

Glass Packaging Institute (GPI) is the North American trade association for the glass container manufacturing companies, and suppliers to the industry.

MEMBER COMPANIES:

- Manufacture 27 billion food jars and beverage bottles annually, supported by a workforce of 15,000 dedicated employees.
- Supply raw materials, closures, recycled glass, plant equipment, technical information, transportation, labeling and bottle decorating services.

AS ADVOCATES FOR GLASS PACKAGING, GPI...

Recycled glass use: Supports local, state and federal policies that increase the quality and quantity of recycled glass in new container production, to further reduce our carbon footprint. GPI takes a leadership role in the Glass Recycling Coalition and is active in a number of working groups and customer-facing organizations.

Transportation: Is a strong advocate for fair and transparent rail shipping policies.

Marketing: Works with members to grow and expand markets for glass bottles and jars by developing communications materials, commissioning original market-based research and providing statistical reports and information to members.

Third Party/ENGO: Maintains leadership roles and is active in a number of collective working groups and organizations.

Raw Materials: Advocates for policies that level the playing field for our domestic raw material supply companies. These include competitive royalty rates, transportation and broad-based sourcing priorities.

Energy: Works with member companies to ensure energy policy, air emissions and other manufacturing requirements recognize the energy-intensive-trade-exposed (EITE) nature of the industry.
