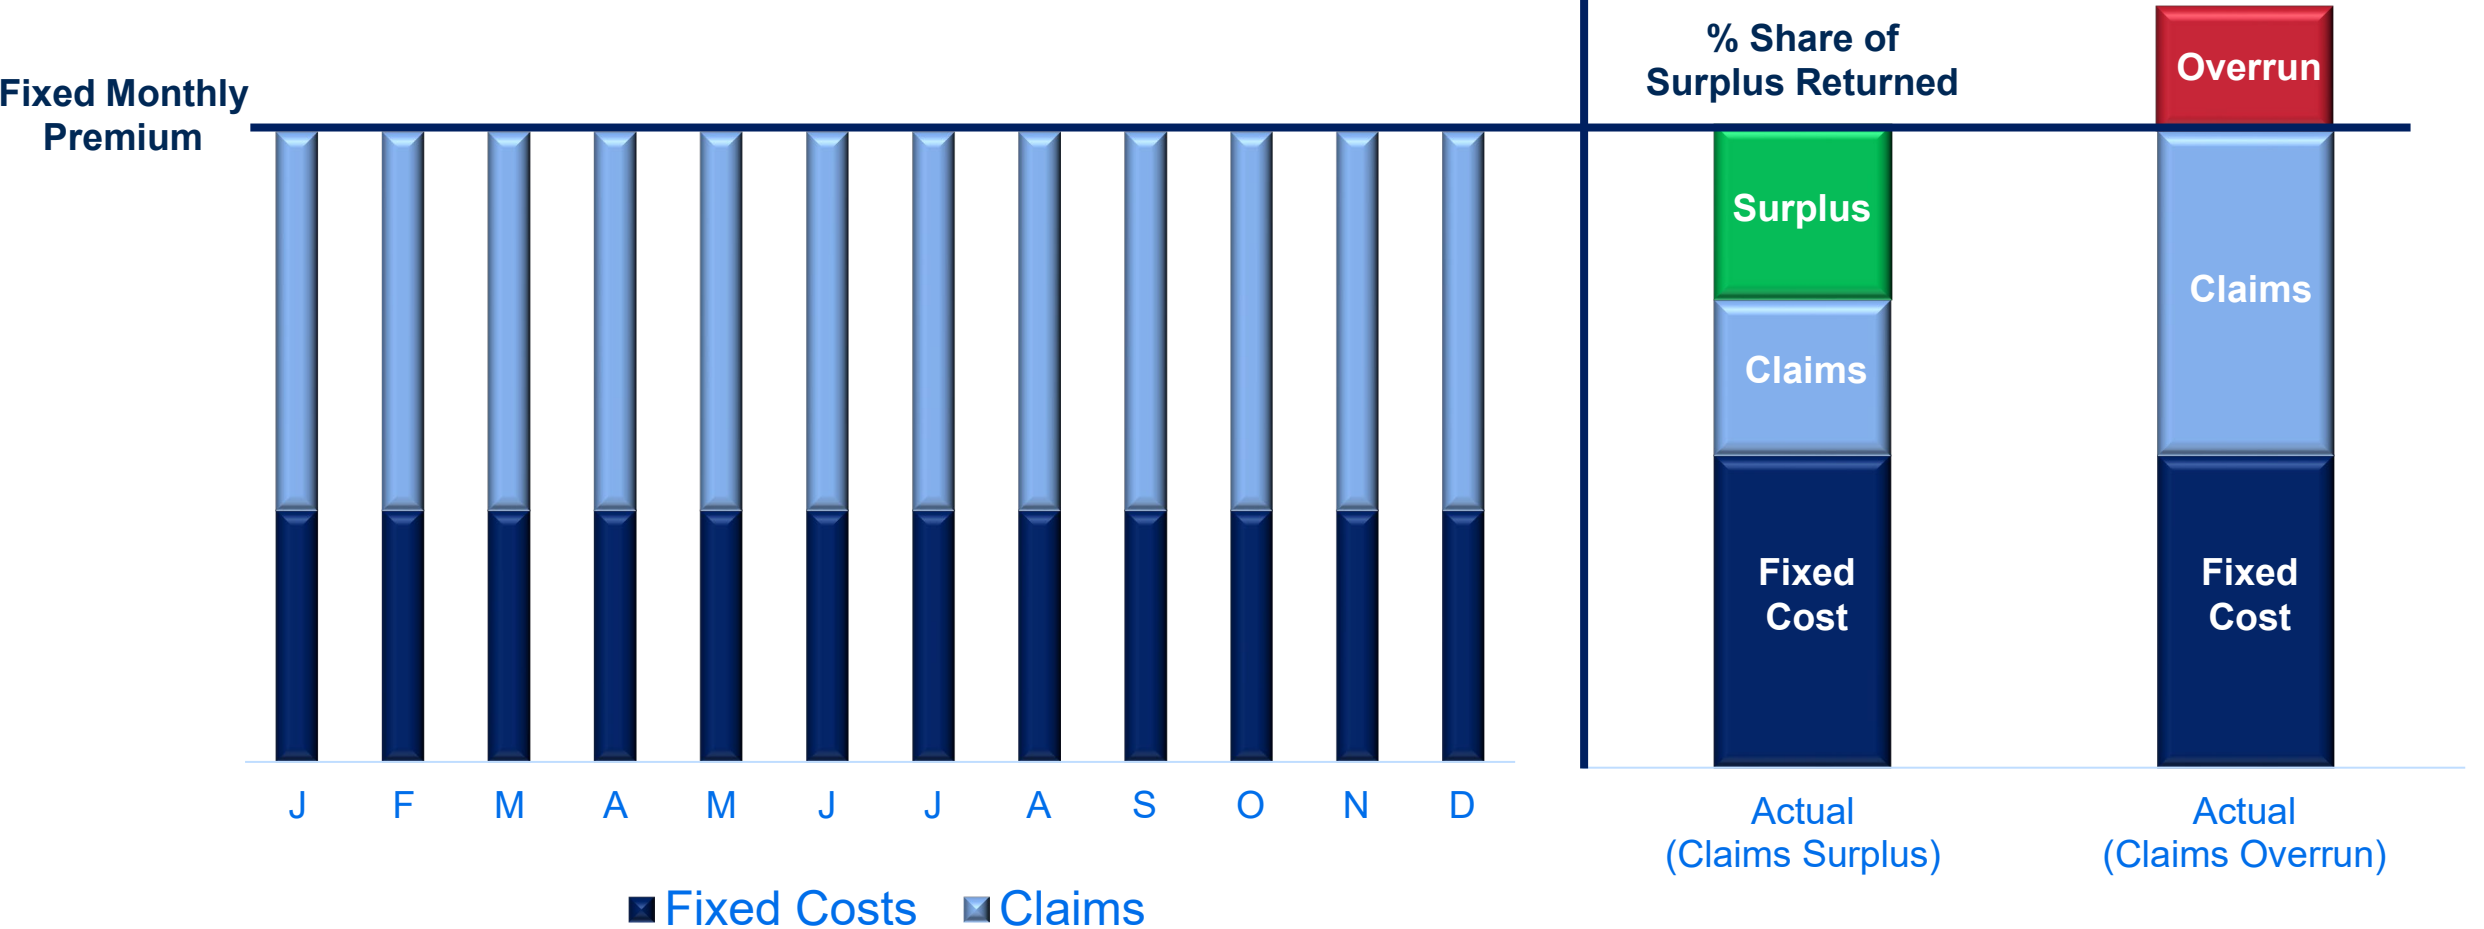

03

Level Funding Overview

LEVEL FUNDING(PARTIALLY SELF-FUNDED)

- Self-Funded Plan that looks and feels like Fully-Insured
- Potential of receiving surplus money (carriers have varying restrictions)

04

Self Funding Overview

SELF FUNDING

- Efficient allocation of claims funding
- Claims can be low in first few months of self funding
- Employer earns interest on funds kept on hand to pay claims, and reserves are held in bank account

PROS & CONS OF SELF-FUNDING

PROS

- + Lower premium taxes, admin. costs, and no carrier profit margins
- + No insurance carrier industry tax due to Health Care Reform
- + Cash Flow- pay claims as incurred
- + Immature claims 1st year – reserve
- + Funds stay in your bank account and build claims reserve in “good” years
- + Ultimate plan design flexibility
- + Stop-loss protection on large claims
- + Unbundled which allows you to select administrator, PPO, PBM, stop-loss
- + Change stop-loss carriers, but keep the same administrator

CONS

- Administration is slightly more burdensome
- Claims costs fluctuate month to month
- Maximum annual cost can be higher than guaranteed fully-insured premiums
- May have to fund large claim before being reimbursed
- The plan administrator may have to be involved in claim appeals which can be uncomfortable

05

Unique Strategies

LEVEL FUNDED TPA

Third Party Administrators:

BENEFIT
INDEMNITY
CORPORATION

Cost Containment Strategies:

- Reference Based Pricing
- Secondary Medical
- Specialty Rx Outsourcing
- Case Management
- Stop Loss Pricing
- Administration Pricing

REFERENCE BASED PRICING

An alternative self-funded type of arrangement. Claims are paid on a % of Medicare and employees are not restricted to a specific network. The goal is cost containment. This can be offered via Level or Self Funding.

ADVANTAGES	DISADVANTAGES
<ul style="list-style-type: none">✓ Financial Savings✓ No Facility Restrictions✓ PHCS Network (National Network)	<ul style="list-style-type: none">✓ Employee Education✓ Potential for Balance Billing✓ Potential Addition of HR Burden

REFERENCE BASED PRICING EXAMPLE:

Here is a real example of the savings you can receive with a Reference Based Pricing solution:

The client had a facility charge of **\$146,655.**

Medicare would have only paid **\$16,774.**

That's a
874%

mark-up above Medicare pricing.

- Through Reference Based Pricing, the plans responsibility was reduced to **\$23,483.** (140% of the Medicare-Based price)
- Generating over **\$123,000** in savings compared to Billed Charges
- A typical carrier PPO discount of 50%, would leave the charge at **\$73,327, \$49,844** higher

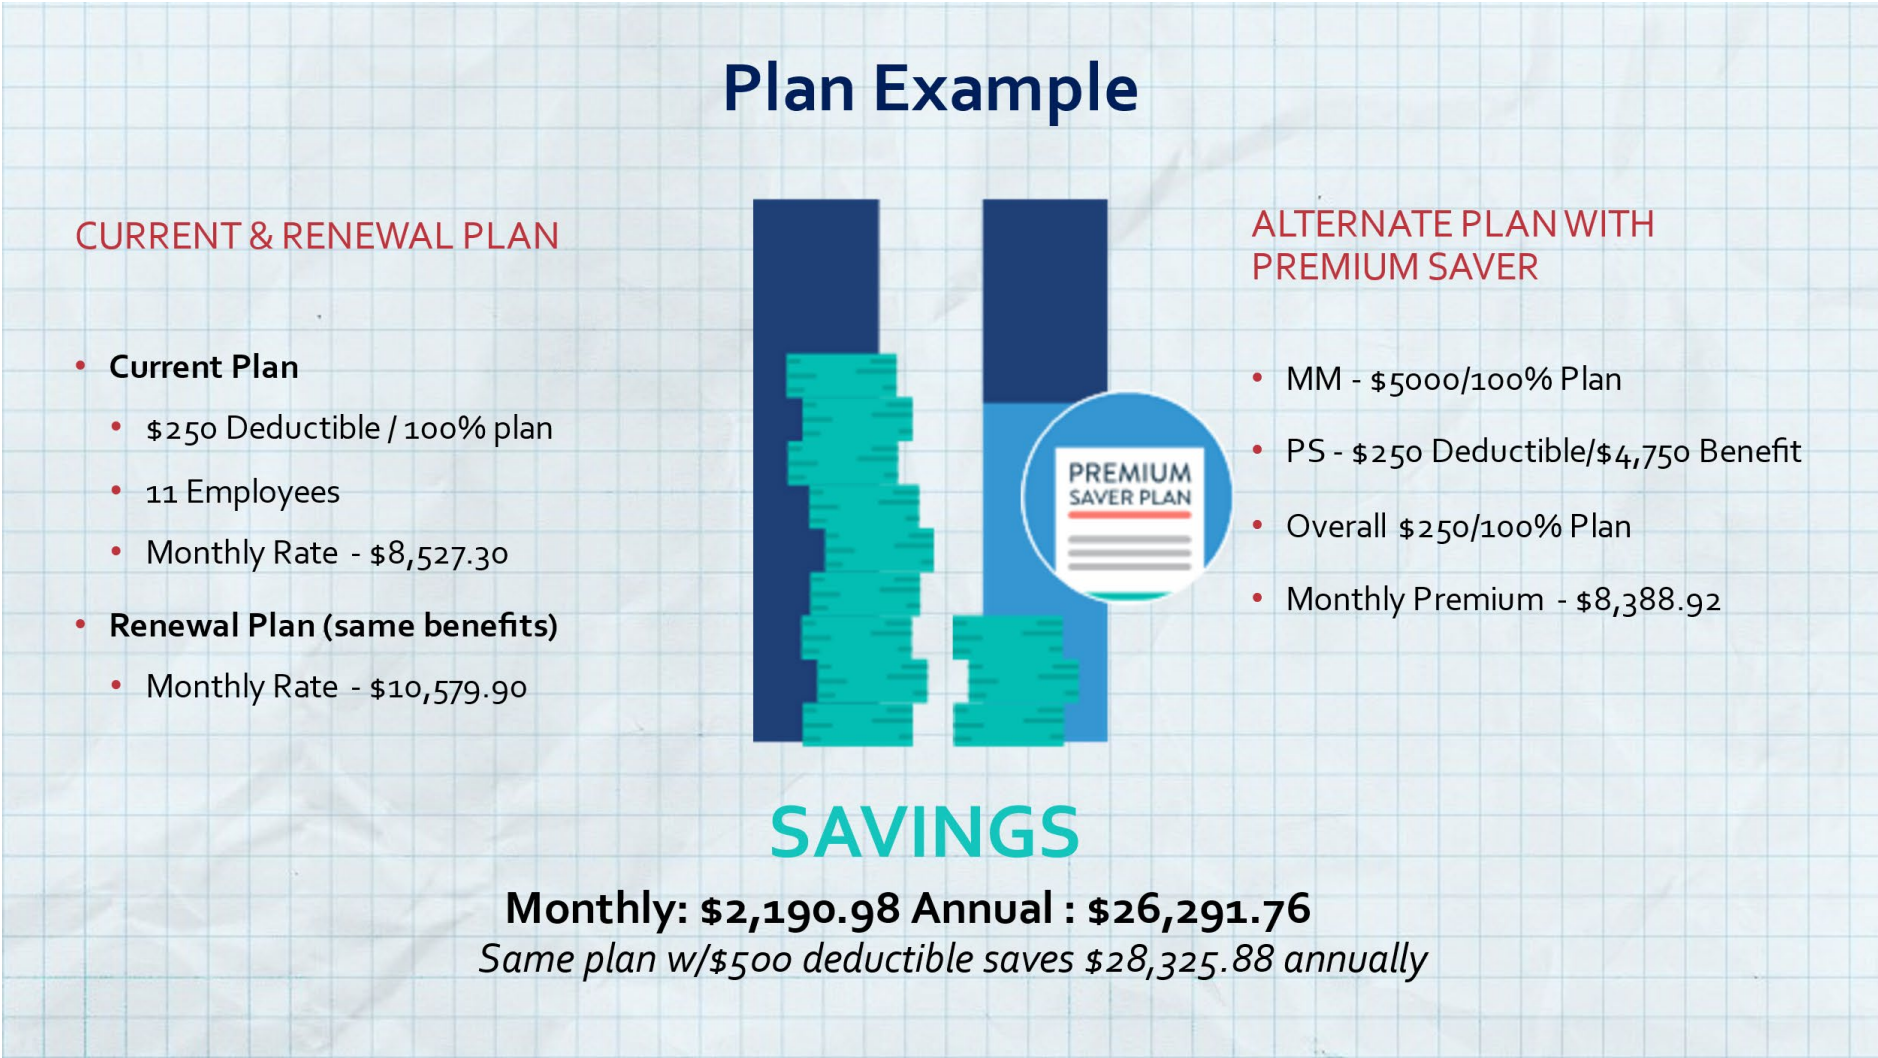

SECONDARY MEDICAL

An alternative funding arrangement where 2 ID cards are utilized for all medical services. Major Medical Deductible is raised to the legal limit & the secondary medical carrier bridges the gap so there is no change in deductible to the end consumer.

ADVANTAGES	DISADVANTAGES
<ul style="list-style-type: none">✓ Financial Savings	<ul style="list-style-type: none">✓ Employee Education✓ Potential Addition of HR Burden

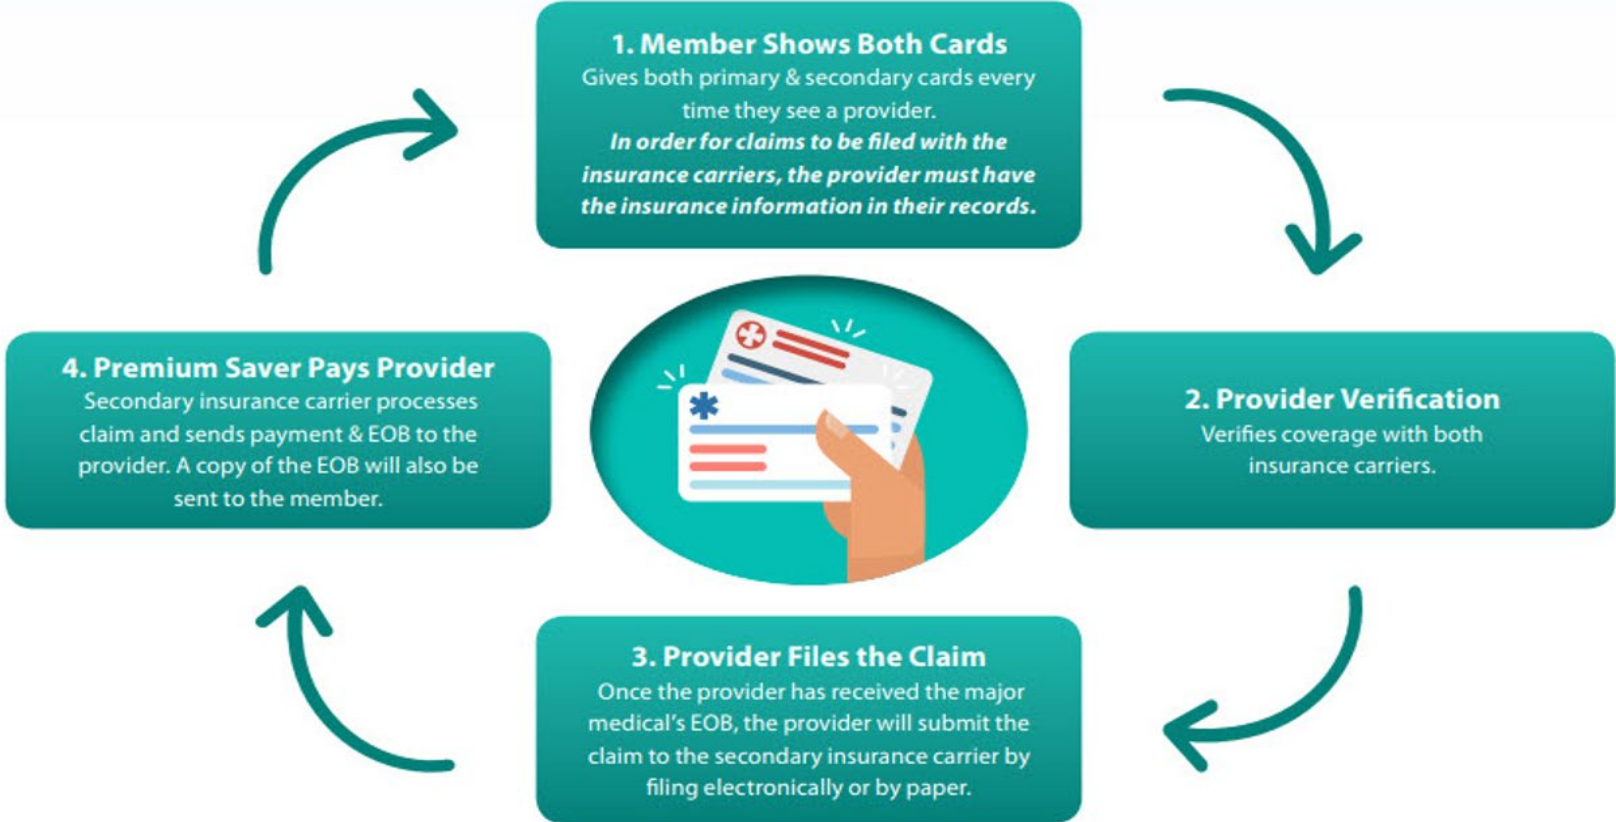

SECONDARY MEDICAL EXAMPLE:

SECONDARY MEDICAL EXAMPLE:

The employee simply presents their primary and secondary insurance cards **every time** they see their provider. The provider and insurance carriers do all the work and the member pays the final bill.

This is called the Two-Card System!

CAPTIVES

	Self-Funded Plans
Payments	Employer contributes a small amount up-front & pays a fixed monthly amount. Employers pays claims as they are incurred
Stop Loss	Provides protection by paying for claims that are above the Captive layer maximum
Assumption of Risk	Risk is shared with other organizations of the Captive
Plan Design	Employers have more control and freedom regarding plan design.
Compliance Payments	Health plan must comply with ERISA, but not state regulations.

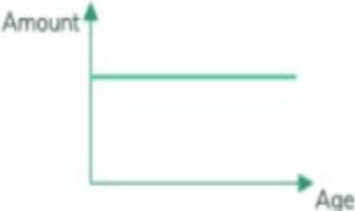

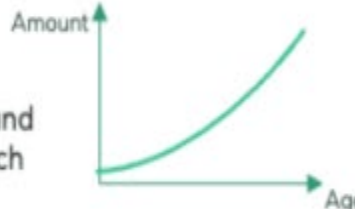

ICHRA's

An “Individual Coverage Health Reimbursement Arrangement” enables employers of any size to reimburse their employees tax-free. Employers set an allowance and employees choose the plan that fits their needs.

ICHRA'S

Structure	Description		Works Best For...
Flat	All employees get the same amount no matter their age (ex: everyone gets \$400/mo)	 <p>The graph shows a horizontal line on a coordinate system where the vertical axis is labeled 'Amount' and the horizontal axis is labeled 'Age'. This indicates that the benefit amount is constant regardless of the employee's age.</p>	Small companies new to benefits (and companies in NY & VT)
Vary by Age (Curve)	Employees get an amount proportional to plan costs (ex: if a 21 year old employee gets \$200/mo, then a 64 year old employee gets \$600/mo and everyone else in between receives a proportional level to achieve similar buying power, such as 80% of the lowest silver plan)	 <p>The graph shows a curve on a coordinate system where the vertical axis is labeled 'Amount' and the horizontal axis is labeled 'Age'. The curve starts at a low point for younger ages and rises more steeply as age increases, representing a benefit amount that is proportional to the higher plan costs for older employees.</p>	Companies leaving a group health plan. Provides "equal buying power" while optimizing budget

ICHRA'S

Traditional Reimbursement

employees pay monthly premiums

AutoPay

employer pays monthly premiums

ICHRA'S

ADVANTAGES	DISADVANTAGES
<ul style="list-style-type: none">✓ No Carrier Renewals✓ No Participation Requirements✓ Set your Budget & Cap Spend✓ Employee Choice for Healthcare	<ul style="list-style-type: none">✓ Employee Education✓ Potential Addition of HR Burden✓ Lack of Technology & Integration with existing systems
