## Duties

*This job description is illustrative only and is not a comprehensive listing of all job functions performed. The following are essential duties for this position, performed with or without reasonable accommodation:*

### Primary

Oversees planning, design, and construction of the water, wastewater, and stormwater systems including mains, pump stations, storage tanks, inlets, and other components of the infrastructure. Evaluates the need for water, wastewater, and stormwater system expansion, rehabilitation, and elimination.

Perform process engineering by working with the plant superintendents and operators at both the water and wastewater treatment plants to optimize the treatment processes, improve efficiencies, and minimize costs related to operations, maintenance, and capital project improvements.
