

## Mission:

ILADS is a nonprofit, international, multidisciplinary medical society dedicated to the diagnosis and treatment of Lyme and other complex inflammatory diseases. ILADS promotes awareness and understanding of complex inflammatory diseases through science, research and education. We strongly support physicians, scientists, researchers and other healthcare professionals dedicated to defining and advancing excellence in the standard of care.

## New in 2025:

- **European Fundamentals Course:** This year we created a Fundamentals Course specific to our European clinicians targeted towards international treatment challenges.
- **ILADEF Allied Healthcare Professionals Training Program:** Similar to the ILADEF Physicians Training Program, this new educational offering is geared towards NPs, PAs (and other equivalent degrees) who do not have independent antibiotic prescription writing authority.
- **ILADS Fellowship:** The ILADS Fellowship is designed to further develop and showcase distinguished members who have displayed extensive knowledge in the field and a dedicated commitment to the organization. A total of 28 members were grandfathered into the Fellowship Program.
