What Our Students Say

Why School Psychology ?

I decided to become a school psychologist because I wanted to spend my time in a profession where I felt like I could be a part of positive, systemic change in the world. There are a lot of ways to spend your life, and I cannot think of something more rewarding than helping kids and their families. (Remote Student)

Why MSUM ?

First and foremost, MSUM is affordable and flexible for someone from another state like I am. However, the reason that I chose MSUM's School Psychology program is because I felt connected with the program and the faculty when I had my interview and interacted with them in person. (Campus Student)

- No GRE required
- You do not need to be a Psychology major
- Flexible timeline and course delivery
- Applications due February 1
