

Georgia Utility Contractors Association (GUCA)

March 9, 2026

HB 519 has been introduced by Rep. Ron Stephens. It would provide for a tax credit for employers that provide jobs to the unemployed and those defined by a specific definition (those with disabilities, veterans, and more). It passed the House and is now in the Senate Finance Committee!

Many of our members receive good work and income from projects building and maintaining data centers. There is an attack on the data center industry and data centers in the 2026 session.

SB 553 passed Rules and is now in the House. It relates to licensing for electrical contractors, plumbers, conditioned air contractors, low voltage contractors, and utility contractors. It was introduced by the Governor's Office and Senator Bo Hatchett. GUCA is in support and worked with the Governor's Office on it.

SB 34 calls for data centers to "pay their fair share", which is already the case under rules passed from the PSC in 2025, and it is still in the Senate.

HB 528 deals with how data centers have to disclose water and power usage. HB 559 ends the sales tax exemption they receive for the purchase of computer equipment, and it is still in the House Ways and Means Committee.

SB 410 would end data centers sales tax exemption on computer equipment upon the governor's signature or on July 1, 2026, but it attempts to grandfather in (but doesn't really) certain data centers that are receiving this exemption as of today. SB 408 would end their sales tax exemption on computer equipment as of January 1, 2027. SB 410 passed the Senate and is now in the House. HB 1012 would put a moratorium on data centers until February 2027 and further consideration at that time.

HB 1063 "protects residential and retail electricity customers from costs associated with data center construction and operation", and it is the Speaker's bill. HB 1063 is now in the Senate.

The House also removed the data center sales tax exemption in HB 1116 and HR 1114 this week in their bill to reduce or remove property taxes. These bills did not pass the House.

SB 476, SB 477, HB 134, and HB 463 passed the Senate and are in the House. They in a combined fashion aim to reduce or remove the State income tax over a number of years, and they end a number of state tax credits and exemptions including the sales tax exemption on computer equipment for data centers. They're now in the House.

As far as GUCA is concerned on other topics:

As you'll see in the legislation listed below, the Governor's bills on tort reform, SB 68 and SB 69, passed the House and Senate and were signed by the Governor! **This is a huge deal and is the most aggressive tort reform legislation passed in the country yet.**

SB 68 has caught the most focus of the two with it including negligent security, premises liability, collateral source, anchoring, bifurcation, and more sweeping changes!

As was said above, this is the most sweeping tort reform legislation the country has ever seen with all topics covered under civil litigation.

The Governor's Office and other legislators are also working on legislation to revamp state business licensing boards and to make it easier for those getting a license and renewing a license to get it completed through the Secretary of State's Office. There is also legislation you'll find below regarding bidding with local government agencies.

GUCA's very important and annually well attended Lobby Day was on the morning of February 3. We had a record setting of over 100 attendees there representing our industry, hearing from

Georgia’s political leadership about what is going on at the Capitol, and talking about issues important to us with our local legislators. We also had a proclamation and recognition of GUCA on the Senate floor, and we had a picture with the Governor on the Capitol steps! Thank you to all who attended!

The 2026 Georgia General Assembly had its 26th through 28th days of session this past week on March 2 - 6, 2026! They were in for three official legislative days this past week on Tuesday, Wednesday, and Friday. Monday and Thursday were committee work days.

Once again, it was a very busy week at the Capitol this past week with a lot of bills being introduced by House and Senate members and committee meetings held to hear, pass, and/or not pass bills. We have now passed Crossover Day, which was this past Friday!

Crossover Day is the day a bill has to be passed out of its original chamber, and the last day of session will be April 2!

This week of March 9 - 13 will have three official legislative days on Monday, Tuesday, and Thursday for legislative days 29 - 31 with Wednesday being a committee day.

Georgia’s Legislature operates on a biennial process, so 2026 is the second year of the process for 2025-2026. All bills that were not signed or vetoed by the Governor in 2025 are “alive” for passage and they begin in 2026 in the last committee from which they came in 2026.

Our team is acting at the association’s direction on all legislation and issues such as these above, and we will provide further updates in the future.

Thrash-Haliburton has been in constant communication with our leadership about issues and legislation coming up for our industry in the 2025-2026 session.

Here’s to another great year for our industry in 2026 at the State Capitol!

Thrash-Haliburton is diligently watching and working to stop any detrimental legislation to our industry and push the legislation we support. Our governmental affairs team continues every day to work on, look out for and answer requests, needs and interests, as we act at the direction of the group's leadership. Please find legislation affecting our industry below:

2025 Regular Session

We are monitoring the following legislation, and watchful for any bills that may impact our industry.
