

Modernizing America's Workforce Data Through A Public-Private Approach

March 23, 2021

Presentation by: Jason A. Tyszko

Presentation Objectives

- Provide overview of the U.S. Chamber of Commerce Foundation's Initiatives and Partnership with HR Open Standards Consortium
- Background on T3 Innovation Network, Job Data Exchange, and Employment and Earnings Records Standards Projects
- Provide overview of the upcoming work
 - Jobs and Employment Data Exchange (JEDx)
 - T3 Network of Networks

Job Data Exchange (JDX)

Job Data Exchange (JDX)

Timeline: March 2018 – Present

Objective: Promote public-private standards for job descriptions and postings

KEY TERM	DEFINITION	WIKTIONALISHORWICZ	CONNECTION TO SCHEMA.ORG
CATEGORY: Job Overview			
Application Location/Requirement Overview	Location(s) applicants can apply for	Typically used for reoccurring jobs where applicant does not need to be in a physical location	Some entries were placed in previous Location Requirements Schema.org or applied to the singular Application Location Requirement (JDX)
Employment Unit	Description of the employer, career opportunities, and work environment		Not included in Schema.org
Employment Unit	Department, unit, or job family within the employer (e.g., role or within the job is not yet defined)	The department identified should be the unit in which the industry is identified using the Industry Code and Industry	Not included in Schema.org
Formal Job Description	Complete job description of the job including job responsibilities, qualifications, skills, working hours, education requirements, and essential requirements	Includes HTML markup for formatting	Not included in Schema.org
Filing Organization	Organization offering the job position		Same as Schema.org
Identifier	Identifier for any unit for internal use (e.g., job, job posting, and department)		<ul style="list-style-type: none"> Schema.org provides for identifiers to be expressed as "Text", "URL", or "Property Value" JDX lists to "Property Value"
Industry	Description of the most critical economic or work activities performed (e.g., software development, electronic data processing, motor vehicle production, air transport and transportation services)	Description of the primary activity at the location of employment from which an industry code may be derived (e.g., NAICS in the U.S. and ISIC in the EU)	<ul style="list-style-type: none"> Schema.org Industry is a literal based on property value (literal term) and may capture a description of an industry or a code identifying the industry JDX: A description of the primary activity at the location of employment from which an industry code may be derived, with actual industry codes provided in the Industry Code property
Industry Code	Code from a job posting website and industry types identifying the primary economic activity of an establishment defined as a single physical location where business is conducted or where services or industrial operations are performed	Industry code identifying the primary activity of the location of employment (e.g., NAICS in the U.S. and ISIC in the EU)	Not included in Schema.org and not in JDX

The T3 Innovation Network

Launched in 2018 as an open innovation network to support the digital transformation of the talent marketplace

Made up of over 500 organizations, including business, education, government, nonprofits, technology vendors, etc.

Working together to make (1) all learning count; (2) competencies and skills the new currency; and (3) empower workers and learners with data

Focused on projects that are use case driven, standards-based, and vendor neutral

Promotes solutions that are open, ethical, and equitable

T3 Project Background

Data Ecosystem Schema Mapper (DESM)

Timeline: April 2019 – Present

Objective: The DESM provides semantic mapping of data standard schema properties and classes to support LERs

The screenshot shows the 'View Object Alignment' interface. At the top right, there are 'Export' and 'Close' buttons. Below the title, it indicates 'T3 / CEDES' and 'Competency Framework Item' with a dropdown menu set to 'Highest overall match'. On the left, there is a 'Property:' section with a 'Competency Framework Item Statement' and its description. The main part of the interface is a table with columns for Organization, Object, Property, and Alignment.

Organization	Object	Property	Alignment
CASE	CF Item	full Statement	Identical
CTDL/ASN	Statement	description	Identical
FESC	CommonCredentials / Course / Learning Outcome	LearningOutcome	Identical
HR Open	DefinitionStatementType	statementText	Identical
MedEdLiquitous	Item	general description	Identical
CASS	Competency	schema.org/name schema.org/description	Disaggregable
Schema.org	CreativeWork	schema.org/description	Revised
Ed-Fi	Learning Standard	Description	No Match

T3 Project Background

Employment and Earnings Records Standards Project

Timeline: June 2019 – December 2020 (Phase 1)

Objectives: Develop records standards (including data elements, definitions, and formats) for use in the public and private sectors. Explore the use of these standards in:

- Improving employer HR systems
- Enhancing state Unemployment Insurance (UI) wage records
- Improving federal and state data collection

EERS Phase 1 Findings

Created an HR Open Work Group

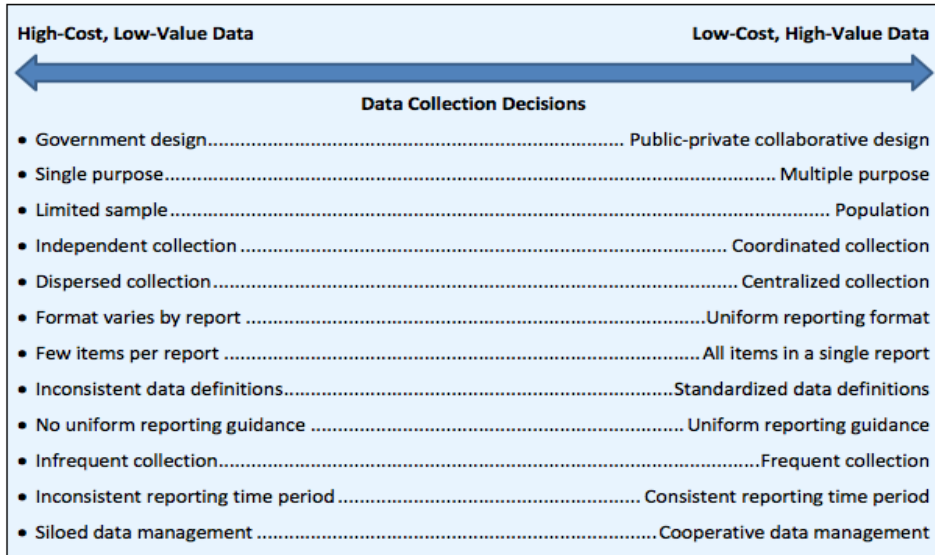

- Developed use cases for employers and government
- Developed candidate standards including Data Dictionary

Held Stakeholder Forums and Interviews

- Reviewed draft HR Open standards
- Discussed stakeholder benefits and costs and implementation issues

Finalized cost and benefit analysis of alternative implementation approaches

Hosted a Capstone Event

What Comes Next: JEDx

Two-month planning phase to develop a vision and roadmap for a public-private data collaborative that can improve the collection and use of standards-based jobs and employment data for public and private use cases that provide value to employers, workers/learners, government agencies, and others.

- Employer Reporting to Federal and State Governments
- Public and Private Workforce Analytics
- Learner/Worker Empowerment and Trusted Records
