

## Realizing Architectural Vision with Metal Building Excellence

A Collaborative Introduction from the Metal Building Manufacturers Association (MBMA), the International Accreditation Service (IAS) and the Metal Building Contractors and Erectors Association (MBCEA)

Design. Manufacture. Assemble.

Together, the MBMA, IAS and MBCEA need you, the architects, to complete a powerful alliance from concept to completion for metal building system construct.

### MBMA: Design & Innovation

MBMA provides architects with cutting-edge resources, design guides, and technical expertise to unlock the full potential of metal building systems.

### IAS: Accreditation & Assurance

IAS ensures quality and compliance through its [AC472](#) (manufacturers) and [AC478](#) (assemblers) accreditation programs—critical benchmarks for safety, reliability, and code adherence.

### MBCEA: Execution & Excellence

MBCEA ensures that your well-designed metal building systems are assembled with precision, and safety. Our accredited contractors and erectors bring your vision to life by:

- Applying best practices in field assembly
- Ensuring structural integrity and safety
- Minimizing risk and delays (callbacks)
- Supporting collaboration with design teams

We don't just support design—we guarantee its successful execution.

### Educational Opportunities

AIA-accredited CEU presentations that explore:

- Design-to-assembly workflows
- Case studies of successful metal building projects
- Safety and structural guidance
- Environmental and economic benefits

### Let's Collaborate

- Host joint educational sessions
- Explore accreditation benefits
- Connect with expert contractors and erectors
